Model Shipwright Bowen J Staff, 1984-09 **Catalogue of Ship Models and Marine Engineering in the South Kensington Museum** South Kensington Museum, 1889 *The Master Shipwright's Secrets* Richard Endsor, 2020-03-05

AWARDED THE ANDERSON MEDAL 2020 This splendid book will appeal to maritime historians archaeologists model makers and nautical enthusiasts across the board Colin Martin The Nautical Archaeology Society A remarkable piece of work J D Davies Historian and Author Inspired by the recent discovery of mathematically calculated digital plans for a fourth rate ship by the Deptford master shipwright John Shish *The Master Shipwright's Secrets* is an illustrated history of Restoration shipbuilding focused on the Tyger one of the smaller but powerful two deck warships of the period It examines the proceedings of King Charles II in deciding the types of ship he wanted and his relationship with his master shipwrights This fascinating book reveals the many secrets of Charles II's shipwrights through an analysis of John Shish's plans for the Tyger revealing innovative practical calculations which differ significantly from the few contemporary treatises on the subject and the complicated process of constructing the moulds necessary to make the ship's frame All the other duties performed by the master shipwrights such as repairing ships controlling their men and keeping up with the latest inventions are also discussed in detail *The Master Shipwright's Secrets* is replete with beautiful and detailed illustrations of the construction of the Tyger and explores both its complicated history and its complex rebuilding complete with deck plans internal sections and large scale external shaded drawings The title also explores associated ships including another fourth rate ship the Mordaunt which was purchased into the Navy at the time and underwent a dimensional survey by John Shish A rare contemporary section drawing of another fourth rate English ship and constructional drawings of Shish's later fourth rate ship St Albans are also included

Ships and the Sea Willard V. Anderson, 1954 *The Ship Builder's Assistant, Or, Marine Architecture ... Illustrated, Etc* William Sutherland (Shipwright.), 1840 ***Balchen's Victory*** Alan Smith, 2023-01-04 This is the story of Admiral Sir John Balchen his life and career and HMS Victory the largest finest ship of the line in the Royal Navy at the time which he commanded when both were lost along with more than 1 000 crew in an October storm in the English Channel in 1744 This is not the Victory of Trafalgar fame however but the First Rate built some thirty years earlier the last Royal Navy three decker to carry bronze cannons and a ship whose poor design may well have contributed to her loss It is also the story of Admiral John Balchen a courageous if not heroic naval officer who saw major engagements and whose legacy in naval development deserves greater recognition Indeed the story of both the ship and her commander their individual and remarkably parallel lives can now be revealed as fundamental catalysts to the revolutionary reforms in naval shipbuilding design and dockyard administration that transformed the Royal Navy after 1745 They were indeed major foundation stones for a navy that delivered the glorious achievements of Nelson Anson Howe Hood Rodney Boscawen and many more in the great pantheon of British naval history that followed their loss The exciting discovery of the wreck of HMS Victory in 2008

the subsequent and continuing public and political wrangling over possible salvage and the 2019 display at Portsmouth of a mighty 42 pounder bronze gun retrieved from the wreck have been the catalyst for this history of the admiral and his ship and anyone with an interest in naval or maritime history whether academic or popular will be fascinated by the facts about the hitherto virtually unknown predecessor of Nelson's great flagship This glorious man and ship odyssey whose intrinsic importance to naval history can now be recognised is richly and compellingly told in this important new book **Young Ship-Builders** Elijah Kellogg, 2023-03-19 Reprint of the original first published in 1871 The publishing house Anatiposi publishes historical books as reprints Due to their age these books may have missing pages or inferior quality Our aim is to preserve these books and make them available to the public so that they do not get lost *Mycenaean Greece and the Aegean World* Margaretha Kramer-Hajos, 2016-08-15 In this book Kramer Hajos examines the Euboean Gulf region in Central Greece to explain its flourishing during the post palatial period Providing a social and political history of the region in the Late Bronze Age she focuses on the interactions between this provincial coastal area and the core areas where the Mycenaean palaces were located Drawing on network and agency theory two current and highly effective methodologies in prehistoric Mediterranean archaeology Kramer Hajos argues that the Euboean Gulf region thrived when it was part of a decentralized coastal and maritime network and declined when it was incorporated in a highly centralized mainland looking network Her research and analysis contributes new insights to our understanding of the mechanics and complexity of the Bronze Age Aegean collapse **Chatham Dockyard, 1815-1865** Philip MacDougall, 2020-11-25 By the end of the Napoleonic Wars the seven home dockyards of the British Royal Navy employed a workforce of nearly 16 000 men and some women On account of their size dockyards add much to our understanding of developing social processes as they pioneered systems of recruitment training and supervision of large scale workforces From 1815 1865 the make up of those workforces changed with metal working skills replacing wood working skills as dockyards fully harnessed the use of steam and made the conversion from constructing ships of timber to those of iron The impact on industrial relations and on the environment of the yards was enormous Concentrating on the yard at Chatham the book examines how the day to day running of a major centre of industrial production changed during this period of transition The Admiralty decision to build at Chatham the Achilles the first iron ship to be constructed in a royal dockyard placed that yard at the forefront of technological change Had Chatham failed to complete the task satisfactorily the future of the royal dockyards might have been very different
