International Handbook of Public Management Reform Shaun Goldfinch, Joe Wallis, 2009-01-01 This volume presents a compelling package for anyone interested in public sector reform. It effectively combines a wide range of well researched reviews of national experiences with state of the art thematic chapters in key reform areas such as IT governance, public sector leadership and accountability. The result is a robust, insightful and sometimes sobering series of accounts of the promises and pitfalls of efforts to reform the institutions and practices of public governance around the world. A must read. Paul t Hart, Australian National University. This major Handbook provides a state of the art study of the recent history and future development of international public management reform. Through a careful cross country analysis spanning the last three decades, this timely volume critically evaluates whether countries are converging towards a single public management model. The book goes on to investigate unresolved issues surrounding leadership, government accountability and computer systems failure currently facing reformers. Shaun Goldfinch and Joe Wallis have brought together a number of eminent scholars from across Europe, Asia, North America and Australasia to explore the role of economic ideas, human resources and the state of public management reform in twelve countries. Providing a broad global overview of public management and facilitating a greater understanding of the difficult issue of reform, this book will find widespread appeal amongst academics and postgraduate students of public administration as well as practitioners in the field.

Problems of the Agricultural Development of Less-Favoured Areas in Europe Sam Stuart, 2017-05-03 Problems of the Agricultural Development of Less Favoured Areas in Europe is a collection of papers from a symposium of the United Nations Economic Commission for Europe and Food and Agriculture Organization held in Geneva on May 22-26 1978. This collection of papers covers European countries with areas where agricultural development is limited. This book defines less favored agricultural areas as those places where there is limited agricultural development of different sizes and economic and social importance. These areas are also defined as suffering serious deterioration of the natural environment and of economic and social activities. This book then presents country reports covering problem areas in Austria, Belgium, Czechoslovakia, Finland, France and Germany. In reviewing each of these countries and other countries as well, the text presents each government's objectives concerning the rural areas, the actual strategies and policies pursued by the state, and the problems encountered when implementing these policies. This text also gives the methodologies used in evaluating these programs. This book can prove useful for government officials and ministries dealing with the agricultural sector, heads of volunteer organizations dealing with countryside development, and academicians in political science and developmental planning.
