Rethinking China's Provinces:

Rethinking China's Provinces John Fitzgerald, 2003-09-02 This is the third volume in a series examining the political importance of China's provinces under reform. The present book provides a survey of provinces as echelons of the People's Republic of China. It seeks to locate the province as an administrative level in the Chinese state through an examination of history, economic, social, and political developments of these units. By situating the province's history, this volume identifies new developments in the territorial administration of the People's Republic over the reform era. It also charts the consequent emergence of the city as an intermediate unit situated between the province and the country and providing challenges to the hierarchy of the bureaucratic state. This book includes detailed analyses of Chongqing, Henan, Guangdong, Anhui, Yunnan, and Heilongjiang. It contains extensively researched empirical data collected from these provinces and user-friendly maps of these regions.

Handbook of the Politics of China David S.G. Goodman, 2015-11-27 The Handbook of the Politics of China is a comprehensive resource introducing readers to the very latest in research on Chinese politics. David Goodman provides an introduction to the key structures and issues providing the foundations on which later learning can be built. Including a comprehensive bibliography, it is an ideal reference work for undergraduate and postgraduate students and academics. The Handbook contains four sections of new and original research dealing with leadership and institutions, public policy, political economy, and social change and international relations. Each of the 26 chapters has been written by a leading internationally established authority in the field and each reviews the literature on the topic and presents the latest findings of research. Presenting the state of the art of the field, this reader-oriented Handbook is an essential primer for the study of China's politics.

China's Provinces and Populations Eric Croddy, 2022-11-23 This manual provides an overview of China's administrative geography, history, and populations of all 31 provinces as well as Hong Kong, Macao, and Taiwan. It focuses primarily on how the provinces came to be, how they were named, as well as their people and populations throughout history. In addition to extensive use of bilingual names (Chinese/English) for specificity, this resource is unique in the datasets contained therein: 1. Up-to-date residential populations of mainland China using the latest decennial 2020 census; and 2. Political-administrative registered household hukou data based on official numbers provided by the People's Republic of China (PRC) Ministry of Public Security, showing trends from 2012-2020. Each internally consistent but differing in their methodologies, whereby the Census decennial data provide a snapshot of how many people live in a given location and the permanent hukou registered household data track each individual based on their hometown, household, urban/rural status, and nationality. This book addresses this chasm, which among other issues points to the phenomenon of China's floating populations, where millions of Chinese spend much, if not all, of their time living, working, and studying outside their home provinces. By showing how the Chinese have been populated and their organization throughout history, this manual is the go-to place for professionals, practitioners, and academics working and interested in China's provinces and populations.

China's Regions in an Era of Globalization Tim Summers, 2018-06-19 The rise of China has been shaped and driven by its engagement with the global economy during a period of intensified globalization yet China is a continent sized economy and society with substantial diversity across its different regions This means that its engagement with the global economy cannot just be understood at the national level but requires analysis of the differences in participation in the global economy across China's regions This book responds to this challenge by looking at the development of China's regions in this era of globalization It traces the evolution of regional policy in China and its implications in a global context Detailed chapters examine the global trajectory of what is now becoming known as the Greater Bay Area in southern China the globalization of the inland mega city of Chongqing and the role of China's regions in the globally focused belt and road initiative launched by the Chinese government in late 2013 The book will be of interest to practitioners and scholars engaging with contemporary China's political economy and international relations

China's Provinces and the Belt and Road Initiative Dominik Mierzejewski, 2021-03-30 This book discusses the Belt and Road Initiative at the provincial level in China It analyses the evolution of the role of local governments in Chinese foreign policy since the opening of China's economy in 1978 showing how the provinces initially competed with each other and how the central government was forced to react developing more centralised policies Unlike other books on the Belt and Road Initiative which focus on the international aspects of the initiative this book demonstrates the importance of the Belt and Road in reinforcing China's unitary status and for managing and coordinating development at the local level as well as centre province relations and province to province relations inside China

China's Local Administration Jae Ho Chung, Tao-chiu Lam, 2009-10-16 The remarkable changes in China over the past three decades are mostly considered at the national level whereas local government which has played and continues to play a key role in these developments is often overlooked The themes of China's local administrative hierarchy and its historical evolution have until now received scant attention this book fills that gap and presents a comprehensive survey of China's local administration from the province down to the township It examines the political and functional definitions and historical origins of the nine local administrative levels or categories in contemporary China the province the centrally administered municipality the ethnic minority autonomous region the special administrative region the deputy provincial city the prefecture the county township and urban district It investigates how each of the different levels of China's local administration has developed historically both before and after 1949 and it explores the functions political and economic that the different levels and units carry out and how their relationships with superior and subordinate units have evolved over time It also discusses how far the post Mao reforms have affected local administration and how the local administrative hierarchy is likely to develop going forward

Hainan - State, Society, and Business in a Chinese Province Kjeld Erik Brødsgaard, 2008-08-27 This book examines the complex relationship between the state society and business in China focusing on the experience of the island province of Hainan This island for many years a provincial backwater was given

provincial rank in 1988 and became the testing ground for experiments of an economic political and social nature that have received great attention from Beijing in particular the small government big society project This book provides a full account of this transition showing how Hainan casts important light on a number of highly topical issues in contemporary China studies central local relations institutional reform state society relations and economic development strategies It provides detailed evidence of how relations between party cadres state bureaucrats businesses foreign investors and civil society play out in practice in China today It argues that despite the liberalization of recent years especially in the economic sphere the party state remains the most powerful actor in Chinese society and that path breaking reform experiments such as in Hainan remain highly vulnerable due to the central government's hesitation to commit the resources and unequivocal political support needed for the experiments to be successfully realized *China's Campaign to 'Open Up the West'* David S. G. Goodman, 2004-11-08 The 2004 volume examines the newly adopted Chinese government policy designed to aid the development of China's western regions It considers the political and economic context of the campaign and then examines its potential impact in seven provincial level jurisdictions Xinjiang Qinghai Sichuan Shaanxi Chongqing Yunnan and Guizhou

Locating China Jing Wang, 2007-05-07 Taking a multidisciplinary approach this volume examines the relationship between space and the production of local popular culture in contemporary China The international team of contributors examine the inter relationship between the cultural imaginary of a given place and China's continuing drive towards urbanization This has led to the development of new spaces and places and new forms of spatial practices that destabilize old concepts of the local and locality Delivering ethnographic observations and theoretical speculations this work furthers our understanding of the link between spatial thinking and the production of consumer culture in China *Southwest China in a Regional and Global Perspective (c.1600-1911)*, 2018-01-03 The book *Southwest China in Regional and Global Perspectives c 1600 1911* is dedicated to important issues in society trade and local policy in the southwestern provinces of Yunnan Guizhou and Sichuan during the late phase of the Qing period It combines the methods of various disciplines to bring more light into the neglected history of a region that witnessed a faster population growth than any other region in China during that age The contributions to the volume analyse conflicts and arrangements in immigrant societies problems of environmental change the economic significance of copper as the most important export product topographical and legal obstacles in trade and transport specific problems in inter regional trade and the roots of modern transnational enterprise **Rural Tax**

Reform in China Linda Chelan Li, 2012-03-15 This book examines questions of change and inertia in the context of the longstanding grievances over excessive taxation in rural China How can some changes be sustained whilst others cannot How can a longstanding administrative practice be changed or even terminated especially when previous attempts at change have failed Using extensive interview data with local and central bureaucrats Li's findings highlight the role of parallel developments and agency in the change process as well as the prevalence of contingency and uncertainty It also elegantly

blends the narrative of the rural tax and administrative reforms with theoretical discussions to deepen our understanding of policy process and institutional change in 21st century China Despite the authoritarian political system the Chinese state in action which emerges from this book sees actions stemming from both the central and local levels mediated by strategic design as well as contingency This book will be of interest to students and scholars of Chinese Studies political science and policy and development studies

Tiger Girls Minglu Chen, 2012-03-29 The existing scholarship on women in China suggests that gender inequality still exists against the background of the country's reform and opening in recent years However the situation of women in enterprise ownership and leadership seems to indicate that despite such notions of disadvantage amongst women some of them are playing a more active and significant role in China's economic development Based on a series of interviews with female enterprise owners wives of enterprise owners and women managers conducted in diverse locations in three different provinces of China *Tiger Girls* examines the deeper realities of women entrepreneurs in China and by extension the role of leading women in the workforce By analyzing information on these women's personal experiences careers and families this book investigates their status at work and at home as well as their connections with local politics The research results suggest that although traces of gender inequality can still be found in these women's lives they appear to be actively engaged in the business establishment and operation and gradually casting off the leash of domestic responsibilities This book will be of interest to students and scholars of Chinese Studies Chinese Business Chinese Economics and Asian Studies Minglu Chen is ARC Postdoctoral Fellow in the Department of Government and International Relations at Sydney University Australia

Urban China Reframed Wing-Shing Tang, Kam Wing Chan, 2021-06-21 Given China's rapid economic growth and massive urbanization no one in the world can ignore what is happening in urban China This book is a critical review of existing urban China research which is found wanting due to the decontextualized use of theories and concepts developed in the West *Urban China Reframed* A Critical Appreciation consists of epistemological theoretical and methodological contributions to remedy these limitations by focusing on a number of relevant topics First models are widely employed in any study and China nowadays has invoked models like city system zones and global city in socio-economic development How to interpret them in terms of knowledge production in a strong party state Second given the global prevalence of neoliberalism it is an important debate whether neoliberalism is applicable to China Third what is urban ideology in China How to contextualize it Are debates about the differentiation between the city and urbanization relevant to China Fourth massive rural-urban migration in China has taken place within its mega-rural-urban dual system an institution that has persisted since the 1950s How does it manifest nowadays Fifth has the town-country divide in China like in the West disappeared If not how can one interpret China's town-country relations within the politics and administration of the Chinese state Sixth how to decipher the territorial development in the Pearl River Delta the world's factory under the auspices of the state The collection of essays in this volume contributes to the theoretical understanding of urban China The

chapters in this book were originally published in the Eurasian Geography and Economics **Small Works** John A. Donaldson, 2011-08-15 How can policymakers effectively reduce poverty Most mainstream economists advocate promoting economic growth on the grounds that it generally reduces poverty while bringing other economic benefits However this dominant hypothesis offers few alternatives for economies that are unable to grow or in places where economic growth fails to reduce or actually exacerbates poverty In *Small Works* John A Donaldson draws on his extensive fieldwork in two Chinese provinces Yunnan and Guizhou that are exceptions to the purported relationship between economic growth and poverty reduction In Yunnan an outward oriented developmental state one that focuses on large scale urban development has largely failed to reduce poverty even though it succeeded in stimulating economic growth Provincial policy shaped roads tourism and mining in ways that often precluded participation by poor people By contrast Guizhou is a micro oriented state one that promotes small scale low skill economic opportunities and so reduces poverty despite slow economic growth It is no coincidence that this Guizhou approach parallels the ideas encapsulated in the scientific development view of China's current president Hu Jintao After all Hu when Guizhou's leader helped establish the micro oriented state in the province Donaldson's conclusions have implications for our understanding of development and poverty reduction economic change in China and the thinking behind China's policy decisions *China's Deep Reform* Lowell Dittmer, Guoli Liu, 2006-04-07 China's rapid and complex political and socioeconomic changes provide fertile ground for pioneering analysis but they also present daunting theoretical and practical challenges This reader takes up the challenge offering the most comprehensive assessment of Chinese domestic politics available by bringing together the best recent scholarship in the field The anthology focuses on the origin content and significance of the post 1989 phase of China's reform and opening to the world commonly known in the PRC as deep reform This period has been unfolding in interaction with globalization marketization privatization political institutionalization as well as with financial and legal changes Deep reform includes new policy initiatives that have penetrated political legal economic and social sectors untouched by previous initiatives as reformers have been forced to deal with the consequences intended and unintended of earlier reforms These carefully selected essays by leading scholars have been revised and updated for this text In addition a substantive introduction and conclusion place the articles in their broader context for readers new to the subject With the successful transition of the leadership of the party state and military since 2002 the time is ripe for a comprehensive evaluation of China's deep reform as it enters a new stage This timely reader will offer students scholars and policymakers invaluable insights into the dynamics of change in one of the world's emerging political and economic dynamos Contributions by Marc Blecher Bruce J Dickson Lowell Dittmer Joseph Fewsmith Ting Gong Baogang Guo William Hurst Cheng Li Guoli Liu Andrew J Nathan Kevin J O'Brien Veronica Pearson Randall Peerenboom Yingyi Qian Tony Saich Tianjian Shi Edward S Steinfeld Shaoguang Wang Lynn White Yu Shan Wu and Guobin Yang
