Saints, Cure-seekers and Miraculous Healing in Twelfth-century England Ruth J. Salter, 2021 The cults of the saints were central to the medieval Church These holy men and women acted as patrons and protectors to the religious communities who housed their relics and to the devotees who requested their assistance in petitioning God for a miracle Among the collections of posthumous miracle stories miracula accounts of holy healing feature prominently and depict cure seekers successfully securing their desired remedy for a range of ailments and afflictions What can these miracle accounts tell us of the cure seekers experiences of their journey from ill health to recovery and how was healthcare presented in these sources This book undertakes an in depth study of the miraculous cure seeking process through the lens of Latin miracle accounts produced in twelfth century England a time both when saints cults particularly flourished and there was an increasing transmission and dissemination of classical and Arabic medical works Focused on shorter miracula with a predominantly localised focus and thus on a select group of cure seekers it brings together studies of healthcare and pilgrimage to look at an alternative to medical intervention and the practicalities and processes of securing saintly assistance
