this Michigan farmer's son defined the intellectual and spiritual foundations of what would become the environmental movement. For nearly a half century Bailey dominated matters agricultural, environmental and scientific in the United States. He worked both to improve the lives of rural folk and to preserve the land from which they earned their livelihood. Along the way he popularized nature study in U.S. classrooms, lobbied successfully for women's rights on and off the farm and bulwarked Teddy Roosevelt's pioneering conservationism. Here for the first time is an anthology of Bailey's most important writings suitable for the general and scholarly reader alike. Carefully selected and annotated by Zachary Michael Jack, this book offers a comprehensive introduction to Bailey's celebrated and revolutionary thinking on the urgent environmental, agrarian, educational and ecospiritual dilemmas of his day and our own. Culled from ten of Bailey's most influential works, these lyrical selections highlight Bailey's contributions to the nature study and the Country Life movements. Published on the one hundredth anniversary of Bailey's groundbreaking report on behalf of the Country Life Commission, *Liberty Hyde Bailey: Essential Agrarian and Environmental Writings* will inspire a new generation of nature writers, environmentalists and those who share with Bailey a profound understanding of the elegance and power of the natural world and humanity's place within it.

**Quality Control in Fact-Finding** Morten Bergsmo, 2013-11-16. This book discusses how fact-finding mechanisms for alleged violations of international human rights, humanitarian and criminal law can be improved. There has been a significant increase in the use of international, internationalised and domestic fact-finding mechanisms since 1992, including by the United Nations human rights system, international commissions of inquiry, truth and reconciliation commissions and NGOs. They are analysed and assessed in detail by 19 authors under the common theme *Quality Control in Fact-Finding*. The authors include Richard J. Goldstone, Martin Scheinin, LIU Daqun, Charles Garraway, David Re Simon, De Smet FAN, Yuwen Isabelle, Lass e WU Xiaodan, Dan Saxon, Chris Mahony, Dov Jacobs, Catherine Harwood, Lyal S. Sunga, Wolfgang Kaleck, Carolijn Terwindt, Ilia Utmelidze and Marina Aksenova. Serge Brammertz has written the Preface and LING Yan a Foreword. The book emphasises quality, awareness and improvement in non-criminal justice fact-work. This quality control approach recognises inter alia the importance of leadership in fact-finding mechanisms, the responsibility of individual fact-finders to continuously professionalise and the need for fact-finders to be mandate-centred. It is an approach that invites the consideration of how the quality of every functional aspect of fact-finding can be improved, including work processes to identify, locate, obtain, verify, analyse, corroborate, summarise, synthesise, structure, organise, present and disseminate facts. The book also considers regulatory approaches to enhance quality and professionalisation.

*The Externalist Challenge* Richard Schantz, 2011-08-18. The debate between internalism and externalism has become a focal point of attention both in epistemology and in the philosophy of mind and language. Externalism challenges basic traditional internalist conceptions of the nature of knowledge, justification, thought and language. What is at stake is the very form that theories in epistemology and the philosophy of mind ought to take. This volume is a collection of original contributions of leading international authors reflecting on the present.
