Modern Music And After:

Modern Music and After Paul Griffiths, 2010 Over the course of three decades Modern Music and After has earned its place as the standard work on the processes of musical renewal that began in 1945 It is essential reading for the enquiring listener and is used widely in university and conservatory courses

Music After the Fall Tim Rutherford-Johnson, 2017-02 Music after the Fall is the first book to survey contemporary Western art music within the transformed political cultural and technological environment of the post Cold War era In this book Tim Rutherford Johnson considers musical composition against this changed backdrop placing it in the context of globalization digitization and new media Drawing connections with the other arts in particular visual art and architecture he expands the definition of Western art music to include forms of composition experimental music sound art and crossover work from across the spectrum inside and beyond the concert hall Each chapter is a critical consideration of a wide range of composers performers works and institutions and develops a broad and rich picture of the new music ecosystem from North American string quartets to Lebanese improvisers from electroacoustic music studios in South America to ruined pianos in the Australian outback Rutherford Johnson puts forth a new approach to the study of contemporary music that relies less on taxonomies of style and technique than on the comparison of different responses to common themes of permission fluidity excess and loss

Modern Music and After Paul Griffiths, 2011-02-16 Over three decades Paul Griffiths's survey has remained the definitive study of music since the Second World War this fully revised and updated edition re-establishes Modern Music and After as the preeminent introduction to the music of our time The disruptions of the war and the struggles of the ensuing peace were reflected in the music of the time in Pierre Boulez's radical reformation of compositional technique and in John Cage's development of zen music in Milton Babbitt's settling of the serial system and in Dmitry Shostakovich's unsettling symphonies in Karlheinz Stockhausen's development of electronic music and in Luigi Nono's pursuit of the universally human in Iannis Xenakis's view of music as sounding mathematics and in Luciano Berio's consideration of it as language The initiatives of these composers and their contemporaries opened prospects that haven't yet stopped unfolding This constant expansion of musical thinking since 1945 has left us with no singular history of music Griffiths's study accordingly follows several different paths showing how and why they converge and diverge This new edition of Modern Music and After discusses not only the music of the fifteen years that have passed since the previous edition but also the recent explosion of scholarly interest in the latter half of the twentieth century In particular the book has been expanded to incorporate the variety of responses to the modernist impasse experienced by composers of the 1980s and 1990s Griffiths then moves the book into the twenty first century as he examines such highly influential composers as Helmut Lachenmann and Salvatore Sciarrino For its breadth wealth of detail and characteristic wit and clarity the third edition of Modern Music and After is required reading for the student and the enquiring listener

Modern Music and After Paul Griffiths, 1994-06-01 **Modern Music and After** Paul Griffiths, 1995

The Pleasure of Modernist Music Arved Mark Ashby, 2004 The debate over modernist music has continued for almost a century from Berg's *Wozzeck* and Webern's *Symphony Op 21* to John Cage's renegotiation of musical control the unusual musical practices of the Velvet Underground and Stanley Kubrick's use of Ligeti's *Lux Aeterna* in the epic film *2001* The composers discussed in these pages including Bartók, Stockhausen, Bernard Herrmann, Steve Reich and many others are modernists in that they are defined by their individualism whether covert or overt and share a basic urge toward redesigning musical discourse The aim of this volume is to negotiate a varied and open middle ground between polemical extremes of reception The contributors sketch out the possible significance of a repertory that in past discussions has been deemed either meaningless or beyond describable meaning With an emphasis on recent aesthetics and contexts including film music sexuality metaphor and ideas of a listening grammar they trace the meanings that such works and composers have held for listeners of different kinds None of them takes up the usual mandate of educated listening to modernist works the notion that a person can appreciate difficult music if given enough time and schooling Instead the book defines novel but meaningful avenues of significance for modernist music avenues beyond those deemed appropriate or acceptable by the academy While some contributors offer new listening strategies most interpret the listening premise more loosely as a metaphor for any manner of personal and immediate connection with music In addition to a previously untranslated article by Pierre Boulez the volume contains articles all but one previously unpublished by twelve distinctive and prominent composers music critics and music theorists from America Europe Australia and South Africa Arved Ashby Amy Bauer William Bolcom Jonathan Bernard Judy Lochhead Fred Maus Andrew Mead Greg Sandow Martin Scherzinger Jeremy Tambling Richard Toop and Lloyd Whitesell Arved Ashby is Associate Professor of Music at the Ohio State University

The BBC and Ultra-Modern Music, 1922-1936 Jennifer Ruth Doctor, 1999 This book first published in 2000 examines the BBC's campaign to raise cultural awareness of British mass audiences in the early days of radio As a specific case it focuses on policies and plans behind transmissions of music by composers associated with Arnold Schoenberg's circle between 1922 when the BBC was founded and spring 1936 when Edward Clark a former Schoenberg pupil and central figure in BBC music resigned from the Corporation This study traces and analyses the BBC's attempts to manipulate critical and public responses to this repertory The book investigates three interrelated aspects of early BBC history Policy decisions relating to contemporary music transmissions are examined to determine why precious broadcast time was devoted to this repertory Early personnel structures are reconstructed to investigate the responsibilities attitudes and interests of those who influenced music broadcasting Finally broadcasts of Second Viennese School works are examined in detail

The Science of Sci-Fi Music Andrew May, 2020-06-30 The 20th century saw radical changes in the way serious music is composed and produced including the advent of electronic instruments and novel compositional methods such as serialism and stochastic music Unlike previous artistic revolutions this one took its cues from the world of science Creating electronic sounds in the early days required a

well equipped laboratory and an understanding of acoustic theory Composition became increasingly algorithmic with many composers embracing the mathematics of set theory The result was some of the most intellectually challenging music ever written yet also some of the best known thanks to its rapid assimilation into sci fi movies and TV shows from the electronic scores of Forbidden Planet and Dr Who to the other worldly sounds of 2001 A Space Odyssey This book takes a close look at the science behind science fiction music as well as exploring the way sci fi imagery found its way into the work of musicians like Sun Ra and David Bowie and how music influenced the science fiction writings of Philip K Dick and others

Modern Music and After Paul Griffiths, 2006 This text investigates Western music since the World War II The disruptions of the war were reflected in the music of the time Shostakovich's unsettling symphonies Stockhausen's development of electronic music Xenakis's view of music as sounding mathematics and Berio's consideration of it as language The initiatives of these composers and their contemporaries opened prospects that have continued to unfold

Music After Deleuze Edward Campbell, 2013-11-07 Music After Deleuze explores how Deleuzian concepts offer interesting ways of thinking about a wide range of musics The concepts of difference identity and repetition offer novel approaches to Western art music from Beethoven to Boulez and Bernhard Lang as well as jazz improvisation popular and sacred music The concepts of the rhizome the assemblage and the refrain enable us to think of the specificity of musical works as the meeting of productive forces for example in the contemporary opera of Dusapin and the experimental music theatre of Aperghis The concepts of smooth and striated space form the starting point for musical and political reflections on pitch in Western and Eastern music Deleuze's notion of time as multiple illumines the distinctive conceptions of musical time found in Debussy Messiaen Boulez Carter and Grisey Finally the innovative semiotic theory forged in Deleuze Guattarian philosophy offers valuable insights for a semiotics capable of engaging with the innovative molecular music of Lachenmann Aperghis and Levinas
