Science in the 18th and 19th Centuries Alison E Martin,Susan Pickford,2025-05-28 This book explores the role of translation in shaping the knowledge sharing processes that were and are seminal to scientific endeavour It considers the mechanisms by which eighteenth and nineteenth century European science writing travelled within and beyond its home continent and non European science was taken up in a colonial context Using insights from fields of research including book history and textual studies to investigate the paratextual framing stylistic choices rhetorical devices and modes of expression deployed by scientific writers key to shaping a work s credibility and its author s integrity it argues that translators are central yet largely overlooked mediators in this creative process Encompassing West Africa China the Middle East India South America Europe and the Ottoman Empire this volume comprises case studies working with around a dozen different languages to gain a sense of how scientific narratives were evolving both within and across an increasingly global intellectual commons in a key period in the development of the natural sciences medicine and technology Part of the Science and Technology Studies series the volume will be indispensable for scholars and researchers of science and technology studies philosophy of science translation studies gender studies English literature and philosophy in general *A Selective Guide to*

Chinese Literature, 1900-1949 Nils Göran David Malmqvist, European Science Foundation, 1988 **Reproductive Realities in Modern China** Sarah Mellors Rodriguez, 2023-01-19 Sarah Mellors Rodriguez explores how ordinary people navigated China's shifting fertility policies before and during the One Child Policy era *The Oxford Handbook of the History of Eugenics* Alison Bashford, Philippa Levine, 2010-09-24 Eugenic thought and practice swept the world from the late nineteenth to the mid twentieth century in a remarkable transnational phenomenon that informed social and scientific policy across the political spectrum from liberal welfare measures in emerging social democratic states to feminist ambitions for birth control to public health campaigns to totalitarian dreams of the perfectibility of man This book dispels for uninitiated readers the automatic and apparently exclusive link between eugenics and the Holocaust the popularity of eugenics in Japan for example comes as a surprise It is the first world history of eugenics and an indispensable core text for both teaching and research in what has become a sprawling but ever more important field *School Library Journal*, 2004 *Science for Governing Japan's Population* Aya Homei, 2022-11-17 Twenty first century Japan is known for the world's most aged population Faced with this challenge Japan has been a pioneer in using science to find ways of managing a declining birth rate Science for Governing Japan's Population considers the question of why these population phenomena have been seen as problematic What roles have population experts played in turning this demographic trend into a government concern Aya Homei examines the medico scientific fields around the notion of population that developed in Japan from the 1860s to the 1960s analyzing the role of the population experts in the government's effort to manage its population She argues that the formation of population sciences in modern Japan had a symbiotic relationship with the development of the neologism population jink and with the transformation of Japan into a modern sovereign power Through this history Homei unpacks assumptions about links between population sovereignty and science This title is also available as Open Access [The Making of Modern Chinese Medicine, 1850-1960](#) Bridie Andrews, 2014-12-20 Medical care in nineteenth century China was spectacularly pluralistic herbalists shamans bone setters midwives priests and a few medical missionaries from the West all competed for patients In the century that followed pressure to reform traditional medicine in China came not only from this small clutch of Westerners but from within the country itself as governments set on modernization aligned themselves against the traditions of the past and individuals saw in the Western system the potential for new wealth and power This book examines the dichotomy between Western and Chinese medicine showing how it has been greatly exaggerated As missionaries went to lengths to make their medicine more acceptable to Chinese patients modernizers of Chinese medicine worked to become more scientific by eradicating superstition and creating modern institutions Andrews challenges the supposed superiority of Western medicine in China while showing how traditional Chinese medicine was deliberately created in the image of a modern scientific practice *The Warfare between Science & Religion* Jeff Hardin, Ronald L. Numbers, Ronald A. Binzley, 2018-10-15 A very welcome volume of essays questioning the presumption of irreconcilable

conflict between science and religion British Journal for the History of Science The conflict thesis the idea that an inevitable irreconcilable conflict exists between science and religion has long been part of the popular imagination The Warfare between Science and Religion assembles a group of distinguished historians who explore the origin of the thesis its reception the responses it drew from various faith traditions and its continued prominence in public discourse Several essays examine the personal circumstances and theological idiosyncrasies of important intellectuals including John William Draper and Andrew Dickson White who through their polemical writings championed the conflict thesis relentlessly Others consider what the thesis meant to different religious communities including evangelicals liberal Protestants Roman Catholics Eastern Orthodox Christians Jews and Muslims Finally essays both historical and sociological explore the place of the conflict thesis in popular culture and intellectual discourse today Based on original research and written in an accessible style the essays in The Warfare between Science and Religion take an interdisciplinary approach to question the historical relationship between science and religion and bring much needed perspective to an often bitter controversy Contributors include Thomas H Aechtner Ronald A Binzley John Hedley Brooke Elaine Howard Ecklund Noah Efron John H Evans Maurice A Finocchiaro Frederick Gregory Bradley J Gundlach Monte Harrell Hampton Jeff Hardin Peter Harrison Bernard Lightman David N Livingstone David Mislin Efthymios Nicolaidis Mark A Noll Ronald L Numbers Lawrence M Principe Jon H Roberts Christopher P Scheitle M Alper Yal inkaya
