Persistence and Emergencies of Inequalities in Latin America Pablo Vommaro, Pablo Baisotti, 2022-02-21 This book adopts a multidimensional approach to analyze both the historical and emerging factors that contribute to make Latin America and the Caribbean the most unequal region in the world Social inequality is a historical characteristic of the region but at the beginning of the 21st century a handful of progressive governments seemed to be adopting policies that could reduce this historical trend Many of these efforts however were blocked or reversed by the COVID 19 pandemic which both exposed the persistence of historical trends and contributed to the emergency of new forms of inequality in the region The different chapters in this contributed volume adopt a multidimensional intersectional perspective to analyze both the persistence and the emergency of social devices of production and reproduction of inequalities in the diverse Latin American and Caribbean temporal spatialities The issues analyzed in the different chapters revolve around four main axes a persistence of generational and intergenerational inequalities b structural gender inequality c intertwined social inequalities race class and social structure and c historical and economic dimension of inequality Persistence and Emergencies of Inequalities in Latin America A Multidimensional Approach will be of interest to researchers interested in the study of social inequality and social justice in different fields of the human and social sciences such as sociology political science history economics anthropology and education It will also be a valuable tool for policy makers and social activists engaged in the discussion advocacy and implementation of public policies aimed at reducing social inequalities

Education Systems in Historical, Cultural, and Sociological Perspectives Daniel Tröhler, Ragnhild Barbu, 2012-03-26 For nearly half a century research on education systems has been increasingly popular However this popularity was long restricted primarily to internationally linked policy makers and education planners often backed up by international organizations such the OECD but also by governmental or para governmental organizations within the individual countries These institutional affiliations provided education research with a specific character that often centres on notions such as excellence efficiency or standards The specific comparative character of this policy driven research agenda triggered the development of suitable research techniques such as comparative statistics and pertinent sub disciplines such as cognitive psychology Backed up by powerful global institutions this agenda purported to be rather unique and it tended to ignore the cultural complexity of the educational field and those research approaches that address this complexity This volume includes different historical cultural and sociological approaches to the education systems and to questions as to how research on education systems can be undertaken beyond the parameters of the existing research agenda They demonstrate how pertinent problems of research on education systems can only be tackled taking an international and interdisciplinary approach with regard to both research questions and methods concerning education

systems Cincuenta años de educación en Argentina Norberto Fernández Lamarra, Lucila Arrigazzi Jallade, Marisa Álvarez, 2025-05-02 En 1968 se publicó el estudio Educación recursos humanos y desarrollo económico social elaborado por el Sector Educación del Consejo Nacional de Desarrollo bajo la dirección de Norberto Fernández Lamarra. Se trata de la primera investigación realizada en Argentina sobre el sistema educativo y sentó las bases para el planeamiento de la educación nacional. Cincuenta años de educación en Argentina es un proyecto surgido del trabajo con colegas del NIFEDE y de la UNTREF con el invaluable aporte de Lucila Arrigazzi Jallade y Marisa Álvarez, el compromiso de los demás autores y la revisión crítica de Cristian Pérez Centeno y Pablo García. El libro tiene como referencia el estudio del CONADE en cuanto al vínculo entre la producción de conocimiento, la utilización de múltiples fuentes y la formulación de políticas a través de procesos sistémicos. Las dificultades creadas por la pandemia de COVID 19 han demorado la publicación, pero igualmente consideramos que será un aporte significativo para pensar, investigar, debatir, diseñar, planificar y evaluar políticas y estrategias para el futuro de nuestra educación. **Registro estadístico de la República Argentina** Argentina. Examining Educational Policy in Latin America Axel Rivas, 2021-12-30 This book synthesizes and analyzes the complex map of educational reforms in Latin America in the first two decades of the 21st century. The book offers insights into the agendas, processes and political economy of educational reforms in Argentina, Brazil, Chile, Colombia, Mexico and Peru. Written by renowned contributors from each country, chapters present systematic critical and reflective accounts of an intense period of education reforms. The book fills a gap in educational research and provides a systematic study that compares the cases analyzed. The first broad comparative collection of its kind, the book is well suited to courses in international and comparative education policy. Assessment in Latin America Sue Swaffield, Sally Thomas, 2019-07-23 This collection presents educational assessment research from Latin America, adding to a relatively small but growing body of research considering educational assessment and evaluation issues in this large region. The predominance of Chile reflects its early, highly centralized education system.

and the fact that it adopted national testing before other Latin American countries It was also an early participant in international assessment programmes Other countries have followed the trend of implementing national testing and to a lesser extent participating in international surveys The complementary development of technical expertise in quantitative research methods has enabled extensive analysis of the large data sets generated by these testing and assessment programmes Taken together the evidence reported provides a means not only of reviewing educational quality issues in Latin America but also of facilitating comparisons that allow the context specificity of equivalent research conducted in western developed countries to be considered The chapters in this book were originally published as a special issue of Assessment in Education Principles Policy and Practice **IB World Schools Yearbook 2012** ,2012 *Revista argentina de ciencias políticas* ,1912 **Revista Argentina de Ciencias Politicas** ,1912 **Revista argentina de ciencias políticas** Rodolfo Rivarola,Horacio C.
