Modular Programming Languages Jürg Gutknecht, Wolfgang Weck, 2006-12-31

The circle is closed. The European Modular 2 Conference was originally launched with the goal of increasing the popularity of Modular 2, a programming language created by Niklaus Wirth and his team at ETH Zurich as a successor of Pascal. For more than a decade, the conference has wandered through Europe, passing Bled, Slovenia in 1987; Loughborough, UK in 1990; Ulm, Germany in 1994; and Linz, Austria in 1997. Now, at the beginning of the new millennium, it is back at its roots in Zurich, Switzerland. While traveling through space and time, the conference has mutated. It has widened its scope and changed its name to Joint Modular Languages Conference (JMLC). With an invariant focus though on modular software construction, teaching research, and out there in industry, this topic has never been more important than today, ironically not because of insufficient language support but quite on the contrary, due to a truly confusing variety of modular concepts offered by modern languages: modules, packages, classes, and components, the newest and still controversial trend. The recent notion of component is still very vaguely defined so vaguely in fact that it almost seems advisable to ignore it. Wirth, in his article "Records, Modules, Objects, Classes, Components" in honor of Hoare's retirement in 1999, clarification is needed.

Modular Programming Languages László Böszörményi, Peter Schojer, 2003-08-13. The papers are organized in topical sections on architectural concepts and education, component architectures, language concepts, frameworks, and design principles, compilers and tools, and formal aspects and reflective programming.

Modular Programming Languages David Lightfoot, Clemens Szyperski, 2006-09-19. This book constitutes the refereed proceedings of the international Joint Modular Languages Conference JMLC 2006. The 23 revised full papers presented together with 2 invited lectures were carefully reviewed and selected from 36 submissions.
