Modern Art And Scientific Thought:

Modern Art and Scientific Thought John Adkins Richardson, 1971 The author argues that the ideational relationships between the arts and sciences that many critics and historians attest to are delusional He proposes new and surprising theories that encompass Cubism and the logics of Russell Hilbert and Brouwer Seurat and new notions of reality the common ground upon which The Bauhaus Expressionism Nazism and Mannheim's Sociology of Knowledge stand on Cezanne and non Euclidean geometries

Modern Art and Scientific Thought John A. Richardson, 1971

Information Arts Stephen Wilson, 2003-02-28 An introduction to the work and ideas of artists who use and even influence science and technology A new breed of contemporary artist engages science and technology not just to adopt the vocabulary and gizmos but to explore and comment on the content agendas and possibilities Indeed proposes Stephen Wilson the role of the artist is not only to interpret and to spread scientific knowledge but to be an active partner in determining the direction of research Years ago C P Snow wrote about the two cultures of science and the humanities these developments may finally help to change the outlook of those who view science and technology as separate from the general culture In this rich compendium Wilson offers the first comprehensive survey of international artists who incorporate concepts and research from mathematics the physical sciences biology kinetics telecommunications and experimental digital systems such as artificial intelligence and ubiquitous computing In addition to visual documentation and statements by the artists Wilson examines relevant art theoretical writings and explores emerging scientific and technological research likely to be culturally significant in the future He also provides lists of resources including organizations publications conferences museums research centers and Web sites

The Spiritual Dynamic in Modern Art C. Spretnak, 2014-10-22 This book demonstrates that numerous prominent artists in every period of the modern era were expressing spiritual interests when they created celebrated works of art This magisterial overview insightfully reveals the centrality of an often denied and misunderstood element in the cultural history of modern art

Art and Scientific Thought Martin Johnson, Walter John De La Mare, 1944

The Domain of Images James Elkins, 2018-08-06 In the domain of visual images those of fine art form a tiny minority This original and brilliant book calls upon art historians to look beyond their traditional subjects painting drawing photography and printmaking to the vast array of nonart images including those from science technology commerce medicine music and archaeology Such images James Elkins asserts can be as rich and expressive as any canonical painting Using scores of illustrations as examples he proposes a radically new way of thinking about visual analysis one that relies on an object's own internal sense of organization Elkins begins by demonstrating the arbitrariness of current criteria used by art historians for selecting images for study He urges scholars to adopt instead the far broader criteria of the young field of image studies After analyzing the philosophic underpinnings of this interdisciplinary field he surveys the entire range of images from calligraphy to mathematical graphs and abstract painting Throughout Elkins blends philosophic analysis with historical detail to produce a startling new sense of

such basic terms as pictures writing and notation

The Fourth Dimension and Non-Euclidean Geometry in Modern Art, revised edition Linda Dalrymple Henderson, 2018-05-18 The long awaited new edition of a groundbreaking work on the impact of alternative concepts of space on modern art In this groundbreaking study first published in 1983 and unavailable for over a decade Linda Dalrymple Henderson demonstrates that two concepts of space beyond immediate perception the curved spaces of non Euclidean geometry and most important a higher fourth dimension of space were central to the development of modern art The possibility of a spatial fourth dimension suggested that our world might be merely a shadow or section of a higher dimensional existence That iconoclastic idea encouraged radical innovation by a variety of early twentieth century artists ranging from French Cubists Italian Futurists and Marcel Duchamp to Max Weber Kazimir Malevich and the artists of De Stijl and Surrealism In an extensive new Reintroduction Henderson surveys the impact of interest in higher dimensions of space in art and culture from the 1950s to 2000 Although largely eclipsed by relativity theory beginning in the 1920s the spatial fourth dimension experienced a resurgence during the later 1950s and 1960s In a remarkable turn of events it has returned as an important theme in contemporary culture in the wake of the emergence in the 1980s of both string theory in physics with its ten or eleven dimensional universes and computer graphics Henderson demonstrates the importance of this new conception of space for figures ranging from Buckminster Fuller Robert Smithson and the Park Place Gallery group in the 1960s to Tony Robbin and digital architect Marcos Novak

Cézanne's Gravity Carol Armstrong, 2018-11-13 A transformative study freeing the artist from outdated art historical narratives and revealing his work as newly strange again C zanne s Gravity is an ambitious reassessment of the paintings of Paul C zanne 1839 1906 Whereas previous studies have often looked at the artist s work for its influence on his successors and on the development of abstraction Carol Armstrong untethers it from this timeline examining C zanne s painting as a phenomenological and intellectual endeavor Armstrong uses an interdisciplinary approach to analyze C zanne s work pairing the painter with artists and thinkers who came after him including Roger Fry Virginia Woolf Albert Einstein Maurice Merleau Ponty Rainer Maria Rilke R D Laing and Helen Frankenthaler Through these pairings Armstrong addresses diverse subjects that illuminate C zanne s painting from the nonlinear narratives of modernist literature and the ways in which space and time act on objects to color sensation and the schizophrenic mind C zanne s Gravity attends to both the physicality of the artist s works and the weight they bear on the history of art This distinctive study not only invites its readers to view C zanne s paintings with fresh eyes but also offers a new methodology for art historical inquiry outside linear narratives one truly fitting for our time
