**concept of exploitation** Carl Christian von Weizsäcker, 1972      *Capital Theory and Dynamics* Edwin Burmeister, 1980-11-28 Capital theory and dynamics are cornerstones for almost every branch of economics Except in a fictional world where the economies of yesterday today and tomorrow are identical issues of capital formation and dynamic behaviour must always arise Although the specialist literature is technically demanding Professor Burmeister shows that its important results can be understood and their economic significance grasped by those who do not possess the mathematical literacy required to follow rigorous proofs Even if future events are known with certainty they still influence the current economic state This is the pure role of time That future events are not known with certainty adds another complexity This book focuses mainly on the pure role of time      **Introduction to Modern Austrian Capital Theory** Malte

Faber, 2012-12-06 During the fifties and the sixties the neoclassical concept of the production function was criticized in numerous papers In particular the aggregation of different capital goods into a single number was reprehended A second essential disadvantage namely the neglect of the time structure of the production process found however relatively little attention While up to the thirties the Austrian capital theory which stressed the time aspect of production was an important school it fell into oblivion after the great capital controversies of the thirties It took over thirty years i e till the beginning of the seventies before it came to a renaissance of the Austrian capital theory by various writers We may roughly classify the different attempts of its rebirth in modern economics into three groups 1 The approach of 1970 1973 1973a has received most of the attention in the literature Burmeister 1974 Faber 1975 Fehel 1975 1975 Hagemann and 1976 It will be shown in Chapter 9 that is only in so far a Neo Austrian as he does explicitly take into consideration the vertical time structure of the production process But he does not use the Austrian concepts of superiority of roundabout methods of time preference and of the period of production 2 The latter concept has been revived by the second group to which Tintner 1970 von Weizsäcker 1971a 1971b 1974 1971 1976 and 1973 1975 1976 belong      **Capital Theory** John Eatwell, Murray Milgate, Peter Newman, 1990-07-23 This is an excerpt from the 4 volume dictionary of economics a reference book which aims to define the subject of economics today 1300 subject entries in the complete work cover the broad themes of economic theory This extract concentrates on the topic of capital theory      *Classical Economics and Modern Theory* Heinz D.
