**Singapore's Real Estate** Ngee Huat Seek, Tien Foo Sing, Shi Ming Yu, 2016 Singapore's Real Estate 50 Years of Transformation documents the transformation and development of the real estate market in Singapore over the past 50 years. This volume is organised around two major themes and covers issues from the bricks and mortar to the capital markets and from local to international real estate markets. The themes aptly describe how real estate has played an important role in the economic development and growth of Singapore from a third world to a first world country. Written by well renowned experts with deep academic and practical knowledge of the progress of real estate in Singapore, this book highlights the uniqueness of real estate markets and institutions in Singapore which have constantly been replicated and adopted in other markets.

Provided by publisher **An Asian Direct and Indirect Real Estate Investment Analysis** Kim Hin David HO, 2021-05-04

This book is dedicated to real estate scholastic work in advancing the greater understanding of real estate investment analysis. This is because there has been limited research in bringing out clearly the uncertainty or risk which is quantifiable uncertainty in real estate market analysis. Even real estate market research which is carried out as an industry practice among private real estate researches is no exception. Another reason is that it has been widely accepted that while the financial revolution has substantially changed many sectors of the financial industry, it has made little impact on real estate development and investment practice as well as scholastic work. Furthermore, while it is readily acknowledged that despite its huge share in the world, real estate investment discipline and research is on the whole still a poorly researched subject area. As a result, the industry tends to be dominated by traditional real estate analysts with little understanding of real estate market uncertainty and capital markets. These commentators are widely regarded to spend too much time worrying about local space supply and demand conditions while totally losing sight of the everchanging real estate market and capital market conditions. The theme of this book is real estate investment analysis of direct and indirect real which in turn can be appropriately managed under economic theory and the theoretical conceptions of real estate finance provided the uncertainty is quantifiable. The book deploys case studies involving Singapore and Asia. This Black over White background viii framework enables real estate market analysis to attempt what defines the Asian direct and indirect real estate sectors, what is being measured, how it behaves in terms of price and non price factors, how it is structured and how it effectively achieves the objectives of sustainable total returns and manageable real estate market uncertainty. Managing real estate market uncertainty optimally is achieved at the portfolio level through real estate asset allocation. This is important because the real estate portfolio is able to virtually eliminate the unique i.e. specific uncertainties among the various Asian real estate sectors, thus retaining within the portfolio only the systemic i.e. market wide uncertainty. Apart from real estate asset allocation, the alternative and modern approach to risk management at the portfolio level is the value at risk (VaR) approach. Another modern and important alternative to coping with uncertainty is real option analysis and pricing that help to better define real estate

market uncertainty in extent and time Real option analysis and pricing also represent uncertainty via a decision tree and the risk neutral probability conception in order to comprehend how uncertainty impacts on the value of real estate investment decisions The pricing of uncertainty is based on the risk free hedge security conception These are best examined at the micro level of the investment in a real estate development opportunity on vacant land Nevertheless the real estate sectors in Singapore and Asia offer promising prospects since the Asian currency crisis of 1997 It is now timely to take stock and make an assessment of how the sectors would pan out for the future Ill into at least rest the next century I are very pleased to present our thinking and research in international real estate with particular emphasis on Asia The region s vast potential for real estate is itself a large incentive for international real estate research and education that has inspired me to document the significant work I have done over the years Black over White background ix I wish all readers a pleasurable reading of this book and I thank you sincerely for your support without which the publication of this book would be made all the more difficult Dr HO Kim Hin David Honorary Professor University of Hertfordshire UK International Real Estate Public Policy March 2021
