Modern Project Management: Software Norman R. Howes, 2001 Modern Project Management Techniques for the Environmental Remediation Industry Timothy J. Havranek, 2017-11-01

Environmental remediation has brought significant improvements to industrial sites and surrounding communities throughout the nation. It has also become notorious for high budget overruns and frequent schedule delays as environmental remediation's technological aspects become subject to political, managerial, and economic concerns. Modern Project Management (MPM) Processes offer a new framework for remediation programs geared to increased efficiency and precise troubleshooting. Environmental consultant and certified project management professional PMP Timothy J. Havranek has helped various companies put MPM into practice; now he brings his techniques to the environmental remediation industry at large. Merging traditional project management structure and advanced strategic planning techniques to the needs of environmental remediation, *Modern Project Management Techniques for the Environmental Remediation Industry* presents this major innovation: a standardized planning process applicable to all types of remediation projects. Every participant in an environmental remediation effort can mutually benefit from *Modern Project Management Techniques for the Environmental Remediation Industry*. Environmental consultants will discover precise budget and schedule planning skills, quite an advantage in their increasingly competitive industry. Customers will also know what to consider when selecting an environmental services company and discover advanced methods for reducing project costs and durations. MPM is bringing new vitality and purpose to environmental protection. Put it into practice with the benefit of Havranek's real-life experience.

The Impact of Information on Modern Humans Elena G. Popkova, 2018-03-06

This book features contributions from various spheres of socio-humanitarian sciences presented at the scientific and practical conference on *Humans as an Object of Study by Modern Science*, which took place in Nizhny Novgorod, Russian Federation, on November 23-24, 2017. The conference was organized by Kozma Minin, Nizhny Novgorod State Pedagogical University, and the non-profit organization Institute of Scientific Communications. Presenting the results of multidisciplinary studies as well as new approaches, the target audience of the book includes postgraduates, lecturers at higher educational establishments, and researchers studying socio-humanitarian sciences. The complex study of humans by representatives of various socio-humanitarian sciences—philosophy, pedagogics, jurisprudence, social sciences, and economics—allows a comprehensive concept of the field to be developed. Selecting humans as an object of research opens wide possibilities for studying various issues related to their activities. While considering humans within multiple sciences means that the methods of induction and deduction can be combined to achieve precise results, this book includes the results of leading scientific studies on the following key issues: establishment of an information economy under the influence of scientific and technical progress; new challenges and opportunities; information and communication technologies as a new vector of development of the modern world economy; specifics and experience of using new information and communication

technologies in developed and developing countries problems of implementing new information and communication technologies in the modern economy and priorities of using new information and communication technologies in the modern economy

Mastering Project Management Integration and Scope Dietmar W. Sokowski, 2015. Mastering Project Management Integration and Scope gives managers powerful insights and tools for addressing the most crucial success factor in any project: completely and accurately defining project objectives and deliverables and transforming your definitions into effective requirements and an integrated project plan. This book is part of a new series of six cutting-edge project management guides for both working practitioners and students. Like all books in this series, it offers deep practical insight into the successful design, management, and control of complex modern projects. Using real case studies and proven applications, expert authors show how multiple functions and disciplines can and must be integrated to achieve a successful outcome. Individually, these books focus on realistic, actionable solutions, not theory. Together, they provide comprehensive guidance for working project managers at all levels, as well as indispensable knowledge for anyone pursuing PMI PMBOK certification or other accreditation in the field.

Practice of Project Management Enzo Frigenti, Dennis Comminos, 2005-12-03. Traditional project management has tended to focus primarily on the processes of managing projects to successful completion. To manage projects from their inception through to actual delivery of the business-enabling objectives, a different project management approach is needed. Project management needs to become part of the business. This book addresses the concepts and issues of business project management. It aims to assist organizations in making the shift from a narrow, strong technical focus on project management to a broader, more business-oriented focus. The Practice of Project Management introduces three basic concepts which underpin the philosophy of the business-oriented approach: Business Focused Project Management (BFPM), which takes an organization-wide view; The Wrappers Model; and Objective Directed Project Management (ODPM), both of which provide the philosophies, processes, concepts, and tools used to enable BFPM.
