Modern Landscape:

Modern Landscape Architecture Jory Johnson, 1991 Contemporary Urban Landscapes of the Middle East Mohammad Gharipour, 2016-03-17 The Middle East is well known for its historic gardens that have developed over more than two millennia. The role of urban landscape projects in Middle Eastern cities has grown in prominence with a gradual shift in emphasis from gardens for the private sphere to an increasingly public function. The contemporary landscape projects either designed as public plazas or public parks have played a significant role in transferring the modern Middle Eastern cities to a new era and also in transforming to a newly shaped social culture in which the public has a voice. This book considers what ties these projects to their historical context and what regional and local elements and concepts have been used in their design.

Modern Landscape Architecture Marc Treib, 1994-07-25 Twenty-two essays that provide a forum for assessing the tenets, accomplishments, and limits of modernism in landscape architecture and for formulating ideas about possible directions for the future of the discipline. These twenty-two essays provide a rich forum for assessing the tenets, accomplishments, and limits of modernism in landscape architecture and for formulating ideas about possible directions for the future of the discipline. During the 1930s, Garrett Eckbo, Dan Kiley, and James Rose began to integrate modernist architectural ideas into their work and to design a landscape more in accord with the life and sensibilities of their time. Together with Thomas Church, whose gardens provided the setting for California living, they laid the foundations for a modern American landscape design. This first critical assessment of modern landscape architecture brings together seminal articles from the 1930s and 1940s by Eckbo, Kiley, Rose, Fletcher Steele, and Christopher Tunnard and includes contributions by contemporary writers and designers such as Peirce Lewis, Catherine Howett, John Dixon Hunt, Peter Walker, and Martha Schwartz, who examine the historical and cultural framework within which modern landscape designers have worked. There are also essays by Lance Necker, Reuben Rainey, Gregg Bleam, Michael Laurie, and Marc Treib that discuss the designs and legacy of the Americans. Tunnard, Eckbo, Church, Kiley, and Robert Irwin. Dorothy Imbert takes up Pierre Emile Legrain and French modernist gardens of the 1920s, and Thorbjørn Andersson reviews experiments with stylized naturalism developed by Erik Glemme and others in the Stockholm park system.

Inventing American Modernism Jill E. Pearlman, 2007 In this book, Jill Pearlman argues that Gropius did not effect changes alone and further that the Harvard Graduate School of Design was not merely an offshoot of the Bauhaus. She offers a crucial missing piece to the story and to the history of modern architecture by focusing on Joseph Hudnut, the school's dean and founder.

BOOK JACKET **Contemporary Landscapes of Contemplation** Rebecca Krinke, 2005-11-14 Contemplative landscape and contemplative space are familiar terms in the areas of design, landscape architecture, and architecture. Krinke and her highly regarded contributors set out to explore definitions, theories, and case studies of contemplative landscapes. The contributors, Marc Treib, John Beardsley, Michael Singer, Lance Necker, Heinrich Hermann, and Rebecca Krinke, have spent their careers researching, critiquing, and making landscapes.

Here they investigate the role of contemplative space in a post modern world and examine the impact of nature and culture on the design or interpretation of contemplative landscapes The essays drawn from both scholarship and personal experience explore the links between spaces designed to provide health benefits and contemplative space *Sustainable Development - Proceedings Of The 2015 International Conference (Icsd2015)* Liandong Zhu,Ahmed Ouadha,2016-01-28 Since the emergence of climate and global warming onto the international agenda research in sustainability has been underpinned by the development in energy and environmental science Highlighted 30 years ago by the Brundtland Commission sustainable development was defined as meeting the needs of the present without compromising the ability of future generations to meet their own needs This has very much defined the scope and aims of this conference This conference proceedings book contains the selected papers presented in the 2015 International Conference on Sustainable Development ICSD2015 held in September 25 27 2015 in Wuhan Hubei China The conference positions itself as an international forum for researchers all over the world to come together to share and discuss their findings and contributions in all aspects of sustainability including theory methodology and applications covering a wide spectrum of topics and issues The conference proceedings put together a total of 119 papers in sustainable development covering issues in environmental energy and economical aspects of the subjects
