Europe John Andreas Olsen, 2019-03-04 NATO's Northern members are increasingly concerned about Russia's military activities. This Whitehall Paper contains perspectives from prominent authors across the region showing how member states are responding individually and collectively to Moscow's resurgence. Overall, it identifies the common but differentiated responsibility that member states have for security in the Alliance's northern regions. *Society, Environment and Human Security in the Arctic Barents Region* Kamrul Hossain, Dorothée Cambou, 2018-05-20 The Arctic Barents Region is facing numerous pressures from a variety of sources including the effect of environmental changes and extractive industrial developments. The threats arising out of these pressures result in human security challenges. This book analyses the formation and promotion of societal security within the context of the Arctic Barents Region. It applies the human security framework which has increasingly gained currency at the UN level since 1994 UNDP as a tool to provide answers to many questions that face the Barents population today. The study explores human security dimensions such as environmental security, economic security, health, food, water, energy, communities, political security, and digital security in order to assess the current challenges that the Barents population experiences today or may encounter in the future. In doing so, the book develops a comprehensive analysis of vulnerabilities, challenges, and needs in the Barents Region and provides recommendations for new strategies to tackle insecurity and improve the wellbeing of both indigenous and local communities. This book will be a valuable tool for academics, policy makers, and students interested in environmental and human security, sustainable development, environmental studies, and the Arctic and Barents Region in particular. **The Politics of Security Sector Reform** Magnus Ekengren, 2016-02-24 Security Sector Reform (SSR) is increasingly becoming a cornerstone in international security and development cooperation. Indeed, the concept has often been seen as a panacea for many of the biggest threats to the world such as failed states, terrorism, and poverty. In particular, this book focuses on the complexities of implementation of SSR across the globe and the actual and potential role for the European Union (EU) to play in SSR. As suggested in the title of the book, this involves not only opportunities but challenges to be overcome as well. There are three core themes to this book: Policy, Policies, and Practice. By presenting the themes in this particular order, a greater appreciation of the influences on the process of SSR from conception to implementation is relayed to the reader. This volume appeals to audiences interested in the EU as a global actor and the interrelationships between foreign security, defence, and development policies. The Nordic Countries and the European Union Caroline Grøn, Peter Nedergaard, Anders Wivel, 2015-02-20 In European policy making, the Nordic countries are often viewed as a relatively coherent bloc in international and European affairs. The Nordic position has traditionally been conditioned on being different from and better than Europe. This book offers a coherent, original, and systematic comparative analysis of the relationship between the Nordic countries and the European Union over the past two decades. It looks at the historical frame, institutions, and policy areas addressing both traditional EU areas such as agriculture and more nascent areas affecting the domestic and foreign policies.

of the Nordic countries In doing so it examines how the Nordic approach to European policy making has developed and explains why the Nordic countries are similar in some respects while differing in others when engaging with EU institutions In highlighting the similarities and differences between the Nordic countries it explores what lessons positive and negative may be drawn from this approach for the Nordic countries and other small states This book will be of interest to scholars students and practitioners engaged with the Nordic Countries EU politics and policy making European politics and comparative politics

Strategic Challenges in the Baltic Sea Region Ann-Sofie Dahl, 2018-05-07 How should the countries in the Baltic Sea region and their allies meet the strategic challenges posed by an openly aggressive and expansionist Russia NATO and the nonaligned states in the region are now more concerned about an external threat than they have been since the end of the Cold War Russia has been probing air space maritime boundaries and even land borders from the Baltic republics to Sweden Russia's undermining of Ukraine and annexation of Crimea worries former Soviet republics with Russian minority populations nonaligned Sweden and Finland are enhancing their cooperation with NATO and the Trump presidency has created some doubt about America's willingness to follow through on NATO's collective defense commitment Ann-Sofie Dahl brings together an international group of experts to examine Baltic security issues on a state by state basis and to contemplate what is needed to deter Russia in the region The contributors analyze ways to strengthen regional cooperation and to ensure that security in the region stays at the top of the agenda at a time of many competing strategic perspectives in the transatlantic community This book will be of great interest to foreign policy and defense practitioners in the US and Europe as well as scholars and students of international relations

Small States and International Security Clive Archer, Alyson J.K. Bailes, Anders Wivel, 2014-03-14 This book explains what small states are and explores their current security challenges in general terms and through specific examples It reflects the shift from traditional security definitions emphasizing defence and armaments to new security concerns such as economic societal and environmental security where institutional cooperation looms larger These complex issues linked with traditional power relations and new types of actors need to be tackled with due regard to democracy and good governance Key policy challenges for small states are examined and applied in the regional case studies The book deals mainly with the current experience and recent past of such states but also offers insights for their future policies Although many of the states covered are European the study also includes African Caribbean and Asian small states Their particular interest and relevance is outlined as is the connection between their security challenges and their smallness Policy lessons for other states are then sought The book is the first in depth multi-continent study of security as an aspect of small state governance today It is novel in placing the security dilemmas of small states in the context of wider ideas on international and institutional change and in dealing with non-European states and regions

The Intergovernmental Conference on Political Union Finn Laursen, Sophie Vanhoonacker, 2023-12-11 The radical changes taking place in the international scene during the late 1980s have presented the European Communities with

important new challenges The twelve Member States agreed that the only way to respond effectively to this new situation was to speed up the European integration process and in December 1990 two Intergovernmental Conferences were inaugurated focusing respectively on the development of an Economic and Monetary Union and a Political Union It was the difficult task of the Luxembourg and Dutch Presidencies to channel the often very diverging positions of the different actors in the process into one coherent set of amendments to the Treaties forming the European Communities This publication examines the positions which the different Member States the Commission and the European Parliament have been defending in the Intergovernmental Conference on Political Union and more particularly with regard to one of the most sensitive topics under discussion namely the development of a Common Foreign and Security Policy CFSP The introduction places the debate on the development of a Political Union and a CFSP in an historical perspective and gives an overview of the progression of the negotiations The concluding chapter presents a general framework for better understanding of the course and results of the negotiations and a critical evaluation of the outcome The annexes reproduce the main proposals on the development of a CFSP submitted to the Conference

Policing European Metropolises Elke Devroe,Adam Edwards,Paul Ponsaers,2017-02-03 Understanding the politics of security in city regions is increasingly important for the study of contemporary policing This book argues that national and international governing arrangements are being outflanked by various transnational threats including the cross border terrorism of the attacks on Paris in 2015 and Brussels in 2016 trafficking in people narcotics and armaments cybercrime the deregulation of global financial services and environmental crime Metropolises are the focal points of the transnational networks through which policing problems are exported and imported across national borders as they provide much of the demand for illicit markets and are the principal engines generating other policing challenges including political protest and civil unrest This edited collection examines whether and how governing arrangements rooted in older systems of national sovereignty are adapting to these transnational challenges and considers problems of and for policing in city regions in the European Union and its single market Bringing together experts from across the continent Policing European Metropolises develops a sociology of urban policing in Europe and a unique methodology for comparing the experiences of different metropolises in the same country This book will be of value to police researchers in Europe and abroad as well as postgraduate students with an interest in policing and urban policy

Rethinking Security in Post-Cold-War Europe William Park,G.Wyn Rees,2014-06-11 Provides a survey of the principal items on the agenda following the end of the Cold War focusing upon the institutions and regions where the reconsideration of security issues has been particularly profound The book is organised into three main sections the first examines the changed roles of the main security institutions which have survived the Cold War NATO the European Union Western European Union and the Organisation for Security and Cooperation in Europe The second analyses the Central European countries Russia and States of the former Soviet Union in terms of their ideologies political structures and

relationships of the Cold War period Lastly the text examines the northern and southern regions of Europe where quite different perspectives and agendas are concerned

Nordic Cooperation Johan Strang, 2015-07-16 The recent crises in global economy and in European integration have caused a considerable revival of interest in the Nordic Welfare Model However less attention has been given to the ways in which the nations that form Scandinavia or Norden are connected through various forms of inter and transnational cooperation With contributions from a team of experts in the field this volume analyses Nordic cooperation in a European perspective and argues that this special form of transnational cooperation has been crucial in the development of the Nordic Welfare Model In addition it also contends that the Nordic model of transnational cooperation is a relevant case study when pondering the present problems of European integration This text will be of key interest to students researchers and policy makers studying the Nordic Model and transnational cooperation and more generally to those interested in European studies Scandinavian studies welfare studies international relations and regional integration

European Security Bjørn Møller, 2016-04-22 Europe has undergone quite profound changes since the end of the Cold War Having been a highly militarised conflict ridden and war ridden region the core of Europe today constitutes a security community where armed conflicts among the constituent states has become inconceivable This comprehensive book offers a theoretically founded and thoroughly documented analysis of European security with a special emphasis on the role played by the United Nations and the various regional and sub regional organisations especially the North Atlantic Treaty Organisation the Organisation for Security and Cooperation in Europe the Council of Europe and the European Union When it comes to explaining peace in Europe opinions differ widely Some argue that it was only because the West refused to give in to Soviet threats that the latter eventually gave up or that the long peace in Europe was due to the combination of a bipolar alliance structure pitting the North Atlantic Treaty Organisation NATO against the Warsaw Pact with the presence of nuclear weapons on both sides Others point instead to the extraordinarily dense network of international institutions and organisations in Europe offering a wide panoply of fora in which to handle disputes peacefully or to the web of interdependence in economic and other affairs tying together all states in Europe in relations which militate strongly against war Still others believe that the external peace between the states in Europe is simply a reflection of a convergence of cultures democracies with marked economies that are open towards the world market These questions are the focal point of this book which concentrates on security albeit not in the sense of being a treatise on military matters but security obtainable by much more indirect and non military means It will be required reading for all students and scholars of European security and the organisations which underpin it

Post-Cold War Identity Politics Marko Lehti, David J Smith, 2004-11-23 During the past decade northern Europe has started to assume an identity of its own Categories of East and West have become blurred challenging as well the idea of what it means to be Nordic Post Cold War Identity Politics maps this process in Scandinavia Looking at projects designed to help regional development in the Nordic countries it

assesses whether a new way of defining Northernness is emerging. The book highlights the existence of co-existing and to some extent competing region-building projects in northern Europe. It demonstrates how they are all efforts by existing nations to redefine their role in Europe at a time of change and points to how they might develop in the future. Arctic Security in an Age of Climate Change James Kraska, 2011-07-25. This book examines Arctic defense policy and military security from the perspective of all eight Arctic states. In light of climate change and melting ice in the Arctic Ocean, Canada, Russia, Denmark, Greenland, Norway, and the United States, as well as Iceland, Sweden, and Finland, are grappling with an emerging Arctic security paradigm. This volume brings together the world's most seasoned Arctic political-military experts from Europe and North America to analyze how Arctic nations are adapting their security postures to accommodate increased shipping, expanding naval presence, and energy and mineral development in the polar region. The book analyzes the ascent of Russia as the first Arctic superpower, the growing importance of polar security for NATO and the Nordic states, and the increasing role of Canada and the United States in the region.
