Seed Money The Guggenheim Story:

Seed Money Milton Lomask,1964-01-01 **The Guggenheim** Francesco Dal Co,2017-01-01 The captivating tale of the plans and personalities behind one of New York City's most radical and recognizable buildings. Considered the crowning achievement of Frank Lloyd Wright, 1867-1959, the Solomon R. Guggenheim Museum in Manhattan is often called iconic. But it is in fact iconoclastic, standing in stark contrast to the surrounding metropolis and setting a new standard for the postwar art museum. Commissioned to design the building in 1943 by the museum's founding curator, Baroness Hilla von Rebay, Wright established residence in the Plaza Hotel in order to oversee the project. Over the next 17 years, Wright continuously clashed with his clients over the cost and the design, a conflict that extended to the city of New York and its cultural establishment. Against all odds, Wright held fast to his radical design concept of an inverted ziggurat and spiraling ramp built with a continuous beam, a shape recalling the form of an hourglass. Construction was only completed in 1959, six months after Wright's death. The building's initial critical response ultimately gave way to near universal admiration as it came to be seen as an architectural masterpiece. This essential text offering a behind-the-scenes story of the Guggenheim, along with a careful reading of its architecture, is beautifully illustrated with more than 150 images, including plans, drawings, and rare photographs of the building under construction.

Fifty Years in Public Causes Brian O'Connell,2005 Stories from a fascinating life devoted to providing opportunities for citizens to improve their lives, strengthen their communities, and empower democracy.

Philanthropists and Foundation Globalization Joseph Kiger,2017-07-28 The modern American foundation as an instrumentality for charitable and philanthropic giving is in many ways a unique and complex social, economic, political institution. This is particularly the case for foundations with large assets. As a social phenomenon, the foundation has deep roots in the past. At the beginnings of any degree of civilization, charitable giving and rudimentary forms of foundations emerge. This is the case in many regions of the world. The pattern is consistent: once enough property or wealth beyond primitive human needs is accumulated, some of it begins to be set aside for what the donors of such wealth consider worthwhile purposes. The serious literature contributing greatly to public perception of philanthropy and foundations has been relatively sparse. Much of what is available is quantitative and statistical in nature. There has been limited objective attention to the motives or reasons spurring individual philanthropists to engage or not to engage in creating foundations. Such motivation needs historical and comparative analysis. Major investigations and studies of foundations, together with ancillary national, regional, and international organizations to facilitate such study, have received spotty consideration. **Philanthropists and Foundation Globalization** addresses three interrelated aspects of foundation history. First, it reviews biographical, historical profiles of the founding philanthropists and their heirs engaged in international giving. Second, it discusses major governmental and non-governmental investigations and studies of foundations, including domestic ones and also foreign ones in which U.S. participants have played a prominent role spanning the period 1912 to the present. Third, it

chronicles foundation developments and activities in Europe at the close of the twentieth century The volume provides a historical account of some U S foundations international activity in a particular region in a specific time period and their a

The Flight of the Century Thomas

Kessner, 2010-07-20. In late May 1927 an inexperienced and unassuming 25 year old Air Mail pilot from rural Minnesota stunned the world by making the first non stop transatlantic flight. A spectacular feat of individual daring and collective technological accomplishment. Charles Lindbergh's flight from New York to Paris ushered in the modern age of commercial aviation. In *The Flight of the Century* Thomas Kessner takes a fresh look at one of America's greatest moments explaining how what was essentially a publicity stunt became a turning point in history. Kessner vividly recreates the flight itself and the euphoric reaction to it on both sides of the Atlantic and argues that Lindbergh's amazing feat occurred just when the world still struggling with the disillusionment of WWI desperately needed a hero to restore a sense of optimism and innocence. Kessner also shows how new forms of mass media made Lindbergh into the most famous international celebrity of his time casting him in the role of a humble yet dashing American hero of rural origins and traditional values. Much has been made of Lindbergh's personal integrity and his refusal to cash in on his fame but Kessner reveals that Lindbergh was closely allied with and managed by a group of powerful businessmen: Harry Guggenheim, Dwight Morrow and Henry Breckenridge chief among them who sought to exploit aviation for mass transport and massive profits. Their efforts paid off as commercial air traffic soared from 6 000 passengers in 1926 to 173 000 passengers in 1929. Kessner's book is the first to fully explore Lindbergh's central role in promoting the airline industry the rise of which has influenced everything from where we live to how we wage war and do business.

The Oxford Encyclopedia of Economic History Joel Mokyr, 2003.

What were the economic roots of modern industrialism? Were labor unions ever effective in raising workers' living standards? Did high levels of taxation in the past normally lead to economic decline? These and similar questions profoundly inform a wide range of intertwined social issues whose complexity, scope and depth become fully evident in the *Encyclopedia*. Due to the interdisciplinary nature of the field the *Encyclopedia* is divided not only by chronological and geographic boundaries but also by related subfields such as agricultural history, demographic history, business history and the histories of technology, migration and transportation. The articles, all written and signed by international contributors, include scholars from Europe, Latin America, Africa and Asia. Covering economic history in all areas of the world and segments of economies from prehistoric

Bilstein, Roger Bilstein, 2008-12-01 From 1918 to 1929 American aviation progressed through the pioneering era establishing the pattern of its impact on national security commerce and industry communication travel geography and international relations In America as well as on a global basis society experienced a dramatic transformation from a two dimensional world to a three dimensional one By 1929 aviation was poised at the threshold of a new epoch Covering both military and civil aviation trends Roger Bilstein s study highlights these developments explaining how the pattern of aviation activities in the 1920s is reflected through succeeding decades At the same time the author discusses the social economic and political ramifications of this robust new technology Aviation histories usually pay little attention to aeronautical images as an aspect of popular culture Thoughtful observers of the 1920s such as Stuart Chase and Heywood Broun considered aircraft to be an encouraging example of the new technology workmanlike efficient and graceful perhaps representing a new spirit of international good will *Flight Patterns* is particularly useful for its discussion of both economic and cultural factors treating them as integrated elements of the evolving air age Flying the Beam Henry R. Lehrer, 2014 With air travel a regular part of daily life in North America we tend to take the infrastructure that makes it possible for granted However the systems regulations and technologies of civil aviation are in fact the product of decades of experimentation and political negotiation much of it connected to the development of the airmail as the first commercially sustainable use of airplanes From the lighted airways of the 1920s through the radio navigation system in place by the time of World War II this book explores the conceptualization and ultimate construction of the initial US airways systems The daring exploits of the earliest airmail pilots are well documented but the underlying story of just how brick and mortar construction radio research and improvement chart and map preparation and other less glamorous aspects of aviation contributed to the system we have

today has been understudied Flying the Beam traces the development of aeronautical navigation of the US airmail airways from 1917 to 1941 Chronologically organized the book draws on period documents pilot memoirs and firsthand investigation of surviving material remains in the landscape to trace the development of the system The author shows how visual cross country navigation only possible in good weather was developed into all weather blind flying The daytime techniques of following railroads and rivers were supplemented by a series of lighted beacons later replaced by radio towers crisscrossing the country to allow nighttime transit of long distance routes such as the one between New York and San Francisco Although today s airway system extends far beyond the continental US and is based on digital technologies the way pilots navigate from place to place basically uses the same infrastructure and procedures that were pioneered almost a century earlier While navigational electronics have changed greatly over the years actually flying the beam has changed very little The Huntress Alice Arlen, Michael J.
