Rethinking the Welfare State Ronald Joel Daniels, M. J. Trebilcock, 2005 This book offers a comprehensive and comparative analysis of social welfare policy and explores the effectiveness of the voucher system in an international context

Rethinking the Welfare State Ronald Joel Daniels, 2005 Rethinking the Welfare State Ronald J. Daniels, Michael J. Trebilcock, 2013-01-11 Rethinking the Welfare State offers a comprehensive and comparative analysis of social welfare policy in an international context with a particular emphasis on the US and Canada The authors investigate the claim that a decentralized delivery of government supported goods and services enables policy objectives to be achieved in a more innovative and efficient way but at a lower cost Secondly they examine the effectiveness of the voucher system as a solution to problematic welfare concerns While this system has shown much promise in improving welfare there have been problems for institutions unable to attract enough voucher assisted consumers to ensure their survival In this context the authors examine major social programmes such as food stamps primary and secondary education post secondary education labour market training childcare healthcare legal aid low income housing long term care and pensions *Careless State* Mark Considine, 2022-10-05 The lives of all Australians are profoundly affected by the quality of social services available but a long list of royal commissions and public inquiries have revealed them to be failing In *The Careless State* Mark Considine shows that the preferred model of reform has failed to adapt and improve In the 1980s Australian governments faced rapidly increasing demand for services in areas like employment assistance aged care childcare and vocational education and training to respond to this challenge governments led by Bob Hawke and Paul Keating pioneered the introduction of service markets where private companies compete with public institutions and charities in newly constructed social services This choice revolution was embraced and extended by the Howard government Market choice continues to drive reform across a wide spectrum of programs and social services Considine's detailed investigation demonstrates conclusively that important aspects of the experiment with social service markets have failed Weak quality control systematic sorting and entrenched disadvantage have become the norm Private business interests and shareholders interest have often displaced established charities and commitment to quality care for all The service systems are careless leaving clients to make choices without real information or protection Considine points to alternative ways that reforms could be configured to get the best from both private and public agencies and find a new approach to save these failing services *On Risk and Disaster* Ronald J. Daniels, Donald F. Kettl, Howard Kunreuther, 2011-06-07 Named one of Planetizen's Top 10 Books of 2006 Hurricane Katrina not only devastated a large area of the nation's Gulf coast it also raised fundamental questions about ways the nation can and should deal with the inevitable problems of economic risk and social responsibility This volume gathers leading experts to examine lessons that Hurricane Katrina teaches us about better assessing perceiving and managing risks from future disasters In the years ahead we will inevitably face more problems like those caused by Katrina from fire earthquake or even

a flu pandemic America remains in the cross hairs of terrorists while policy makers continue to grapple with important environmental and health risks Each of these scenarios might in itself be relatively unlikely to occur But it is statistically certain that we will confront such catastrophes or perhaps one we have never imagined and the nation and its citizenry must be prepared to act That is the fundamental lesson of Katrina The 20 contributors to this volume address questions of public and private roles in assessing managing and dealing with risk in American society and suggest strategies for moving ahead in rebuilding the Gulf coast Contributors Matthew Adler Vicki Bier Baruch Fischhoff Kenneth R Foster Robert Giegengack Peter Gosselin Scott E Harrington Carolyn Kousky Robert Meyer Harvey G Ryland Brian L Strom Kathleen Tierney Michael J Trebilcock Detlof von Winterfeldt Jonathan Walters Richard J Zeckhauser

Taking Public Universities

Seriously Frank Iacobucci, Carolyn J. Tuohy, Carolyn Hughes Tuohy, 2005-01-01 Taking Public Universities Seriously includes all the papers given at this conference and is enhanced by a comprehensive introduction by two of Canada's most prominent and experienced university administrators Frank Iacobucci and Carolyn Tuohy **The Three Sector Solution** John Butcher, David Gilchrist, 2016-07-15 This collection of essays had its origins in a one day workshop held in August 2015 at The Australian National University jointly convened by Dr John Butcher ANZSOG and Professor David Gilchrist Curtin Not for profit Initiative the purpose of the workshop was to bring together academic researchers policy practitioners and thought leaders to address a variety of emerging issues facing policymakers public sector commissioners not for profit providers of publicly funded services and businesses interested in opportunities for social investment The workshop itself generated a great deal of interest and a baker's dozen of contributors challenged and engaged a full house The level of enthusiasm shown by the audience for the subject matter was such that the decision to curate the presentations in the form of a book was never in doubt The editors trust that this volume will vindicate that decision At one time the state exercised a near monopoly in the delivery of social programs Today almost every important public problem is a three sector problem and yet we have little idea of what a high performing three sector production system looks like It is the editors hope that this volume will provide a foundation for some answers to these important public policy questions *The Cambridge Handbook of Privatization* Avihay Dorfman, Alon Harel, 2021-09-16 Some goods and services seem to be fundamentally public such as legislation criminal punishment and fighting wars By contrast other functions such as garbage collection do not This volume brings together prominent scholars from a range of academic fields including law economics philosophy and sociology to address the core question of what makes a certain good or service fundamentally public and why Sometimes governments and other public entities are superior because they are more likely to get at the right decisions or follow fair procedures In other instances the provision of goods and services by public entities is intrinsically valuable By analyzing these answers the authors also explore the nature of the state and its authority This handbook explores influential arguments for and against privatization and also develops a number of key studies explaining justifying or challenging the legitimacy and the desirability of public provision of particular goods and services **Equal Justice** Frederick Wilmot-Smith, 2019-10-08 A philosophical and legal argument for equal access to good lawyers and other legal resources Should your risk of wrongful conviction depend on your wealth We wouldn't dream of passing a law to that effect but our legal system which permits the rich to buy the best lawyers enables wealth to affect legal outcomes Clearly justice depends not only on the substance of laws but also on the system that administers them In Equal Justice Frederick Wilmot Smith offers an account of a topic neglected in theory and undermined in practice justice in legal institutions He argues that the benefits and burdens of legal systems should be shared equally and that divergences from equality must issue from a fair procedure He also considers how the ideal of equal justice might be made a reality Least controversially legal resources must sometimes be granted to those who cannot afford them More

radically we may need to rethink the centrality of the market to legal systems Markets in legal resources entrench pre existing inequalities allocate injustice to those without means and enable the rich to escape the law s demands None of this can be justified Many people think that markets in health care are unjust it may be time to think of legal services in the same way

Resounding Events William E. Connolly, 2022-03-01 Winner David Easton Award for Political Theory 2023 In *Resounding Events* one of the world s preeminent political theorists reflects on a career as an academic hailing from the working class From youthful experiences of McCarthyism to the resurgence of white evangelicalism to the advent of aspirational fascism and the acceleration of the Anthropocene Connolly traces a career spent passionately engaged in making a more just diverse and equitable world He surveys the shifting ground upon which politics can be pursued and he discloses how to be an intellectual in universities that today do not encourage that practice Far more than a memoir *Resounding Events* probes the concerns that have animated Connolly s work across more than a dozen books by tracing the bumpy imbrications of event memory and thinking in intellectual life Connolly experiments with ways to capture various voices that mark a self at any time An event as he elaborates it is what disturbs or inspires thinking as it activates layered sheets of memory A memory sheet itself assembles recollections dispositions organized from the past and vague remains that carry efficacies *Resounding Events* shows how resonances between event and memory can help forge new concepts better adjusted to an emergent situation Addressing tensions between working class experience and norms of the academy his father s coma antiwar protests the growing disaffection of the white working class the neoliberalization of the university climate denialism and his sister s experience with workers shifting to Trump Connolly shows how engaged intellectuals become worthy of the events they encounter

Accountability and Democracy Craig T. Borowiak, 2011-07-01 Few political concepts are as emblematic of our era as democratic accountability In a time of political and economic turmoil in which global forces have destabilized conventional relations of political authority democratic accountability has come to symbolize both what is absent and what is desired in our polity Situated at the intersection of democratic theory and international studies *Accountability and Democracy* provides an in depth critical analysis of accountability Through an engagement with several key democratic traditions both ancient and modern the book paints a rich picture of democratic accountability as a multi dimensional concept harboring competing imperatives and diverse instantiations Contrary to dominant views that emphasize discipline and control Craig Borowiak offers an original and refreshing view of democratic accountability as a source of mutuality participation and political transformation He both creatively engages conventional electoral models of accountability and moves beyond them by situating democratic accountability within more deliberative participatory and agonistic contexts Provocatively the book also

challenges deep seated understandings of democratic accountability as an expression of popular sovereignty Borowiak instead argues that accountable governance is incompatible with all claims to ultimate authority regardless of whether they refer to the demos the state or cosmopolitan public law Rather than conceiving of democratic accountability as a way to legitimize a secure and sovereign political order the book contends that destabilization and democratic insurgence are indispensable and often neglected facets of democratic accountability practices For contemporary scholars practitioners and activists grappling with the challenge of building democratic legitimacy into world politics the book urges greater reflexivity and nuance in how democratic accountability is evoked and implemented It offers insights into the myriad ways democratic accountability has been thwarted in the past while also cultivating a sense of expanded possibility for how it might be conceived for the present

Hans Bernd Sch fer University of Hamburg Germany By identifying the key politico economic reasons why rule of law reforms in developing countries have faltered and drawing out the implications for future strategy this book is of immense importance and should be widely read Anthony Ogus CBE FBA University of Manchester UK This important book addresses a number of key issues regarding the relationship between the rule of law and development It presents a deep and insightful inquiry into the current orthodoxy that the rule of law is the panacea for the world s problems The authors chart the precarious progress of law reforms both in overall terms and in specific policy areas such as the judiciary the police tax administration and access to justice among others They accept that the rule of law is necessarily tied to the success of development although they propose a set of procedural values to enlighten this institutional approach The authors also recognize that states face difficulties in implementing this institutional structures and identify the probable impediments before proposing a rethink of law reform strategies and offering some conclusions about the role of the international community in the rule of law reform Reviewing the progress in the rule of law reform in developing countries specifically four regions Latin America Africa Central and Eastern Europe and Asia this book makes a significant contribution to the literature It will be of great interest to scholars and advanced students as well as practitioners in the field including international and bilateral aid agencies working on rule of law reform projects and international and regional non governmental organiza

The New Political Economy of Disability Georgia van Toorn,2021-02-22 This book addresses the ways in which individualised market based models of disability support provision have been mobilised in and across different countries through cross national investigation of individualised funding IF as an object of neoliberal policy mobility Combining rich theoretical and interdisciplinary perspectives with extensive empirical research the book provides a timely examination of the policy processes and mechanisms driving the spread of IF amongst countries at the forefront of disability policy reform It is argued that IF s mobility is not attributable to neoliberalism alone but to the complex intersections between neoliberal and emancipatory agendas and to the transnational networks that have blended the two agendas in new ways in different institutional contexts The book shows how disability rights struggles have synchronised with neoliberal agendas which explains IF s propensity to move and mutate between different jurisdictions Featuring first hand accounts of the activists and advocates engaged in these struggles the book illuminates the consequences and risks of the dangerous liaisons and political trade offs that seemed necessary to get individualised funding on the policy agenda for disabled people It will be of interest to all scholars and students working in disability studies social policy sociology and political science more generally
