Mollie Is Three Growing Up In School:

Mollie Is Three Vivian Gussin Paley, 2010-07-19 No adult can escape the adult perspective but simply recognizing its inevitable limitations in a children's world enables a few gifted educators to accept the existence and validity of whole kindergartens full of different perspectives One such person is Vivian Gussin Paley Her books should be required reading wherever children are growing New York Times Book Review With a delightful almost magical touch Paley shares her observations and insights about three year olds The use of a tape recorder in the classroom gives her a second chance to hear students thoughts from the doll corner to the playground and to reflect on the ways in which young children make sense of the experience of school Paley lets the children speak for themselves and through their words we reenter the world of the child in all its fantasy and inventiveness Harvard Educational Review Paley's vivid and accurate descriptions depict both spontaneous and recurring incidents and outline increasingly complex interactions among the children Included in the narrative are questions or ideas to challenge the reader to gain more insight and understanding into the motives and conceptualizations of Mollie and other children Karen L Peterson *Young Children* **Annual Progress in Child Psychiatry and Child Development 2002** Margaret E. Education in an Age of Accountability David W. Kritt,2018-01-16 This book contrasts authentic approaches to education with classroom practices based primarily on standards external to the individuals who are supposed to learn While other books tend to promote either a desperate scramble for meeting standards or determined resistance to neoliberal reforms this book fills that gap in ways that will inspire practitioners prospective teachers and teacher educators Mandates pay only lip service to constructivist and social constructivist principles while thwarting the value of both students and teachers actively creating understandings Authors in this book assert the central importance of a range of constructivist approaches to teaching learning and thinking inviting careful reflection on the goals and values of education Real Kids Susan

Engel,2009-07-01 Engel argues that the scientist in a crib view held by many parents and teachers encourages them to expect more logical reasoning and emotional self control from children than they possess She provides an overview of what

modern developmental psychologists have learned about children's developing powers of perception and capacity for reasoning

Play and Early Literacy Development James F. Christie, 1991-01-01 This book overviews the sociolinguistic and psychological approaches to studying play and literacy. It offers research studies that relate different aspects of play to emergent reading and writing behaviors. The use of certain language structures, storybook reenactments, literacy activities during play, and notions of reality and pretense are considered. It also presents applied research on how manipulation of play environments, teacher involvement in play, and play training can promote literacy growth.

Psychodynamic Perspectives on Working with Children, Families, and Schools Michael O'Loughlin, 2012-12-08 With the push toward accountability and test performance in schools, there has been a decline in emphasis on creativity, imagination, and feelings in schools. *Psychodynamic Perspectives on Working with Children, Families, and Schools* is designed for students and professionals who are interested in restoring such values to their work with children. There is an absence of psychoanalytic ways of thinking in conventional professional discourses of schooling. With a few notable exceptions, the discourses of child development, classroom management, early childhood education, special education, school psychology, and school counseling have constructed notions of children and schooling that are often behaviorist, instrumental, and symptom-focused. Curriculum too often focuses on acquisition of knowledge and behaviors; discipline is conceptualized as compliance; and symptoms such as anger, school resistance, etc. are pathologized and reacted to out of context. Children's special needs are often conceptualized instrumentally, and children with complex psychological symptoms are delimited, depersonalized, or simply removed. Professionals who work with children psychodynamically draw on diverse frameworks, including the work of Anna Freud, the long tradition of the Tavistock Clinic in London, e.g., Anne Alvarez, Susan Reid, Margaret Rustin, Frances Tustin, etc., the writings of Klein, Winnicott, and their colleagues; French analysts, e.g., Piera Aulagnier, Didier Anzieu, Laurent Danon-Boileau, Françoise Dolto, Maud Mannoni, and Catherine Mathelin; and Italian infant child analyst Alessandro Pontelli. This work is valuable but often inaccessible to school professionals because the writing is somewhat specialized and because there is no tradition of teaching such work in professional preparation in those fields. This collection is theoretically grounded in that the authors share a commitment to valuing children's emotions and understand the usefulness of psychoanalytic approaches for enhancing children's lives. It is laden with examples to invite into this discussion those students and professionals who value these ideas but for whom this book may be their first introduction to progressive educational ideals and psychodynamic ways of working with children. *Psychodynamic Perspectives on Working with Children, Families, and Schools* provides an introductory volume to open the door to the possibility of introducing psychodynamic frameworks to education and human service professors and school professionals and professionals working with children.

The Collaborative Construction of Pretend Carollee Howes, 1992-01-23 *The Collaborative Construction of Pretend* explores the origins and development of social pretend play in children. It begins with the infant's first attempts to play pretend with an adult, discusses the beginnings

of toddler pretend with peers and investigates the fully developed social play of preschool and school age children The author argues that social pretend play can fulfill several different developmental functions and that these functions change with development Each of these functions are rooted in the individual development of the child and in the social context Thus the book looks at developmental progressions not only in the forms of social pretend play but in the meaning of the play to the child
