Models In Archaeology:

Models in Archaeology David L. Clarke, 2014-10-24 This major study reflects the increasing significance of careful model formation and testing in those academic subjects that are struggling from intuitive and aesthetic obscurantism toward a more disciplined and integrated approach to their fields of study The twenty six original contributions represent the carefully selected work of progressive archaeologists around the world covering the use of models on archaeological material of all kinds and from all periods from Palaeolithic to Medieval Their common theme is archaeological generalisation by means of explicit model building testing modification and reapplication The contributors seek to show that it is the use of certain models in particular ways that defines archaeology as the practice of one discipline with a set of general tenets that are as applicable in Peru as in Persia Australia as Alaska Sweden as Scotland on material from the second millennium B C to the second millennium A D They assert that careful model formulation within archaeology and the cautious exchange and testing of models within and beyond the discipline provides the only route to the formation of the common internationally valid body of theory which defines a vigorous and coherent discipline and distinguishes it from being a collection of merely regionally applicable special cases

Nonlinear Models for Archaeology and Anthropology William W. Baden, 2016-12-05 The dominant social theory used by archaeologists has tended to focus on either small scale agency or large scale cultural patterns and processes of change The authors of this volume argue that archaeologists should use nonlinear models to more accurately model the connections between scales of analysis and show how micro scale variation can lead to macro scale cultural change This work examines the applications of nonlinear systems models within archaeology and evaluates the range of approaches currently encompassed within Complexity Theory

Cognitive Models in Palaeolithic Archaeology Thomas Grant Wynn, Frederick Lawrence Coolidge, 2017 Cognitive Models in Palaeolithic Archaeology grew out of a specialized thematic session that we organized for the 2013 meeting of the European Society for the Study of Human Evolution Preface

Handbook of Archaeological Sciences A. Mark Pollard, Ruth Ann Armitage, Cheryl A. Makarewicz, 2023-02-09

HANDBOOK OF ARCHAEOLOGICAL SCIENCES A modern and comprehensive introduction to methods and techniques in archaeology In the newly revised Second Edition of the Handbook of Archaeological Sciences a team of more than 100 researchers delivers a comprehensive and accessible overview of modern methods used in the archaeological sciences The book covers all relevant approaches to obtaining and analyzing archaeological data including dating methods quaternary paleoenvironments human bioarchaeology biomolecular archaeology and archaeogenetics resource exploitation archaeological prospection and assessing the decay and conservation of specimens Overview chapters introduce readers to the relevance of each area followed by contributions from leading experts that provide detailed technical knowledge and application examples Readers will also find A thorough introduction to human bioarchaeology including hominin evolution and paleopathology The use of biomolecular analysis to characterize past environments Novel approaches to the analysis of archaeological materials that shed new light on early human lifestyles and societies In depth explorations of the statistical and computational methods relevant to archaeology Perfect for graduate and advanced undergraduate students of archaeology the Handbook of Archaeological Sciences will also earn a prominent place in the libraries of researchers and professionals with an interest in the geological biological and genetic basis of archaeological studies **Geoarchaeology**

Carlos Cordova, 2018-08-30 Geoarchaeology is traditionally concerned with reconstructing the environmental aspects of past societies using the methods of the earth sciences The field has been steadily enriched by scholars from a diversity of disciplines and much has happened as the importance of global perspectives on environmental change has emerged Carlos Cordova provides a fully up to date account of geoarchaeology that reflects the important changes that have occurred in the past four decades Innovative features include the development of the human ecological approach and the impact of technology on this approach how the diversity of disciplines contributes to archaeological questions frontiers of archaeology in the deep past particularly the Anthropocene the geoarchaeology of the contemporary past the emerging field of ethno geoarchaeology the role of geoarchaeology in global environmental crises and climate change **Analytical Archaeology**

David L. Clarke, 2014-10-24 This study was well established as a pioneer work on archaeological methodology the theoretical basis of all archaeological analysis whatever the period or era The first edition of the book presented and evaluated the

radical changes in methodology which derived from developments in other disciplines such as cybernetics computer science and geography during the 1950s and 60s It argued that archaeology was a coherent discipline with its own methods and procedures and attempted to define the entities attributes artefacts types assemblages cultures and culture groups rigorously and consistently so that they could be applied to archaeological data The later edition continued the same general theory which is unparalleled in its scope and depth adding notes to help understanding of the advances in method and theory to support the student and professional archaeologist Review of the original publication One might venture that this is the most important archaeological work for twenty or thirty years and it will undoubtedly influence several future generations of archaeologists The Times Literary Supplement

Thinking through Archaeological Complexity Stefani A. Crabtree, 2025-10-31 Thinking Through Archaeological Complexity explores how archaeologists can engage with complex adaptive systems examining dynamic interactions between humans and environments across space and through time It offers a roadmap for integrating theory method and data through a complexity science lens This volume bridges archaeology and complexity science offering a transdisciplinary framework for understanding long term socio ecological dynamics It provides a substantive overview of how complex adaptive systems science is used in archaeology Drawing from case studies in the Ancestral Pueblo Southwest it demonstrates how tools like agent based modeling ecological and social network analysis and settlement scaling reveal emergent patterns in the archaeological record The book critically examines concepts such as resilience adaptation innovation and transformation offering alternatives to overly linear narratives Emphasizing methodological transparency it provides practical guidance for scholars interested in modeling data integration and working across disciplinary boundaries while grounding in theoretical pluralism By situating archaeological knowledge within broader scientific conversations the book encourages readers to reimagine the past not as static or collapsed but as complex entangled and instructive for contemporary challenges This book is essential reading for students researchers and practitioners in archaeology as well as complexity science It will also appeal to scholars in anthropology environmental studies geography and network science interested in long term human environmental dynamics and the application of complex systems approaches in historical contexts
