The Power of Moments Chip Heath,Dan Heath,2017-10-03 The New York Times bestselling authors of Switch and Made to Stick explore why certain brief experiences can jolt us and elevate us and change us and how we can learn to create such extraordinary moments in our life and work While human lives are endlessly variable our most memorable positive moments are dominated by four elements elevation insight pride and connection If we embrace these elements we can conjure more moments that matter What if a teacher could design a lesson that he knew his students would remember twenty years later What if a manager knew how to create an experience that would delight customers What if you had a better sense of how to create memories that matter for your children This book delves into some fascinating mysteries of experience Why we tend to remember the best or worst moment of an experience as well as the last moment and forget the rest Why we feel most comfortable when things are certain but we feel most alive when they re not And why our most cherished memories are clustered into a brief period during our youth Readers discover how brief experiences can change lives such as the experiment in which two strangers meet in a room and forty five minutes later they leave as best friends What happens in that time Or the tale of the world s youngest female billionaire who credits her resilience to something her father asked the family at the dinner table What was that simple question Many of the defining moments in our lives are the result of accident or luck but why would we leave our most meaningful memorable moments to chance when we can create them The Power of Moments shows us how to be the author of richer experiences

Maier, 2016-09-12 Fr Thomas Reese has observed that American Catholic dioceses are simultaneously mysterious and essential to the institutional health and vitality of American Catholicism In recent years as American Catholicism increasingly finds itself embroiled in scandal and conflict this mysteriousness has given way to feelings of suspicion frustration and even contempt How can American dioceses navigate this complex and often hostile social cultural and political environment Several decades ago J Michael Sproule invited rhetorical and communication scholars to focus on institutions to increase our understanding of the profound role complex organizations play in contemporary life assess the purpose and significance of communication in pursuit of their missions and give a human face to the otherwise institutional voice of corporate suasion Following Sproule this book defines a new field called diocesan institutional rhetoric that strives to transform dioceses from structures characterized by closure and adversity into sites of hope full response able Spirit led opportunity Today rhetorical and communication issues emerge everywhere in American Catholicism Drawing together relevant literature in Catholic theology philosophy of communication and corporate communication scholarship as well as over twelve years experience working as a communication professional in a diocesan chancery this book helps diocesan leaders scholars and observers to think differently and more fruitfully about the future of American Catholic ecclesial leadership

Public Relations and Participatory Culture Amber Hutchins,Natalie T.J. Tindall,2016-03-10 While public relations practitioners have long focused on the relationship between organizations and their stakeholders there has never been a time when that relationship was so dominated by public participation The new model of multiple messages originating from multiple publics at varying levels of engagement is widely acknowledged but not widely explored in scholarly texts The established model of one way communication and message control no longer exists Social

media and an increasingly participatory culture means that fans are taking a more active role in the production and co creation of messages communication and meaning These fans have significant power in the relationship dynamic between the message the communicator and the larger audience yet they have not been defined using current theory and discourse Our existing conceptions fail to identify these active and engaged publics let alone understand virtual communities who are highly motivated to communicate with organizations and brands This innovative and original research collection attempts to address this deficit by exploring these interactive engaged publics and open up the complexities of establishing and maintaining relationships in fan created communities
