Modelling Welfare State Reform:

Modelling Welfare State Reform G.M.M. Gelauff,J.J. Graafland,2014-06-28 In order to analyze the economic effects of various policy proposals for reforming the welfare state a model has been developed called MIMIC The structure of this model is presented in the first part of this book The model combines various modern labour market theories with a detailed description of relevant labour market institutions in an applied general equilibrium context The second part of the volume contains an elaborate presentation of the simulation results of MIMIC such as various tax policies a reduction in benefits or the official minimum wage individualization of the tax and social security system and the introduction of negative income tax The model has proved to be a unique instrument for policy evaluation for the Netherlands **Handbook on Welfare State**

Reform Bernhard Ebbinghaus,Maira Nelson,2025-08-11 This comprehensive Handbook examines the capacity of advanced welfare states to adapt to sustained pressures and unforeseen crises It explores the enduring relevance of established frameworks in explaining welfare state change as well as their effectiveness in addressing essential areas for reform

Citizenship and Welfare State Reform in Europe Jet Bussemaker,2003-12-16 This volume analyses citizenship in relation to recent changes in European welfare states It examines concrete changes in social rights and citizenship roles and offers normative investigations of citizenship **The Electoral Consequences of Third Way Welfare State Reforms** Christoph Arndt,2025-10-01 In all advanced Western nations policy makers have implemented encompassing welfare state reforms in recent decades breaking with past welfare arrangements In particular social democracy engaged in significant policy change under the Third Way paradigm and broke with its traditional reputation on welfare that had built the ties with the core constituency in the 20th century The Electoral Consequences of Third Way Welfare State Reforms Social Democracy's Transformation and its Political Costs provides a comparative study of the electoral consequences of Third Way welfare state reforms The book demonstrates that Third Way reforms went against the social policy preferences of social democracy's core voters and indeed produced an electoral setback for social democrats at the ballots Moreover and accounting for cross national variation the analysis shows that the nature of the setback is contingent on the electoral system and the party competition social democrats face when reforming the welfare state **The Sovereign Debt Crisis, the EU and Welfare**

State Reform Caroline De La Porte,Elke Heins,2016-08-09 This book offers a much needed analysis of how the European Union EU has affected welfare state reforms in the Member States most severely hit by the 2008 economic crisis Bringing together leading European social policy researchers it shows that the EU's responses to the sovereign debt crisis have changed the nature of EU intervention into domestic welfare states with an enhanced focus on fiscal consolidation increased surveillance and enforcement of EU measures The authors demonstrate how this represents an unprecedented degree of EU involvement in domestic social and labour market policies Readers will also discover how greater demands to attain balanced budgets have been institutionalized leading to tensions with the EU's social investment strategy This highly informative

edited collection will engage students social policy practitioners and researchers scholars of the welfare state and political scientists

Six Countries, Six Reform Models: The Healthcare Reform Experience Of Israel, The Netherlands, New Zealand, Singapore, Switzerland And Taiwan - Healthcare Reforms "Under The Radar Screen" Kieke G Okma, Iva Bolgiani, Tim Tenbenschel, Toni Ashton, Hans Maarse, Meng-kin Lim, Luca Crivelli, David Chinitz, Tsung-mei Cheng, Rachel Meislin, 2009-12-23 This book presents the healthcare reform experiences of six small to mid sized but dynamic economies spanning the Asia Pacific the Middle East and Europe Usually not given serious consideration in major international comparisons because of their small size each in fact provides a fascinating case study that illuminates the understanding of the dynamics of healthcare reform Although dissimilar in historical and cultural backgrounds they share some important features all faced very similar pressures for change in the 1970s and 1980s all considered a very similar range of policy options and all did not only discuss but actually implemented fundamental changes in their healthcare funding organization contracting and governance structures with strikingly different outcomes All of the authors have lived and worked in one or more of the countries studied in this volume The analytic frameworks they use reflect their broad range of professional and disciplinary backgrounds in health economics and political science Beyond mere descriptions of reform processes and superficial analyses based on aggregate data from the usual OECD or WHO sources they seek to understand and explain the variations in country experiences by examining the politico socio economic factors driving health reform as seen through the respective country lenses In coming together in this unique international collaboration they make an important contribution to the growing field of international comparative health policy studies Contributors Tsung Mei Cheng Princeton University USA David Chinitz The Hebrew University of Jerusalem Israel Luca Crivelli and Iva Bolgiani University of Lugano Switzerland Meng Kin Lim National University of Singapore Singapore Kieke G H Okma and Hans Maarse Maastricht University The Netherlands Toni Ashton and Tim Tenbenschel University of Auckland New Zealand

European Social Models from Crisis to Crisis Jon Erik Dølvik, Andrew Martin, 2015 This book analyzes the interaction of European social models the institutions structuring labor markets supply side and their turbulent macroeconomic environment from the deep Europe wide recession ending Germanys post unification boom through monetary union s establishment to the Great Recession following the recent financial crisis The analysis reaches two conclusions challenging the dominant view that the social models caused unemployment by impairing labor markets efficiency in the name of equity First the social models employment and distributive effects are far outweighed by their macroeconomic environment especially in the Eurozone where its truncated structure of economic governance transformed the Great Recession into a sovereign debt crisis Second instead of a trade off between efficiency and equity the employment effects of counteracting markets tendency to generate inequality depends on the macroeconomic conditions under which it occurs and how it is done

Econometric Business Cycle Research Jan Jacobs, 2012-12-06 Econometric Business Cycle Research deals with econometric business cycle research EBCR a term

introduced by the Nobel laureate Jan Tinbergen for his econometric method of testing economic business cycle theories EBCR combines economic theory and measurement in the study of business cycles i.e. ups and downs in overall economic activity We assess four methods of EBCR business cycle indicators simultaneous equations models vector autoregressive systems and real business indicators After a sketch of the history of the methods we investigate whether the methods meet the goals of EBCR the three traditional ones description forecasting and policy evaluation and the one Tinbergen introduced the implementation testing of business cycles The first three EBCR methods are illustrated for the Netherlands a typical example of a small open economy The main conclusion of the book is that simultaneous equation models are the best vehicle for EBCR if all its goals are to be attained simultaneously This conclusion is based on a fairly detailed assessment of the methods and is not overturned in the empirical illustrations The main conclusion does not imply the end of other EBCR methods Not all goals have to be met with a single vehicle other methods might serve the purpose equally well or even better For example if one is interested in business cycle forecasts one might prefer a business cycle indicator or vector autoregressive system A second conclusion is that many ideas concepts that play an important role in current discussions about econometric methodology in general and EBCR in particular were put forward in the 1930s and 1940s A third conclusion is that it is difficult if not impossible to compare the outcomes of RBC models to outcomes of the other three methods because RBC modellers are not interested in modelling business cycles on an observation per observation basis A more general conclusion in this respect is that methods should adopt the same concept of business cycles to make them comparable

Changing Models of Capitalism in Europe and the U.S. Richard Deeg, Gregory Jackson, 2016-04-14 The volume analyzes the long term trajectories of change in the capitalist models of the UK Germany Sweden France Italy Hungary Slovakia and the United States The case studies identify critical junctures and key periods of change in order to show how institutions are shaped by different sets of socio political compromises and public policy The case studies follow a common methodology comparing change and linkages across six core institutional domains thus facilitating a comparative understanding of the patterns and drivers of institutional change as well as how liberalisation impacts countries in similar and dissimilar ways The historical perspective of the cases highlights the transformative effects of relatively slow and incremental changes These case studies also make an innovative contribution to examining the linkages between four levels of institutions that regulate the economy the international macro national meso and micro The volume reveals both a common trend toward more liberal forms of capitalism but also variations on this overarching trajectory Markets themselves create their own dynamics which have varied effects on firms and other economic actors in historically diverse institutional contexts This book was originally published as a special issue of the Journal of European Public Policy
