Rural Development John Harriss, 2023-08-18 Originally published in 1982 this book provides an important set of basic materials for students of rural development Key papers have been chosen and arranged and the editor has provided a general introduction and passages that link the papers alerting the student to rival theoretical interpretations and to regional parallels and contrasts The book provides a basis for the analysis of the processes that make rural societies and economies what they are and substantially determine the changes that take place within them The papers help the reader to understand the nature of the phenomena with which rural development has to deal and in doing so to begin to evaluate the interventions of agencies and planners

Exploring Agrodiversity Harold Brookfield, 2001-05-07 Small farmers are often viewed as engaging in wasteful practices that wreak ecological havoc Exploring Agrodiversity sets the record straight Small farmers are in fact ingenious and inventive and engage in a diverse range of land management strategies many of them resourcefully geared toward conserving resources especially soil They have shown considerable resilience in the face of major onslaughts against their way of life by outsiders and government Using case studies from Africa Asia Latin America and the Pacific this book provides in depth analysis of agricultural diversity and explores its history The book also considers the effect of the gene revolution on small farmers and reviews the effects of the green revolution in Asian countries In conclusion it questions whether the diverse agricultural practices employed by small farmers can survive modern pressures and the global ambitions of the biotechnology industry *Nature and Impact of the Green Revolution in Bangladesh* Mahabub Hossain, 1988

Technological progress and growth of crop production a macro picture Nature of alternative rice technologies Productivity and efficiency of resource use Farm size tenancy and adoption of modern technology Labor market and employment effects of modern technology Linkage effects of agricultural growth Effect on income distribution and poverty The Morality of Everyday Life Thomas Fleming, 2004 Fleming offers an alternative to enlightened liberalism where moral and political

problems are looked at from an objective point of view and a decision made from a distant perspective that is both rational and universally applied to all comparable cases He instead places importance on the particular the local and moral complexity advocating a return to premodern traditions for a solution to ethical predicaments In his view liberalism and postmodernism ignore the fact that human beings by their very nature refuse to live in a world of abstractions where the attachments of friends neighbors family and country make no difference Fleming believes that a modern type of casuistry should be applied to moral conflicts using examples from history literature and religion to explain this moral ecology that refuses to divorce organisms from their interactions with each other and with their environment

The Darker Nations Vijay Prashad,2022-08-30 The landmark alternative history of the Cold War from the perspective of the Global South reissued in paperback with a new introduction by the author In this award winning investigation into the overlooked history of the Third World with a new preface by the author for its fifteenth anniversary internationally renowned historian Vijay Prashad conjures what Publishers Weekly calls a vital assertion of an alternative future The Darker Nations praised by critics as a welcome antidote to apologists for empire has defined for a generation of scholars activists and dreamers what it is to imagine a more just international order and continues to offer lessons for the radical political projects of today With the disastrous U S withdrawal from Afghanistan and the rise of India and China on the global scene this paradigm shifting book of groundbreaking scholarship helps us envision the future of the Global South by restoring to memory the vibrant though flawed idea of the Third World whose demise Prashad ultimately argues has produced an impoverished and asymmetrical international political arena No other book on the Third World as a utopian idea and a global movement can speak so effectively and engagingly to our troubled times

Theatres of Accumulation Warwick Armstrong,T.G.

McGee,2013-06-17 In the great cities of Latin America and Asia international business and local firms meet and in particular influence the development strategies of Third World countries The authors of *Theatres of Accumulation* argue that these cities play a crucial role in the process of capital accumulation and of unequal exchange and dependency They examine the twin patterns of convergence and divergence in lifestyles and economic activities and show how the flow of capital through the urban system brings net losses to the rural regions and further exacerbates income inequalities between regions and classes *Theatres of accumulation* provides an overview of urbanization in the Third World as well as specific case studies It deals with theoretical issues and projects the likely developments in urbanization in the future Armstrong and McGee's work is essential reading for social science and planning professionals and students in the developed world and the Third World who are concerned with urban processes This book was first published in 1985 *The Political Economy of Soil Erosion in Developing Countries* Piers Blaikie,2016-05-20 First published in 1985 This book examines wide variety of ways in which environmental deterioration in particular soil erosion can be viewed and the implicit political judgements that often inform them Using the context of developing countries where the effects tend to be more acute due to underdevelopment and climatic factors this work aims to examine this source of uncertainty and make explicit the underlying assumptions in the debate about soil erosion It also rejects the notion that soil erosion is a politically neutral issue and argues that conservation requires fundamental social change This title will be of interest to students of environmental and developmental studies

Pingali,Mahabub Hossain,1998 *Seeds of plenty, seeds of want* Andrew Chernocke Pearse,1984 **T  S, the Times Literary Supplement** ,1980 *Credit Between Cultures* Parker Shipton,2010-06-22 Parker Shipton offers a range of perspectives on the process of lending borrowing in Africa His conclusions challenge the conventional wisdom of the past half century about the need for credit among African farmers

Agrarian Crossings Tore C. Olsson,2020-11-03 In the 1930s and 1940s rural reformers in the United States and Mexico waged unprecedented campaigns to remake their countrysides in the name of agrarian justice and agricultural productivity *Agrarian Crossings* tells the story of how these campaigns were conducted in dialogue with one another as reformers in each nation came to exchange models plans and strategies with their equivalents across the border Dismantling the artificial boundaries that can divide American and Latin American history Tore Olsson shows how the agrarian histories of both regions share far more than we realize He traces the connections between the US South and the plantation zones of Mexico places that suffered parallel problems of environmental decline rural poverty and gross inequities in land tenure Bringing this tumultuous era vividly to life he describes how Roosevelt's New Deal drew on Mexican revolutionary agrarianism to shape its program for the rural South Olsson also looks at how the US South served as the domestic laboratory for the Rockefeller Foundation's green revolution in Mexico which would become the most important Third World development campaign of the twentieth century and how the Mexican government attempted to replicate the hydraulic development of the

Tennessee Valley Authority after World War II Rather than a comparative history Agrarian Crossings is an innovative history of comparisons and the ways they affected policy moved people and reshaped the landscape
