Security Order And The Bomb:

Strategic Analysis and the Management of Power Olav F. Knudsen, 2016-07-27 The book is a tribute to Johan Jorgen Holst Norway's late Minister of Foreign Affairs It considers the outstanding issues of our time the high politics of East West confrontation and the post Cold War readjustment in Europe Holst contributed significant ideas to the handling of these issues Though representing merely a small state Johan Holst's mastery of the subject matter and authoritative personal presence gave him an influential voice in high level discourse on Western policy during more than two decades

Arms Control and Technological Innovation David Carlton, Carlo Schaerf, 2024-11-02 First published in 1977 Arms Control and Technological Innovation is primarily concerned with three subjects the causes of the arms race the consequences of the arms race to the world and the control of the arms race Written by experts in the field it brings themes like new technologies and new weapon systems new tactics to replace tactical nuclear weapons in Europe the Anglo American nuclear relationship strategic arms limitation and military strategic concepts and a new approach to strategic arms limitation and reduction The book argues that the principal problem of the arms race according to several lectures is that weapons and delivery systems technology have developed so much as to threaten the survival of civilization itself The pace of technological change is proceeding more rapidly than ever before and there is serious doubt whether political institutions are adapting to this change in time to avoid devastating consequences to the world This book is a must read for scholars and researchers of military and strategic studies international relations international politics and geopolitics

Congress. Senate. Committee on Armed Services, 2001 *Deterrence and the New Global Security Environment* Ian R. Kenyon, John Simpson, 2013-10-18 This collection of papers rigorously examines the current place of deterrence in international security relations delivering the best of contemporary thinking This is a special issue of the leading journal *Contemporary Security Policy* It shows how and why nuclear deterrence was the central organizing mechanism for international security relations in the second half of the twentieth century It has been replaced by a new global security environment in which the central role of deterrence both nuclear and otherwise appears to have diminished The Cold War has been succeeded by a new state of play This book will be of interest to students of military and naval history and security studies *Dimensions of Peace and Security* Gustaaf Geeraerts, Natalie Pauwels, Éric Remacle, 2006 The terrorist attacks of September 11th 2001 on the United States provoked a significant shift in thinking about peace and security and much has since been written about new security threats and challenges This collection of essays revisits some of the more traditional concepts of peace and security that remain valid and pertinent today despite having ceded much of the

limelight to the major security preoccupations of the current era international terrorism weapons of mass destruction rogue states and related phenomena The book covers numerous salient topics from arms production monitoring and control to disarmament and conversion through to peacekeeping and conflict prevention The contributions differ in scope form and analysis ranging from historical and philosophical to contemporary and political perspectives and approaches to peace and security

The Applied Ethics of Emerging Military and Security Technologies Braden R. Allenby, 2016-12-05 The essays in this volume illustrate the difficult real world ethical questions and issues arising from accelerating technological change in the military and security domains and place those challenges in the context of rapidly shifting geopolitical and strategic frameworks Specific technologies such as autonomous robotic systems unmanned aerial vehicles cybersecurity and cyberconflict and biotechnology are highlighted but the essays are chosen so that the broader implications of fundamental systemic change are identified and addressed Additionally an important consideration with many of these technologies is that even if they are initially designed and intended for military or security applications they inevitably spread to civil society where their application may raise very different ethical questions around such core values as privacy security from criminal behaviour and state police power Accordingly this volume is of interest to students of military or security domains as well as to those interested in technology and society and the philosophy of technology

Security with Nuclear Weapons? Regina Cowen Karp, 1991 SIPRI Stockholm International Peace Research Institute is an independent institute for scientific research which aims to further an understanding of the conditions for peaceful solutions to international conflicts and for a stable peace Over the past twenty years SIPRI has concentrated on problems of armaments disarmament and arms regulation SIPRI is financed mainly by the Swedish Parliament Its staff the Governing Board and the Scientific Council are international The prospect of large reductions of nuclear weapons poses fundamental questions about the purpose of nuclear weapons Why have some states chosen to acquire nuclear weapons How and why have these decisions been maintained over time Why have some states elected to approach but not cross the nuclear threshold This book examines the commonalities and differences in political approaches to nuclear weapons both within and among three groups of states nuclear non nuclear and threshold The chapters explore the evolution of thinking about nuclear weapons and the role these weapons play in national security planning The book transcends traditional East West approaches to analysis of nuclear issues by giving equal prominence to the issues of nuclear proliferation and non nuclearism The book also provides a comprehensive analysis of how current approaches to nuclear weapons have evolved both within and among the countries under study
