Modes Of Discourse:

Modes of Discourse Carlota S. Smith, 2003-04-17 In studying discourse the problem for the linguist is to find a fruitful level of analysis Carlota Smith offers a new approach with this study of discourse passages units of several sentences or more She introduces the key idea of the Discourse Mode identifying five modes Narrative Description Report Information Argument These are realized at the level of the passage and cut across genre lines Smith shows that the modes intuitively recognizable as distinct have linguistic correlates that differentiate them She analyzes the properties that distinguish each mode focusing on grammatical rather than lexical information The book also examines linguistically based features that appear in passages of all five modes topic and focus variation in syntactic structure and subjectivity or point of view Operating at the interface of syntax semantics and pragmatics the book will appeal to researchers and graduate students in linguistics stylistics and rhetoric *Modes of Discourse* Cyril Welch, 1996 **The modes of discourse in current composition theory and practice** Kay Annette Gibson Kemp, 1970 **The Language of Literature** Rutger Allan, Michel Buijs, 2007-09-30 This volume is a collection of papers revealing the largely unexplored boundary between linguistic and literary approaches to classical texts Eleven contributions by various scholars discuss a wide range of linguistic and literary aspects of classical texts the narratee in the prologues of Sophocles Trachiniae and of Euripides the chronology in Pindar's Odes the relation between tense aspect and Discourse Modes in Thucydides Xenophon Vergil and Ovid the use of aspect in the Law Code of Gortyn expressions of futurity and the word order of adjectives in Herodotus and finally ancient and modern views on word order Following an interdisciplinary approach all contributions aim at bridging the gap between linguistic and literary study of classical texts **Cybertext Poetics** Markku Eskelinen, 2012-03-08 Equally interested in what is and what could be Cybertext Poetics combines ludology and cybertext theory to solve persistent problems and introduce paradigm changes in the fields of literary theory narratology game studies and digital media The book first integrates theories of print and digital literature within a more comprehensive theory capable of coming to terms with the ever widening media varieties of literary expression and then expands narratology far beyond its current confines resulting in multiple new possibilities for both interactive and non interactive narratives By focusing on a cultural mode of expression that is formally cognitively affectively socially aesthetically ethically and rhetorically different from narratives and stories Cybertext Poetics constructs a ludological basis for comparative game studies shows the importance of game studies to the understanding of digital media and argues for a plurality of transmedial ecologies **The Texture of Being** Kenneth L. Schmitz, 2007-03 Diverse in topics yet unified in purpose this volume brings together Schmitz's penetrating and rich insight into being produced over many years to offer readers a magisterial study from one of the great Christian philosophers of our time **Every Thing Must Go** James Ladyman, Don Ross, David Spurrett, John Collier, 2007-07-05 Every Thing Must Go argues that the only kind of metaphysics that can contribute to objective knowledge is one based specifically on contemporary science as it really is and

not on philosophers a priori intuitions common sense or simplifications of science In addition to showing how recent metaphysics has drifted away from connection with all other serious scholarly inquiry as a result of not heeding this restriction they demonstrate how to build a metaphysics compatible with current fundamental physics ontic structural realism which when combined with their metaphysics of the special sciences rainforest realism can be used to unify physics with the other sciences without reducing these sciences to physics itself Taking science metaphysically seriously Ladyman and Ross argue means that metaphysicians must abandon the picture of the world as composed of self subsistent individual objects and the paradigm of causation as the collision of such objects Every Thing Must Go also assesses the role of information theory and complex systems theory in attempts to explain the relationship between the special sciences and physics treading a middle road between the grand synthesis of thermodynamics and information and eliminativism about information The consequences of the author s metaphysical theory for central issues in the philosophy of science are explored including the implications for the realism vs empiricism debate the role of causation in scientific explanations the nature of causation and laws the status of abstract and virtual objects and the objective reality of natural kinds The Modes of Discourse as Residual Historical Formations Antoinette Patten Hibbard,1993 The Legitimization of Violence David E. Apter,2016-07-27 Violence is a more and more ubiquitous phenomenon While a great deal of attention has been paid to certain aspects terrorism for example it has not been studied as a political phenomenon in and of itself In The Legitimization of Violence eight well known specialists explore various types of violence from ideological to fundamentalist movements within a framework of comparative theory *Humour, Obscenity and Aristophanes* James Robson,2006

Plato, and the Other Companions of Sokrates George Grote,1888 **International Philosophical Quarterly** ,1961

Heidegger and Derrida on Philosophy and Metaphor Giuseppe Stellardi,2000 No Marketing Blurb *The New Wave* James Monaco,1976 Analyse van de Nouvelle Vague een stroming in de Franse film uit de jaren 1960 1970 gezien vanuit Amerikaans standpunt **Modes of Modality** Elisabeth Leiss,Werner Abraham,2014-01-15 The volume aims at a universal definition of modality or illocutionary speaker s perspective force that is strong enough to capture the entire range of different subtypes and varieties of modalities in different languages The central idea is that modality is all pervasive in language This perspective on modality allows for the integration of covert modality as well as peripheral instances of modality in neglected domains such as the modality of insufficiency of attitudinality or neglected domains such as modality and illocutionary force in finite vs nonfinite and factive vs non factive subordinated clauses In most languages modality encompasses modal verbs both in their root and epistemic meanings at least where these languages have the principled distribution between root and epistemic modality in the first place which is one fundamentally restricted in its strict qualitative and quantitative sense to the Germanic languages In addition this volume discusses one other intricate and partially highly mysterious class of modality triggers modal particles as they are sported in the Germanic languages except

for English It is argued in the contributions and the languages discussed in this volume how modal verbs and adverbials next to modal particles are expressed how they are interlinked with contextual factors such as aspect definiteness person verbal factivity and assertivity as opposed to other attitudinal types An essential concept used and argued for is perspectivization a sub concept of possible world semantics Language groups covered in detail and compared are Slavic Germanic and South East Asian The volume will interest researchers in theoretical and applied linguistics typology the semantics pragmatics interface and language philosophy as it is part of a larger project developing an alternative approach to Universal Grammar that is compatible with functionalist approaches *The Writing Teacher's Sourcebook*, 1981 *The Routledge Handbook of Language and Professional Communication* Vijay Bhatia, Stephen Bremner, 2014-02-24 The Routledge Handbook of Language and Professional Communication provides a broad coverage of the key areas where language and professional communication intersect and gives a comprehensive account of the field The four main sections of the Handbook cover Approaches to Professional Communication Practice Acquisition of Professional Competence Views from the Professions This invaluable reference book incorporates not only an historical view of the field but also looks to possible future developments Contributions from international scholars and practitioners focusing on specific issues explore the major approaches to professional communication and bring into focus recent research This is the first handbook of language and professional communication to account for both pedagogic and practitioner perspectives and as such is an essential reference for postgraduate students and those researching and working in the areas of applied linguistics and professional communication

The Verb in Archaic Biblical Poetry Tania Notarius, 2013-07-04 The Verb in Archaic Biblical Poetry A Discursive Typological and Historical Investigation of the Tense System offers a comprehensive analysis of the syntactic semantic pragmatic and discursive properties of the verb in the corpus of archaic biblical poetry The Song of Moses Song of the Sea Song of Deborah Song of David Blessing of Jacob Oracles of Balaam Blessing of Moses and Song of Hannah The approach integrates modern research on tense aspect and modality while also addressing the complicated philological issues in these texts The study presents discursive analysis of biblical poetic texts systemic description of each text s tense system and reconstruction of the archaic verbal tenses as attested in part of the corpus *Narcissism and the Literary Libido* Marshall W. Alcorn Jr., 1997-07-01 What is it that makes language powerful This book uses the psychoanalytic concepts of narcissism and libidinal investment to explain how rhetoric compels us and how it can effect change The works of Joseph Conrad James Baldwin Michael Foucault Jacques Derrida Arthur Miller D H Lawrence Ben Jonson George Orwell and others are the basis of this thoughtful exploration of the relationship between language and subject Bringing together ideas from Freudian post Freudian Lacanian and post structuralist schools Alcorn investigates the power of the text that underlies the reader response approach to literature in a strikingly new way He shows how the production of literary texts begins and ends with narcissistic self love and also shows how the reader s interest in these texts is directed by libidinal investment Psychoanalysts

psychologists and lovers of literature will enjoy Alcorn's diverse and far reaching insights into classic and contemporary writers and thinkers **Oral Narration in Modern French** Janice Carruthers, 2005 Storytelling is a universal human activity and oral narration particularly modern conversational narration such as anecdotes or personal stories has long been fertile ground for linguists working on tense usage across a variety of languages This book introduces performed oral storytelling into the debate using data from traditional and contemporary storytellers in French to explore the narrative tenses attested the discourse pragmatic effects of tense switching the structures deployed at points of temporal sequence as well as broader questions concerning the nature of oral discourse Book Jacket
