Lushnat, Air University (U.S.). School of Advanced Air and Space Studies, 2012 Closing with the enemy is a primal instinct somewhat antithetical to the trajectory of technological development which has generally permitted killing at greater distances The mere thought of ramming a several thousand ton ship into another vessel stabbing a blade into the chest of an adversary or achieving the much vaunted air to air guns kill is likely to raise one's heart rate Actually mentioning these words in today's military environment quickly invites heated debate concerning the material and psychological dimensions of warfare This study analyzes the history of the naval ram bayonet and internal gun in fighter aircraft Two periods of time are explored for each technology Costs and benefits are evaluated during the periods of time the technologies were preeminent in combat The technologies are also examined in the aftermath of their fall from primacy Abstract **Modern Air Combat** Bill Gunston, Mike Spick, 1983 Covers the technology of air warfare aircraft and their weapons and air combat tactics **Modern Air Combat** Bill Gunston, 1991 Indhold The Technology of Air Combat The Aircraft and their Weapons Air Combat Tactics **Modern Fighter Aircraft** Anthony M.
