Revolution And Reaction 1848 And The Second French Republic:

Revolution and Reaction Roger Price, 2022-02-06 This book first published in 1975 examines the events of the French Second Republic the themes of protest and repression in particular It analyses how popular discontent is mobilised and becomes political protest and revolution and how the machinery of government operates in a crisis situation **Revolution and Reaction. 1848 and the Second French Republic. Ed. by R. Price** R. Price, 1975 **Republicanism in Nineteenth-Century France, 1814-1871** Pamela Pilbeam, 1995-02-27 This book is a fascinating survey of nineteenth century republicanism the first of its kind this century It investigates why it was that although France was one of the first countries in modern Europe to become a republic in 1792 it was nearly a hundred years before a republic was acceptable to the majority Pamela Pilbeam suggests that republicanism was a witch s brew of Enlightenment rationality bloody memories and conflicting socialist expectations The book concludes that the successful republic of 1871 used the rhetoric of democracy to conceal persistent elitism *The Revolutions of 1848* Roger Price, 1988-11-11 1848 saw an unprecedented wave of revolutions The social order appeared shaken to its foundations Even those countries like Britain which did not experience revolutions endured severe political crises Yet within months established elites were able to re assert themselves and to take advantage of their entrenched position within bureaucracies and armies This book seeks to analyse the causes of both revolution and reaction It aims to set political events with the context of a Continent undergoing complex processes of transition from essentially pre industrial economic and social structures towards more modern urban industrial systems It considers why after 1848 except in the exceptional circumstances of war governments were better able to prevent the development of revolutionary movements **British Dogmatism and French Pragmatism** Douglas E. Ashford, 2023-06-09 First published in 1982 British Dogmatism and French Pragmatism presents an inquiry into how national political and administrative constraints affect the formulation and implementation of local government reform This comparative study between British and French local politics and policymaking discusses themes like local reorganization in the welfare state two paths from monarchy to democracy decisions and non decisions can national politics make local policy fiscal policy and local spending capital spending and land use and central local politics in the welfare state The author argues that the influence of local government systems cannot be assessed apart from the national political and administrative structures in which they are embedded This book is a must read for scholars and researchers of political science public administration and policy making **Encyclopedia of Historians and Historical Writing** Kelly Boyd, 2019-10-09 The Encyclopedia of Historians and Historical Writing contains over 800 entries ranging from Lord Acton and Anna Comnena to Howard Zinn and from Herodotus to Simon Schama Over 300 contributors from around the world have composed critical assessments of historians from the beginning of historical writing to the present day including individuals from related disciplines like Jürgen Habermas and Clifford Geertz whose theoretical contributions have informed historical debate Additionally the Encyclopedia

includes some 200 essays treating the development of national regional and topical historiographies from the Ancient Near East to the history of sexuality In addition to the Western tradition it includes substantial assessments of African Asian and Latin American historians and debates on gender and subaltern studies Global Crises and Social Movements Edmund Burke,2019-03-06 Traditionally scholars have traced the origins and characteristics of social movements to purely local and national determinants Until recently the global dimension of such movements has been relatively neglected This book takes the innovative step of linking social movements to international political and economic crises identifying the general features of industrial and developing societies that predispose them toward social movements of particular kinds The book consists of three parts views the origins of the European working class collective movement of 1848 from a variety of perspectives reexamines the debate on the moral economy of the peasant in terms of peasant nonrevolt and global political economy considers the emergence of fascist and populist movements in Western Europe and East Asia in their intersocietal dimensions Each of the cases has been selected for its strategic contribution to an understanding of the occurrence of social movements in relation to large scale societal crises Collectively the essays underscore the methodological utility of situating such movements in a global context Arabs of the Jewish Faith Joshua Schreier,2010-08-19 Exploring how Algerian Jews responded to and appropriated France s newly conceived civilizing mission in the mid nineteenth century Arabs of the Jewish Faith shows that the ideology while rooted in French Revolutionary ideals of regeneration enlightenment and emancipation actually developed as a strategic response to the challenges of controlling the unruly and highly diverse populations of Algeria s coastal cities *The Constitutional Monarchy in France, 1814-48* Pamela M. Pilbeam,2014-07-30 Historians in France assume that the restoration of Monarchy after the defeat of Napoleon was doomed The first compact recent history of the period in English this book reveals that although the French experimented with two Monarchies and a Republic 1814 48 there was substantial stability The Institutional framework constructed during the Revolutionary years 1789 1814 remained intact and the ruling elites retained basic control **The Routledge Companion to Modern European History since 1763** Chris Cook,John Stevenson,2004-11-10 The Routledge Companion to Modern European History since 1763 is a compact and highly accessible work of reference covering the broad sweep of events from the last days of the ancient regime to the ending of the Cold War and from the reshaping of Eastern Europe to the radical expansion of the European Union in 2004 Within the broad coverage of this outstanding volume particular attention is given to subjects such as the era of the Enlightened Despots the Revolutionary and Napoleonic era in France and the revolutions of 1848 nationalism and imperialism and the retreat from Empire the First World War the rise of the European dictators the coming of the Second World War the Holocaust and the post war development of Europe the Cold War the Soviet Union and its break up the protest and upheavals of the 1960s as well as social issues such as the rise of the welfare state and the changing place of women in society throughout the period With a fully comprehensive glossary a biographical section a thorough bibliography

and informative maps this volume is the indispensable companion for all those who study modern European history

Intellectual Founders of the Republic Sudhir Hazareesingh, 2001-11-01 This innovative study of French political culture re-examines the origins of modern republicanism through the lives and political thought of five nineteenth century intellectuals Jules Barni Charles Dupont White Emile Littr Eugène Pelletan and Étienne Vacherot By their writings and their political practices at the local national international levels these thinkers made major contributions to the founding of the new republican order in France Drawing on a range of archival and published sources the book sheds new light on classical republican thinking on such key issues as the interpretation of the 1789 Revolution the definition of citizenship the meaning of patriotism the relationship between central government and local democracy the value of individual liberty and the place of education and religion in public and private life These five studies also break new ground in the conceptualization of nineteenth century French intellectual history The writings of these thinkers demonstrate the ideological pluralism and diversity of moderate French republican thought during this period Positivism appears as an important and influential doctrine but its hegemonic aspirations were successfully resisted by the abiding influences of Saint Simonism socialism doctrinaire liberalism and neo Kantianism It emerges that the ideological potency of republican doctrine lay in its complexity and sophistication as reflected in its capacity to effect a synthesis among these different approaches Through its analysis of the writings and political practices of these five thinkers *Intellectual Founders of the Republic* offers critical insights into the history of political thought as well as modern French republicanism It underlines both the significance of contextuality in the interpretation of political discourse and the continuing relevance of classical republicanism in making sense of contemporary moral and political dilemmas

Less than Nations Giuseppe Motta, 2014-03-25 *Less than Nations* Central Eastern European Minorities after WWI represents the result of research that the author has carried over recent years and was facilitated by the 2008 PRIN project Programmi di Ricerca di Rilevante Interesse Nazionale and the 2010 Sapienza Research funds The book analyses the conditions of national minorities after World War I when the geo political map of Central Eastern Europe was redefined by international diplomacy The new settlements were based on the principle of national self determination and were conditioned by the geographic reality of Central Eastern Europe where states and nations rarely coincided As a consequence the minority question emerged as one of the most troublesome issues during the interwar period and affected international relations and the internal conditions of many states The minority question was discussed by historiography and by international observers and became an integral part of the system which was centred around the League of Nations This work begins with the study of the relationships between the states and their minorities and of the international dimension of this question which animated the fight between revisionist and anti revisionist states The documents of the Italian Army's General Staff and of the League of Nations represent the main historical sources of this book which carries out a complete study of the difficult situation of 1918-1920 when the new states annexed many contested

regions within their frontiers and of the numerous controversies concerning the application of international treaties and national regulations in relation to the protection of minorities The second volume of the book analyses some special aspects of this question and focuses on the interpretation of some particular cases which had an outstanding role in the definition of the international framework The massacres of the Armenians in the Ottoman Empire and of the Jews in Eastern Europe for example alarmed the international community and contributed to the 1919 emergency of minority rights The role of Kin States such as Germany and Hungary instead characterized the entire interwar period and conditioned the stability of Europe and the League of Nations Finally special cases like those of Slovakia and Bosnia are also helpful in understanding the ideas of nation and minority and how conceptualisations of the latter have changed throughout the last century

Barricades and Borders Robert Gildea, 2003-03-06 This is a comprehensive survey of European history from the coup d'etat of Napoleon Bonaparte in France to the assassination of the Archduke Ferdinand at Sarajevo which led to the First World War It concentrates on the twin themes of revolution and nationalism which often combined in the early part of the century but which increasingly became rival creeds Going beyond traditional political and diplomatic history the book incorporates the results of recent research on population movements the expansion of markets the accumulation of capital social mobility education changing patterns of leisure religious practices and intellectual and artistic developments The work falls into three chronological sections The first starting in 1800 rather than the more usual 1815 follows the build up of the revolutionary currents which were eventually going to erupt in the Year of Revolutions 1848 The second from 1850 to 1880 deals with the golden age of capitalism the successful culmination of struggles for national unification and the threat of anarchism The concluding chapters look at the social and political stresses caused by socialism and national minorities at new attempts by government to order society imperial rivalry and the descent into a war which was to mark the end of nineteenth century Europe For this third edition Dr Gildea has substantially revised the text and maps and completely updated the bibliography Newly added introductory sections guide the reader through the wealth of material in each chapter The new edition also includes for the first time a full Chronology of the period a list of leading state ministers and family trees for all the major dynasties

incorporating new debates in Atlantic history empire studies and cultural history to give a comprehensive narrative of the period from 1775 to 1922 Rather than assessing revolution as a purely theoretical socially driven force or a structural phenomenon the book presents revolution as a process of community building and cultural identification born from instances of acute social and political crisis Taking into account various moments of political upheaval during the 19th century including the French Russian and 1848 revolutions it explores the ways in which political actors attempted to construct new definitions of sovereignty and social unity in a period characterized by vast social economic and governmental change In a wide ranging text that covers Britain and much of continental Europe in detail as well as reaching out to the Americas and Atlantic and Mediterranean Worlds Gavin Murray Miller provides an authoritative transnational study of revolution in the 19th century age of high nationalism

Popular French Romanticism James Smith Allen, 1981-01-01 Focusing on the Paris book world of this period Allen reveals how the rise of a new popular literature jolly chansonniers the roman feuilletons or serial novels melodramas gothic and sentimental novels dramatic nationalistic histories by such authors as Dumas Sand Lamennais Ancelot Desnoyer and de Kock coincided with remarkable developments in the production distribution and consumption of books Allen s research ranges from a survey of the then popular romantic titles and authors and the trade catalogs of booksellers and lending libraries to the police records of their activities diaries and journals of working people and military conscript records and ministerial literacy statistics The result is a remarkable picture of the exchange between elite and popular culture the interaction between ideas and their material reality and the relationship between the literature and the history of France in the romantic period

Revolution and Rebellion in the Early Modern World Jack A. Goldstone, 2016-12-19 What can the great crises of the past teach us about contemporary revolutions Jack Goldstone shows the important role of population changes youth bulges urbanization elite divisions and fiscal crises in creating major political crises Goldstone shows how state breakdowns in both western monarchies and Asian empires followed the same patterns triggered when inflexible political economic and social institutions were overwhelmed by cumulative changes in population structure that collided with popular aspirations and state elite relations Examining the great revolutions of Europe the English and French Revolutions and the great rebellions of Asia which shattered dynasties in Ottoman Turkey China and Japan he shows how long cycles of revolutionary crises and stability similarly shaped politics in Europe and Asia but led to different outcomes In this 25th anniversary edition Goldstone reflects

on the history of revolutions in the last twenty five years from the Philippines and other color revolutions to the Arab Uprisings and the rise of the Islamic State In a new introduction he re examines his pioneering look at the role of population changes such as rising youth cohorts urbanization shifting elite mobility as continuing causal factors of revolutions and rebellions The new concluding chapter updates his major theory and looks to the future of revolutions in the Middle East Asia and Africa

France 1814 - 1914 Robert Tombs, 2014-09-25 Here is an incomparably rich portrait of France in the years when the disparate elements that made up the fragmented kingdom of the ancien regime were forged into the modern nation The survey begins with an exploration of national obsessions and attitudes It considers the tendency to revolution and war the preoccupation with the idea of a New Order and the deep strain of national paranoia that was to be intensified by the dramatic debacle of the Franco Prussian War Robert Tombs then investigates the structures of power and in Part Three he turns his attention to social identities from the individual and family to the nation at large When every aspect of the period has been put under the microscope Robert Tombs draws them all into the broad political narrative that brings the book to its rousing conclusion Bursting with life as well as learning this is quite simply a tour de force
