Griffin** Henry Austin Dobson, 1897 How New York Became American, 1890-1924 Art M. Blake, 2006-04-20 Originally published in 2006 For many Americans at the turn of the twentieth century and into the 1920s the city of New York conjured dark images of crime poverty and the desperation of crowded immigrants In How New York Became American 1890 1924 Art M Blake explores how advertising professionals and savvy business leaders reinvented the city creating a brand image of New York that capitalized on the trend toward pleasure travel Blake examines the ways in which these early boosters built on the attention drawn to the city and its exotic populations to craft an image of New York City as America writ urban a place where the arts flourished diverse peoples lived together boisterously but peacefully and where one could enjoy a visit Drawing on a wide range of textual and visual primary sources Blake guides the reader through New York s many civic identities from the first generation of New York skyscrapers and their role in Americanizing the city to

Germany and the Modern World, 1880-1914 Mark Hewitson, 2018-07-05 The German Empire before 1914 had the fastest growing economy in Europe and was the strongest military power in the world Yet it appeared from a reading of many contemporaries accounts to be lagging behind other nation states and to be losing the race to divide up the rest of the globe This book is an ambitious re assessment of how Wilhelmine Germans conceived of themselves and the German Empire's place in the world in the lead up to the First World War Mark Hewitson re examines the varying forms of national identification allegiance and politics following the creation and consolidation of a German nation state in light of contemporary debates about modernity race industrialization colonialism and military power Despite the new claims being made for the importance of empire to Germany's development he reveals that the majority of transnational networks and contemporaries interactions and horizons remained intra European or transatlantic rather than truly global

Roman Law in the Modern World: Subject-guides to the texts of Roman law, to the modern codes and legal literature index to vols. I-III Charles Phineas Sherman,1917

Plague Image and Imagination from Medieval to Modern Times Christos Lynteris,2021-07-29 This edited collection brings together new research by world leading historians and anthropologists to examine the interaction between images of plague in different temporal and spatial contexts and the imagination of the disease from the Middle Ages to today The chapters in this book illuminate to what extent the image of plague has not simply reflected but also impacted the way in which the disease is experienced in different historical periods The book asks what is the contribution of the entanglement between epidemic image and imagination to the persistence of plague as a category of human suffering across so many centuries in spite of profound shifts in our medical understanding of the disease What is it that makes plague such a visually charismatic subject And why is the medical religious and lay imagination of plague so consistently determined by the visual register In answering these questions this volume takes the study of plague images beyond its usual art historical framework so as to examine them and their relation to the imagination of plague from medical historical visual anthropological and postcolonial perspectives

Russia in the Early Modern World Donald Ostrowski,2022-01-25 A fundamental problem in studying early modern Russian history is determining Russia s historical development in relationship to the rest of the world The focus throughout this book is on the continuity of Russian policies during the early modern period 1450 1800 and that those policies coincided with those of other successful contemporary Eurasian polities The continuities occurred in the midst of constant change but neither one nor the other continuities or changes alone can account for Russia s success Instead Russian rulers from Ivan III to Catherine II with their hub advisors managed to sustain a balance between the two During the early modern period these Russian rulers invited into the country foreign experts to facilitate the transfer of technology and know how mostly from Europe but also from Asia In this respect they were willing to look abroad for solutions to domestic problems Russia looked westward for military weaponry and techniques at the same time it was expanding eastward into the Eurasian heartland The ruling elite and by extension the entire ruling class worked in cooperation with the ruler to implement policies The Church played an active role in supporting the government and in seeking to eliminate opposition to the government
