New Lands New Man America And The Second Great Age Of Discovery:

New Lands, New Men William H. Goetzmann, 1995 In the third volume of his award winning Exploration Trilogy Goetzmann discusses the Second Great Age of Discovery which spanned the seventeenth through the nineteenth centuries and reflected Enlightenment ideals of science and progress Explorers gathered information that transformed natural history and botany and launched the sciences geology and oceanography

Islands of Truth Daniel Clayton, 2011-11-01 In *Islands of Truth* Daniel Clayton examines a series of encounters with the Native peoples and territory of Vancouver Island in the late eighteenth and early nineteenth centuries Although he focuses on a particular region and period Clayton also meditates on how representations of land and people and studies of the past serve and shape specific interests and how the dawn of Native Western contact in this part of the world might be studied 200 years later in the light of ongoing struggles between Natives and non Natives over land and cultural status Between the 1770s and 1850s the Native people of Vancouver Island were engaged by three sets of forces that were of general importance in the history of Western overseas expansion the West's scientific exploration of the world in the Age of Enlightenment capitalist practices of exchange and the geopolitics of nation state rivalry *Islands of Truth* discusses these developments the geographies they worked through and the stories about land identity and empire stemming from this period that have shaped understanding of British Columbia's past and present Clayton questions premises underlying much of present B C historical writing arguing that international literature offers more fruitful ways of framing local historical experiences *Islands of Truth* is a timely provocative and vital contribution to post colonial studies

Historical Dictionary of the American Frontier Jay H. Buckley, Brenden W. Rensink, 2015-05-05 The *Historical Dictionary of the American Frontier* covers early Euro American exploration and development of frontiers in North America but not only the lands that would eventually be incorporated into the United States it also includes the multiple North American frontiers explored by Spain France Russia England and others The focus is upon Euro American activities in frontier exploration and development but the roles of indigenous peoples in these processes is highlighted throughout The history of this period is covered through a chronology an introductory essay and an extensive bibliography The dictionary section has over 300 cross referenced entries on explorers adventurers traders religious orders developers and indigenous peoples This book is an excellent access point for students researchers and anyone wanting to know more about the development of the American frontier

Voice and Vision Stephen J. Pyne, 2009-05-15 It has become commonplace these days to speak of unpacking texts *Voice and Vision* is a book about packing that prose in the first place This book is for those who wish to understand the ways in which literary considerations can enhance nonfiction writing Stephen Pyne an experienced and skilled writer himself explores the many ways to understand what makes good nonfiction and explains how to achieve it His counsel and guidance will be invaluable to experts as well as novices in the art of writing serious and scholarly nonfiction

Alaska History Marvin W. Falk, 2006-03-30 Marvin W Falk offers a systemic and select

listing of just over 3 000 publications on the history of Alaska published from the 18th century to early 2004 Early explorations were conducted by nationals from several nations and the results were published in Russian German French Spanish and English Many of these foreign language accounts have been published in translation and are included in the bibliography This bibliography covers a wide span of Alaskan history including historical literature from Discovery in 1741 The Russian period ending in 1867 The U S territorial period ending with statehood in 1959 The oil boom *Race to the Frontier* John Van Houten Dippel,2005 Table of contents available via the World Wide Web

The Poetics of Natural History Christoph Irmscher,2019-09-08 Newly expanded and in full color this groundbreaking book argues that early American natural historians had a distinctly poetic sensibility producing work that had a visionary intensity Covering naturalists from John James Audubon to PT Barnum it considers not only natural history writing but also illustrations photographs and actual collections of flora and fauna Photography and all associated expenses made possible by a generous grant from Furthermore a program of the J M Kaplan Fund

With Sails Whitening Every Sea Brian Rouleau,2015-05-06 Many Americans in the Early Republic era saw the seas as another field for national aggrandizement With a merchant marine that competed against Britain for commercial supremacy and a whaling fleet that circled the globe the United States sought a maritime empire to complement its territorial ambitions in North America In *With Sails Whitening Every Sea* Brian Rouleau argues that because of their ubiquity in foreign ports American sailors were the principal agents of overseas foreign relations in the early republic Their everyday encounters and more problematic interactions barroom brawling sexual escapades in port city bordellos and the performance of blackface minstrel shows shaped how the United States was perceived overseas Rouleau details both the mariners working class diplomacy and the anxieties such interactions inspired among federal authorities and missionary communities who saw the behavior of American sailors as mere debauchery Indiscriminate violence and licentious conduct they feared threatened both mercantile profit margins and the nation s reputation overseas As Rouleau chronicles the world s oceans and seaport spaces soon became a battleground over the terms by which American citizens would introduce themselves to the world But by the end of the Civil War seamen were no longer the nation s principal ambassadors Hordes of wealthy tourists had replaced seafarers and those privileged travelers moved through a world characterized by consolidated state and corporate authority Expanding nineteenth century America s master narrative beyond the water s edge *With Sails Whitening Every Sea* reveals the maritime networks that bound the Early Republic to the wider world

Paths of Innovation in Warfare Nicholas Michael Sambaluk,2018-04-20 Innovation shapes wars and twelve studies by former faculty members of West Point s United States Military Academy examine specific cases of past and present military innovation The complex competitive and dynamic environment that defines war drives combatants to seek solutions to potentially lethal problems As some solutions prove effective gain traction and win emulation they follow a path of innovation The chapters address a broad array of innovations including in weapon technology strategy research and

development philosophy organization of the military instrument and leveraging maps for strategic goals Geographically the examples in this volume span four continents and the Mediterranean Sea and chronologically they proceed from the twelfth century to the twenty first Collectively the studies point to the interconnected value of pursuing constructive solutions to challenges networking interdisciplinary forms of knowledge appropriately balancing expectations and capabilities and understanding an innovation as a journey rather than as an episodic event

Robots in Space Roger D. Launius, Howard E. McCurdy, 2008-02-11 Explores the worlds of rocketry engineering public policy and science fantasy to expound upon the possibilities and improbabilities involved in trekking across the Milky Way and beyond

Lewis and Clark Reframed David L. Nicandri, 2021-07-23 Spanish British and French explorers reached the Pacific Northwest before Meriwether Lewis and William Clark The American captains benefited from those predecessors even carrying with them copies of their published accounts James Cook George Vancouver and Alexander Mackenzie and to a lesser extent fur traders John Meares and Robert Gray directly and indirectly influenced the expedition Based on new material as well as revised essays from popular history journals *Lewis and Clark Reframed* examines several curious and seemingly inexplicable aspects of the journey after the Corps of Discovery crossed the Rocky Mountains The captains journals demonstrate that they relied on Mackenzie's 1801 Voyages from Montreal as a trail guide They borrowed field techniques and favorite literary expressions at times plagiarizing entire paragraphs Cook's literature also informed the pair and his naming conventions evoke fresh ideas about an enduring expedition mystery the identity of the two or three journalists whose records are now missing Additional journal text analysis dispels the notion that the captains were equals despite expedition lore Lewis claimed all the epochal discoveries for himself and in one of his more memorable passages drew on Mackenzie for inspiration Parallels between Cook's and other exploratory accounts offer evidence that like many long distance voyagers Lewis grappled with homesickness His friendship with Mahlon Dickerson lends insights into Lewis's shortcomings and eventual undoing As secretary of the navy Dickerson drew from Lewis's troubled past to impede the 1840s ocean expedition set to emulate Cook and solidify America's claim through Lewis and Clark to the region

Exploration Stewart Angus Weaver, 2015 This clear succinct and elegant contribution to the Very Short Introduction series surveys the history of global exploration and assesses the motives for good and ill of those who undertook it Stewart Weaver traces the history of exploration from the first explorers including Polynesian and Micronesian peoples the ancient Greeks Marco Polo and Ibn Battuta to the European discover of America the Enlightenment and exploration focusing on James Cook the race to the north and south poles and finally twentieth century space and deep sea exploration

Exploration Stewart A. Weaver, 2014-12-19 This clear succinct and elegant contribution to the Very Short Introduction series surveys the history of global exploration and assesses the motives for good and ill of those who undertook it Stewart Weaver traces the history of exploration from the first explorers including Polynesian and Micronesian peoples the ancient Greeks Marco Polo and Ibn Battuta to the European discover of America the Enlightenment

and exploration focusing on James Cook the race to the north and south poles and finally twentieth century space and deep sea exploration Learning to Divide the World John Willinsky,1998 The barbarian rules by force the cultivated conqueror teaches This maxim from the age of empire hints at the usually hidden connections between education and conquest In Learning to Divide the World John Willinsky brings these correlations to light offering a balanced humane and beautifully written account of the ways that imperialism s educational legacy continues to separate us into black and white east and west primitive and civilized The Poetics of the Antarctic William E. Lenz,2021-03-19 The thesis of this book is that the 19th century interest in the Antarctic functions for modern scholars as an important index to American self discovery and self definition from the 1830s onward According to the author American hopes for confirming identity came to be focused on an unlikely goal the discovery of the illusive Antarctic continent By examining in detail one literary product of the U S Exploring Expedition 1838 1842 to Antarctica James Croxall Palmer s epic poem *Thulia A Tale of the Antarctic* 1843 and its revision *The Antarctic Mariner s Song* 1868 and by locating these works within their cultural context Lenz reveals the significance and changing meaning of exploration to emerging American concepts of nationhood The volume also considers the tradition of American sea fiction in the works of such writers as James Fenimore Cooper Edgar Allan Poe and Herman Melville arguing that for these writers the Antarctic was a locus of symbolic meaning while for Palmer it was a process of individual and collective perception The 1868 version of the Palmer poem is attached here as an appendix A useful bibliography follows that appendix *Dinosaurs Ever Evolving* Allen A. Debus,2016-06-21 From their discovery in the 19th century to the dawn of the Nuclear Age dinosaurs were seen in popular culture as ambassadors of the geological past and as icons of the life through time narrative of evolution They took on a more foreboding character during the Cold War serving as a warning to mankind with the advent of the hydrogen bomb As fears of human extinction escalated during the ecological movement of the 1970s dinosaurs communicated their metaphorical message of extinction urging us from our destructive path Using an eclectic variety of examples this book outlines the three fold evolution of dinosaurs and other prehistoric monsters in pop culture from their poorly understood beginnings to the 21st century Structures in the Stream Todd Shallat,2010-07-22 As the Mississippi and other midwestern rivers inundated town after town during the summer of 1993 concerned and angry citizens questioned whether the very technologies and structures intended to tame the rivers did not in fact increase the severity of the floods Much of the controversy swirled around the apparent culpability of the U S Army Corps of Engineers the builder of many of the flood control systems that failed In this book Todd Shallat examines the turbulent first century of the dam and canal building Corps and follows the agency s rise from European antecedents through the boom years of river development after the American Civil War Combining extensive research with a lively style Shallat tells the story of monumental construction and engineering fiascoes public service and public corruption and the rise of science and the army expert as agents of the state More than an institutional history *Structures in the Stream* offers significant insights into American

society which has alternately supported the public works projects that are a legacy of our French heritage and opposed them based on the democratic individualist tradition inherited from Britain It will be important reading for a wide audience in environmental military and scientific history policy studies and American cultural history

The Shaping of American Ethnography Barry Alan Joyce, 2001-01-01 In August of 1838 the United States Exploring Expedition set sail from Norfolk Navy Yard with six ships and more than seven hundred crewmen including technicians and scientists Over the course of four years the expedition made stops on the east and west coasts of South America visited Australia New Zealand Samoa and Tahiti discovered the Antarctic land mass and explored the Fiji Islands Tonga the Hawaiian Islands and the Pacific Coast of North America In *The Shaping of American Ethnography* Barry Alan Joyce illuminates the process by which the Americans on the expedition filtered their observations of the indigenous peoples they encountered through the lens of their peculiar constructions of savagery as shaped by the American experience The native peoples were classified according to the prevailing American perceptions of Native Americans as wild and African American slaves as docile The use of physical characteristics such as skin color as a classificatory tool was subordinated to the perceived image of the prototypical savage Joyce argues that the nineteenth century explorers shared the attributes that characterize the discipline of anthropology in any age a reliance on synthetic systems that are period and culture dependent By applying American images of savagery to world cultures American scientists and explorers of this period helped construct the foundation for an American racial weltanschauung that contributed to the implementation of manifest destiny and laid the ideological foundations for American expansion and imperialism in the nineteenth and twentieth centuries

Bitter Waters David Haward Bain, 2011-08-18 An intriguing thorough study of a little known scientific expedition to the Dead Sea by a mid 19th century U S Navy lieutenant Kirkus Reviews With customary depth and insight David Haward Bain illumines the United States s nineteenth century exploration of the Holy Land To lead the expedition the navy tabbed William Francis Lynch an officer eager to enter the esteemed yet dangerous field of Victorian exploration Like many of his successful contemporaries Lynch was well read and possessed an independent nature but a man who also preferred organization to chaos and with a character that tended toward the obsessive The expedition would force a juxtaposition of the ancient world with the modern as the world s newest power attempted an exhaustive scientific study of the waters of the cradle of civilization Beyond its fascinating topic *Bitter Waters* is full of broad allusions from the period that demonstrate Bain s deep understanding of America and serve to make the work appealing for general scholars and lay readers Heroically engaging unfamiliar terrain hostile Bedouins and ancient mysteries Lynch and his party epitomize their nation s spirit of Manifest Destiny in the days before the Civil War An engrossing narrative of the expedition that richly positions the mission s incidents within Lynch s Western perspective on the Near East Wonderfully realized Bain s account will enthrall seekers of history off the beaten path Booklist starred review David Haward Bain author of *Empire Express* paints a vivid picture of the ambitious visionary seafarers and their bold

adventure Bitter Waters captures this fascinating moment in American history History Book Club official selection

American Pacificism Paul Lyons, 2006-09-27 This powerful critique of American Islander relations draws upon extensive resources including literary works and government documents to explore the ways in which conceptions of Oceania have been entwined in the American imagination
