Abstract

The rapid reshaping of the global economic order requires fundamental shifts in international business scholarship and management practice. New forms of protectionist policies, new types of internationalization motives, and new tools of techno-nationalism may lead to what we call “bifurcated governance” at the macro-level and “value chain decoupling” at the micro-level. As a result, innovation networks will require novel reconfigurations. We examine the emerging constraints on multinational enterprises, imposed by a bifurcated world order. We also discuss how the dynamic capabilities framework can guide scholars and managers alike to achieve new forms of evolutionary fitness.

INTRODUCTION

The global economic system created in the post-World War II (WWII) era is now being disrupted and undergoing significant structural reshaping. While in need of improvement, the post-WWII system led to an extended epoch of peace and an unprecedented rise in prosperity. It lifted up, albeit unevenly, the welfare of much of the world’s population as it encouraged enterprise formation and growth, brought investment, and, importantly, transferred advanced technology to many parts of the world. At the micro-level, the transfer of managerial best practices in a variety of functional areas, and in overall firm-level governance, may well have been the greatest contribution of the post-WWII system—in a downward cascading motion—to the functioning of the world economy, and it was brought about by multinational enterprise (MNE) investment and capability transfers (Dunning, 1958; Verbeke, Coeurderoy &

Reshaping Globalization:

Reshaping Globalization Violetta Zentai, Andrea Krizsán, 2003 If the importance of globalization were judged by the volume of discussion it has generated it would surely be a concept of fundamental importance in the contemporary world And yet as a concept globalization is often indigestible meaning different things to different people and remaining obscure in its connotations A virtue of this volume of essays is that the phenomena of globalization are made more approachable by being divided into five discrete themes each of which forms part of the overall concept and each of which has important implications for policy decisions at the international regional and national levels By differentiating the concept in this way into the production of global knowledge the provision of global public goods the global trade system global foreign aid and global governance the analysis is sharpened in an illuminating and stimulating manner At the same time the editors Drs Violetta Zentai and Andrea Krizsan provide a masterly introductory essay that shows how the various parts make up the whole The fact that the book is a product of an international conference held at the Central European University shortly after September 11 in 2001 adds a layer to its significance The Center for Policy Studies at the Central European University and its collaborators deserve praise for such a thorough and timely analysis of these various strands of globalization Book jacket

Reshaping Protestantism in a Global Context Volker Küster, 2009 The regional contributions from Africa and Asia show how the old European made denominational differences fade in the light of African Instituted Churches or Pentecostalism Reshaping Protestantism is not a backward oriented project of reconstructing the original but makes use of the inner protestant pluralism to cope with globalization and changing religious landscapes Who reads through the different articles can only come to the conclusion Yes there is a contribution to be expected from mainline Protestantism in all its variety

Reshaping Globalisation Heribert Dieter, 2003 Shaping Globalization Bertelsmann Stiftung, 2013-01-25 The rise of new economic powers in Asia and Latin America has changed the size and the direction of cross border investment flows Emerging economies like China Brazil and India have become major destinations of foreign direct investment within the past decade and they are also taking on the role of investor themselves The unprecedented shifts in global investment flows have revived the debate over the effects of foreign investment on growth employment and income distribution In this book leading experts analyse the most important trends from the increasingly active role emerging economies play as investors in Africa to the rising suspicion in the U S and Europe of Chinese takeovers Global challenges like climate change and the ageing of societies will act as new drivers of foreign investment reshaping the patterns of globalization once again **Shaping**

Globalization Nicanor Perlas, 2019-03-25 Civil Society has become a major power in the world The stunning defeat of the controversial and secretive Multilateral Agreement on Investments the massive worldwide WTO protests and the yearly meetings of the World Social Forum are testimony to its coming of age From these significant victories civil society continued to catch world attention with the Arab Spring the grassroots movement that helped elect former US President Barack Obama

and the significant gains of the anti fracking campaign With tens of millions of citizens and over a trillion dollars involved in advancing its agenda civil society now joins the state and the market as the third key institution shaping globalization However it cannot fully mobilize its resources and power as it currently lacks clear understanding of its identity Shaping Globalization argues that global civil society is a cultural institution wielding cultural power and shows how through the use of this distinct power it can advance its agenda in the political and economic realms of society without compromising its identity Nicanor Perlas outlines the strategic implications for civil society both locally and globally and explains that civil society s key task is to inaugurate threefold the forging of strategic partnerships between civil society government and business Such authentic tri sector partnerships are essential for advancing new ways for nations to develop and for charting a different sustainable type of globalization Using the model of the Philippine Agenda 21 we are shown how civil society and progressive individuals and agencies in government and business are demonstrating the effectiveness of this new understanding to ensure that globalization benefits the environment the poor and society as a whole This reprinted edition includes a new Afterword

Globalization Stefan A. Schirm,2007 Globalization systematically encompasses the debates and the results of research of political scientists on various core aspects of the interrelation between politics and economics in the process of globalisation

Globalization and the Poor Jay R. Mandle,2003-02-17 The argument the author presents is that globalization is associated with the economic growth necessary to alleviate poverty Globalization therefore should be encouraged At the same time governments must adopt policies that address the needs of those who are victimized by the dislocations caused by the process The book responds to the opponents by emphasizing globalization s potential to alleviate poverty but at the same time is critical of those who defend globalization without acknowledging the costs it imposes on innocent victims In addressing the activist opponents of the process the author maintains that they should not reject the global integration of

world markets because of a concern for justice. Instead, activists can advance the interests of the world's poor by mounting political movements to advance international agreements to stabilize the world economy and ensure labor rights.

Juggernaut Uri B. Dadush, William Shaw, 2011. In *Juggernaut*, Uri Dadush and William Shaw explore the major trends associated with the rise of developing countries, including increased manufacturing expansion in world trade and ultimately improved living and working conditions, as well as the broad challenges those trends pose. **The Systems View of Life**

Fritjof Capra, Pier Luigi Luisi, 2014-04-10. Over the past thirty years, a new systemic conception of life has emerged at the forefront of science. New emphasis has been given to complexity, networks, and patterns of organization, leading to a novel kind of systemic thinking. This volume integrates the ideas, models, and theories underlying the systems view of life into a single coherent framework. Taking a broad sweep through history and across scientific disciplines, the authors examine the appearance of key concepts such as autopoiesis, dissipative structures, social networks, and a systemic understanding of evolution. The implications of the systems view of life for health care, management, and our global ecological and economic crises are also discussed. Written primarily for undergraduates, it is also essential reading for graduate students and researchers interested in understanding the new systemic conception of life and its implications for a broad range of professions, from economics and politics to medicine, psychology, and law.
