Entwistle, 2021-11-03 Since the first edition of Integrative Approaches to Psychology and Christianity was published in 2004 this has become the standard textbook on the topic Now in its fully revised fourth

edition Dr Entwistle's book elucidates historical philosophical and practical issues in the integration of psychology and Christianity. As in previous editions, the current text provides an introduction to many of the worldview issues and philosophical foundations that frame the relationship of psychology and theology. It includes scholarly reflection on the integration literature and surveys six models of possible relationships between psychology and Christianity, ranging from those that are completely opposed to either religion or psychology to intermediate models that assert that some limited interaction between them is possible to viewpoints which suggest that a Christian worldview approach can be used to provide a context for exploring areas of overlapping interest between psychology and Christianity. The current edition considers recent advances in both Catholic and Protestant thinking on integration, including contemporary questions about what evangelicalism is and is not that shape evangelical reactions to the integration debate. New content ranges from information about the contrasting views of Tertullian and Augustine to insights from contemporary psychology about factors that adversely affect the quality and reliability of human thinking to how conflict over COVID 19 has entered contemporary religious debate. The book is designed to help readers become aware of the presuppositional backdrops that each of us brings to these issues. Questions at the end of each chapter are included to help readers evaluate both the material and their own burgeoning approach to integration. This book is ideal as a textbook for students of psychology and other behavioral and social sciences, social work, sociology, theology, counseling, pastoral counseling at both the graduate and undergraduate level. It is also written for the broader readership of psychologists, counselors, pastors, and others who are interested in integration.

*Mirrors of Self* Jonathan P. Badgett, 2021-10-14 Orthodox Christology maintains that Jesus Christ is both truly God and truly human As such he is the key to knowing both God and self In a series of applications of christological anthropology *Mirrors of Self* develops this epistemic premise in dialogue with a diversity of Christian and secular historical and modern perspectives Aspects of human personhood including the ever elusive self gain greater clarity and significance in the light of Christ's person and work At the center of individual human subjectivity we encounter a broken sin blinded self in need of renewal and release What healing we find comes to us as Christ's ecological presence works in and through others the mirrors of self whose instrumental agency Christ employs in service to his own redemptive ends

*The Quest for the Inner Human* Steven H. Propp, 2013-12-03 Psychology means the study of the soul it is the social science concerned with investigating who we are why we have certain feelings and why we do the things we do Are we no more than a vast assembly of nerve cells and their associated molecules Is biology our genetic inheritance destiny or does social upbringing play a crucial role What are the roles played by Nature and by Nurture Are we purely physical beings or is there an aspect that can be called spiritual This thought provoking novel takes you on a journey of intellectual and emotional exploration considering along the way questions that we've all asked ourselves such as Is it true that we only use 10% of our brains Does playing classical music for infants increase their intelligence Do crime rates go up during a full moon Can hypnosis or post hypnotic suggestions make us do something we wouldn't normally do Does subliminal advertising influence us to buy products Are our memories stored indelibly almost like a tape recorder What causes memory lapses as we age Can repressed traumatic memories be recovered through hypnosis Do some people have multiple personalities How can I tell if someone has a neurosis or a psychosis Do men have an inner feminine side and women an inner masculine Are there innate psychological differences between males and females The four main characters in this book will guide you through a diverse and sometimes bewildering world of differing approaches to answering such questions such as Freudian Jungian and Adlerian Humanistic Existential and Transpersonal as well as Cognitive Emotive and Behaviorist Along the way you will learn about the developmental stages proposed by psychologists such as Erikson Kohlberg Piaget and Fowler and even explore some of the questions currently being asked by both neuroscientists and philosophers of the mind Start reading to begin your study of our innermost selves
