Modern Color Modern Architecture Amedee Ozenfant And The Genealogy Of Color In Modern Architecture:

Modern Color/Modern Architecture William W. Braham, 2019-05-29 This title was first published in 2002 This really is a text that will fill a long felt want A key figure in that history is Am d e Ozenfant painter critic and friend of Le Corbusier who in the first half of this century founded a school in London where he conducted experiments and wrote about color in architecture Those experiments have been reconstructed for the book which also includes reprints of his most important articles on the subject This book provides a fascinating survey of this most contemporary topic that will inspire and inform designers and architects Color has often been regarded as the final dressing of a building subject to the vagaries of fashion and left to the client to select There have been a number of studies of polychromy in the architecture of the more distant past particularly in relation to modern conservation practices but there is little or nothing on the architectural color of recent times and especially within Modernism

Color in Art (Second) (World of Art) John Gage, 2023-10-17 A wide ranging and engaging introduction to the place and power of color in life and art by John Gage author of the award winning *Color and Culture* The complex phenomenon of color has received detailed attention from the perspectives of physics chemistry physiology psychology linguistics and philosophy However the people who work most closely with color artists have rarely been canvassed for their opinions on this mysterious subject John Gage sets out to address this omission by focusing on the thoughts and practices of artists *Color in Art* is concerned with the history of color but is not itself a history instead each chapter develops a theme from a different scientific discipline as seen from the viewpoint of such diverse artists such as Vincent van Gogh Wassily Kandinsky Sonia Delaunay Bridget Riley and Clifford Possum Tjapaltjarri Drawing on examples through the ages from ancient times to the present the many topics covered include flags synesthesia theosophy theater design film chromotherapy and chromophobia Featuring a new foreword by art writer Kelly Grovier outlining contemporary developments in the study of color and an updated bibliography this new edition of this classic text offers a wide ranging and engaging introduction to the place and power of color in life and art

Fragile Images Mirjam Rajner, 2019-09-16 In *Fragile Images Jews and Art in Yugoslavia 1918 1945* Mirjam Rajner traces the lives and creativity of seven artists of Jewish origin The artists Mo a Pijade Daniel Kabiljo Adolf Weiller Bora Baruh Daniel Ozmo Ivan Rein and Johanna Lutzer were characterized by multiple and changeable identities nationalist and universalist Zionist and Sephardic communist and cosmopolitan These fluctuating identities found expression in their art as did their wartime fate as refugees camp inmates partisans and survivors A wealth of newly discovered images diaries and letters highlight this little known aspect of Jewish life and art in Yugoslavia illuminating a turbulent era that included integration into a newly founded country the catastrophe of the Holocaust and renewal in its aftermath interview with the author

Electrographic Architecture Carolyn L. Kane, 2023-08-01 Bridging histories of technology media studies and aesthetics *Electrographic Architecture* forges a critical narrative of the ways in which illuminated light and color have played key roles in the formation of America s white

imaginary Carolyn L Kane charts the rise of the country's urban advertisements light empires and neoclassical buildings in the early twentieth century the midcentury construction of polychromatic electrographic spectacles and their eclipse by informatically intense invisible algorithms at the dawn of the new millennium Drawing on archival research interviews and visual analysis Electrographic Architecture shows how the development of America's electrographic surround runs parallel to a new paradigm of power property and possession

The Emergence of the Interior Charles Rice, 2006-11-22 Taking a radical position counter to many previous histories and theories of the interior domesticity and the home The Emergence of the Interior considers how the concept and experience of the domestic interior have been formed from the beginning of the nineteenth century It considers the interior's emergence in relation to the thinking of Walter Benjamin and Sigmund Freud and through case studies in architecture's trajectories toward modernism The book argues that the interior emerged with a sense of doubleness being understood and experienced as both a spatial and an image based condition Incorporating perspectives from architecture critical history and theory and psychoanalysis The Emergence of the Interior will be of interest to academics and students of the history and theory of architecture and design social history and cultural studies

Peformative Architecture Branko Kolarevic, Ali Malkawi, 2005-07-08 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company

Urbanisms of Color Gareth Doherty, 2010 Color is a ubiquitous yet essential part of the city creating and shaping urban form Volume 3 of New Geographies brings together artists and designers anthropologists geographers historians and philosophers with the aim of exploring the potency the interaction and the neglected design possibilities of color at the scale of the city

Inessential Colors Basile Baudez, 2021-12-21 Today architectural plans and drawings are always signposted with colors pink for porch or exterior walls yellow for certain interior elements and blue for details and ornament How and why did this practice begin The craft of architectural drawing plans sections and details was originally developed during the Italian Renaissance under the influence of engravers The results were correspondingly monochromatic relying on representation through line and perspective But in the 1800s an influx of painters turned architects in Holland and Germany brought color into their designs This innovation eventually spread throughout Europe inspiring French architectural engineers to adopt a common color system in order to more clearly communicate their designs across the kingdom and giving architects another tool with which to impress academic juries and the public In this book author Basile Baudez argues that color was not an essential feature of architectural drawing until European architects adopted a precise system of representation in response to political and artistic rivalry between countries as well as the needs of public exhibitions He shows that French engineers learned to use color from the Dutch colleagues they worked with and then fought against during the Dutch War 1672-78 demonstrating that a color based system was published in French manuals for military engineers and used by royal architects and that architects who wanted to compete with paintings for the public's attention needed to use the familiar language of color This history reveals that color came to have three functions to

imitate architectural materials to establish concise representational conventions that could span large geographic distances and to seduce the public including tourists The book will feature a large number of fascinating previously unpublished archival drawings and will contribute to growing interest in the origins and professionalization of architecture as well as the history of drawing as a medium *Rethinking Technology* William W. Braham, Jonathan A. Hale, 2006-12-05 This essential reference for all students of architecture design and the built environment provides a convenient single source for all the key texts in the recent literature on architecture and technology The book contains over fifty carefully selected essays manifestoes reflections and theories by architects and architectural writers from 1900 to 2004 This mapping out of a century of architectural technology reveals the discipline s long and close attention to the experience and effects of new technologies and provides a broad picture of the shift from the age of tools to the age of systems Chronological arrangement and cross referencing of the articles enable both a thematic and historically contextual understanding of the topic and highlight important thematic connections across time With the ever increasing pace of technological change this Reader presents a clear understanding of the context in which it has and does affect architecture **Architectural Publications Index** ,2002
