The Enlightenment Norman Hampson, 1990-06-28 Armed with the insights of the scientific revolution the men of the Enlightenment set out to free mankind from its age old cocoon of pessimism and superstition and establish a more reasonable world of experiment and progress Yet by the 1760s this optimism about man and society had almost evaporated In the works of Rousseau Kant and Goethe there was discernible a new inner voice and an awareness of individual uniqueness which had eluded their more self confident predecessors The stage was set for the revolutionary crisis and the rise of Romanticism In this book Norman Hampson follows through certain dominant themes in the Enlightenment and describes the contemporary social and political climate in which ideas could travel from the salons of Paris to the court of Catherine the Great but less easily from a master to his servant On such vexed issues as the role of ideas in the rise of the middle class he provides a new and realistic approach linking intellectual and social history **British Books in Print**
