Sterling, 2009-10-30 A number of nations conspicuously Israel and the United States have been increasingly attracted to the use of strategic barriers to promote national defense In *Do Good Fences Make Good Neighbors* defense analyst Brent Sterling examines the historical use of strategic defenses such as walls or fortifications to evaluate their effectiveness and consider their implications for modern security Sterling studies six famous defenses spanning 2 500 years representing both democratic and authoritarian regimes the Long Walls of Athens Hadrian s Wall in Roman Britain the Ming Great Wall of China Louis XIV s Pr Carr France s Maginot Line and Israel s Bar Lev Line Although many of these barriers were effective in the short term they also affected the states that created them in terms of cost strategic outlook military readiness and relations with neighbors Sterling assesses how modern barriers against ground and air threats could influence threat perceptions alter the military balance and influence the builder s subsequent policy choices Advocates and critics of strategic defenses often bolster their arguments by selectively distorting history Sterling emphasizes the need for an impartial examination of what past experience can teach us His study yields nuanced lessons about strategic barriers and international security and yields findings that are relevant for security scholars and compelling to general readers Military Innovation in the Interwar Period Williamson R. Murray, Allan R. Millett, 1996-08-28 In 1914 the armies and navies that faced each other were alike right down to the strengths of their companies and battalions and the designs of their battleships and cruisers Differences were of degree rather than essence During the interwar period however the armed forces grew increasingly asymmetrical developing different approaches to the same problems This study of major military innovations in the 1920s and 1930s explores differences in exploitation by the seven major military powers The comparative essays investigate how and why innovation occurred or did not occur and explain much of the strategic and operative performance of the Axis and Allies in World War II The essays focus on several instances of how military services developed new technology and weapons and incorporated them into their doctrine organisation and styles of operations **Towards Effective and Sustainable Seed Relief Activities** Food and Agriculture Organization of the United Nations, 2004-01-01 This report contains papers given to a FAO workshop meeting held in Rome in May 2003 organised to consider how to improve the effectiveness of seed relief schemes

Seed Policy and Programmes in the Near East and North Africa ,2000-01-01 This publication presents the proceedings of the Regional Technical Meeting on Seed Policy and Programmes in the Near East and North Africa held in Larnaca Cyprus from 27 June to 2 July 1999 The meeting was organised by the Agricultural Research Institute in Nicosia Cyprus in collaboration with the Seed and Plant Genetic Resources Service of the FAO In line with the Rome Declaration on World Food Security and the World Food Summit Plan of Action the meeting recognised that one of the major challenges facing most countries in the Near East and North Africa is the need to invest significant resources in strengthening their capacity to increase the availability of good quality seeds of a wider range of plant varieties This will contribute to the maximisation of both agrobiodiversity and productivity in order to achieve national food security while reducing environmental degradation and the depletion of natural resources The meeting proposed and agreed to establish a Regional Consultative Forum on Seed Policy and Programmes for the Near East and Africa CFS NENA The forum will facilitate intercountry scientific and technical co operation on seed production and supply and promote crop genetic resources evaluation conservation and utilisation in the region **Science Under Attack** Ralph B. Alexander,2018-12-01 Evidence and logic are lacking in many areas of public debate today on hot button issues ranging from dietary fat to vaccination In Science Under Attack Dr Alexander shows how science is being abused sidelined or ignored making it difficult or impossible for the public to form a reasoned opinion about important issues Readers will learn why science is becoming more corrupt and also how it is being abused for political and economic gain support of activism or the propping up of religious beliefs To illustrate how science is being ignored and abused the author examines six different issues and the way they are currently discussed evolution dietary fat climate change

vaccination GMO crops and continental drift In his research he has gone back to the original source wherever possible rather than quoting second hand sources adding a degree of accuracy and nuance often missing The controversial assertion that science does not support the conventional wisdom on climate change should be of particular interest Alexander shows that the scientific evidence for a substantial human contribution to climate change is actually flimsy and he demonstrates the fallacy of comparing the strong link between smoking and lung cancer to the much weaker connection between human activity and global warming

*The Mississippi Valley in the Civil War* John Fiske,1900 Although often over shadowed in Civil War literature by accounts of the Army of the Potomac s

struggles against Robert E Lee in Virginia and the bold Confederate invasion of the Maryland and Pennsylvania the Western theatre of the Civil War was the scene of some of the most desperate hard fought and strategically important battles of the five year conflict John Fiske s eloquent narrative begins with the seizure of the secessionist arsenal at Camp Jackson in St Louis MO and follows the Union Army through its campaign to control the Mississippi River and its subsequent actions in Georgia and Tennessee The text draws heavily on remembrances and personal journals of Generals Ulysses S Grant and William Tecumseh Sherman and examines in painstaking detail not just events on the field of battle but the logistical considerations and political maneuvering that helped shape these campaigns The result is a fascinating informative and engrossing account of the turning of the Confederacy s left flank and the resulting defeat of the Army of the Rebellion
