## Seeing Through Photographs:

Philosophy of Film and Motion Pictures Noël Carroll, Jinhee Choi, 2009-02-09 Designed for classroom use this authoritative anthology presents key selections from the best contemporary work in philosophy of film. The featured essays have been specially chosen for their clarity, philosophical depth, and consonance with the current movement towards cognitive film theory. Eight sections with introductions cover topics such as the nature of film, film as art, documentary, cinema narration, and emotion in film, film criticism, and film's relation to knowledge and morality. Issues addressed include the objectivity of documentary films, fear of movie monsters, and moral questions surrounding the viewing of pornography. Replete with examples and discussion of moving pictures throughout. *On Photography* Diarmuid Costello, 2017-09-22 What is photography? Is it a source of knowledge or an art? Many have said the former because it records the world automatically; others the latter because it expresses human subjectivity. Can photography be both, or must we choose? In *On Photography: A Philosophical Inquiry* Diarmuid Costello examines these fascinating questions and more, drawing on images by Alfred Stieglitz, Berenice Abbott, Paul Strand, Lee Friedlander, James Welling, and Wolfgang Tillmans, among others, and the writings of Elizabeth Eastlake, Peter Henry Emerson, Edward Weston, Siegfried Kracauer, André Bazin, and Stanley Cavell. This sets the scene for the contemporary stand-off between sceptical and non-sceptical Orthodoxy in the work of Roger Scruton and Kendall Walton, and a New Theory of Photography taking its cue from László Moholy-Nagy and Patrick Maynard. Written in a clear and engaging style, *On Photography* is essential reading for anyone interested in the philosophy of photography, aesthetics, art, and visual studies. The Routledge Companion to Aesthetics Berys Gaut, Dominic Lopes, 2013-04-17 The third edition of the acclaimed *Routledge Companion to Aesthetics* contains over sixty chapters written by leading international scholars covering all aspects of aesthetics. This companion opens with an historical overview of aesthetics including entries on Plato, Aristotle, Kant, Nietzsche, Heidegger, Adorno, Benjamin, Foucault, Goodman, and Wollheim. The second part covers the central concepts and theories of aesthetics including the definitions of art, taste, the value of art, beauty, imagination, fiction, narrative, metaphor, and pictorial representation. Part three is devoted to issues and challenges in aesthetics including art and ethics, art and religion, creativity, environmental aesthetics, and feminist aesthetics. The final part addresses the individual arts including music, photography, film, videogames, literature, theater, dance, architecture, and design. With ten new entries and revisions and updated suggestions for further reading throughout, *The Routledge Companion to Aesthetics* is essential for anyone interested in aesthetics, art, literature, and visual studies. *Marvelous Images* Kendall Walton, 2008-04-23 The twelve essays by Kendall Walton in this volume address a broad range of theoretical issues concerning the arts. Many of them apply to the arts generally to literature, theater, film, music, and the visual arts, but several focus primarily on pictorial representation or photography. In *How Marvelous: Toward a Theory of Aesthetic Value*, Walton introduces an innovative account of aesthetic value, and in this and other essays he explores relations between aesthetic value and values of other kinds, especially moral

values Two of the essays take on what has come to be called imaginative resistance a cluster of puzzles that arise when works of fiction ask us to imagine or to accept as true in a fiction moral propositions that we find reprehensible in real life Transparent Pictures Walton's classic and controversial account of what is special about photographic pictures is included along with a new essay on a curious but rarely noticed feature of photographs and other still pictures the fact that a depiction of a momentary state of an object in motion allows viewers to observe that state in imagination for an extended period of time Two older essays round out the collection another classic Categories of Art and a less well known essay Style and the Products and Processes of Art which examines the role of appreciators impressions of how a work of art came about in understanding and appreciation None of the reprinted essays is abridged and new postscripts have been added to several of them

**The Double Content Of Art** John Dilworth, 2004-12 In this original work on aesthetics philosopher John Dilworth offers an unusual theory of the nature of artworks The Double Content DC view is the first comprehensive theory of art that is able to satisfactorily explain the nature of all kinds of artworks in a unified way whether paintings novels or musical and theatrical performances Dilworth's basic thesis is that all such representational artworks involve two levels or kinds of representation a first stage in which a concrete artifact represents an artwork and a second stage in which that artwork in turn represents its subject matter Thus Dilworth describes his approach as a double content DC theory since arguably all content is the content of some representation or other This fresh even revolutionary approach to art meets strong initial opposition from other current theories of art for example those that treat paintings as physical objects or novels and other works of fiction as types that have copies or performances as instances

**Philosophy of Art** David Boersema, 2018-05-04 This book addresses issues in the philosophy of art through the lenses of the three broad areas of philosophy metaphysics epistemology and axiology It surveys many important and pervasive topics connected to a philosophical understanding of art

**The Oxford Handbook of Aesthetics** Jerrold Levinson, 2005-01-27 The Oxford Handbook of Aesthetics has assembled 48 brand new essays making

this a comprehensive guide available to the theory application history and future of the field     Aesthetics and Film  
Katherine Thomson-Jones,2008-10-23 Aesthetics and Film is a philosophical study of the art of film Its motivation is the recent surge of interest among analytic philosophers in the philosophical implications of central issues in film theory and the application of general issues in aesthetics to the specific case of film Of particular interest are questions concerning the distinctive representational capacities of film art particularly in relation to realism and narration the influence of the literary paradigm in understanding film authorship and interpretation and our imaginative and affective engagement with film For all of these questions Katherine Thomson Jones critically compares the most compelling answers driving home key points with a wide range of film examples including Wiene s The Cabinet of Doctor Caligari Eisenstein s October Hitchcock s Rear Window Kubrick s The Shining and Sluizer s The Vanishing Students and scholars of aesthetics and cinema will find this an illuminating accessible and highly enjoyable investigation into the nature and power of a technologically evolving art form

historians and film theorists from the silent period to the aftermath of World War II     **Light Writing & Life Writing**

Timothy Dow Adams,2000 On the surface the use of photography in autobiography appears to have a straightforward purpose to illustrate and corroborate the text But in the wake of poststructuralism the role of photography in autobiography is far from simple or one dimensional     **Funerary Culture and the Limits of Secularization in Denmark** Anne

Kjaersgaard,2017 Considered one of the most irreligious countries in the world in spite of continued religious affiliation of the majority of the population Denmark is an important case to explore the limits of secularization This study challenges the secularization thesis from the perspective of lived religion innovatively examining death related behaviour and hitherto overlooked religion in relation to organ donation churchyard design grave visiting rituals and graveyard photographs

Dissertation Series Death Studies Nijmegen Studies in Thanatology Vol 4 Subject Danish Studies Religious Studies Death Studies     Art, Representation, and Make-Believe Sonia Sedivy, 2021-06-06 This is the first collection of essays focused on the many faceted work of Kendall L. Walton. Walton has shaped debate about the arts for the last 50 years. He provides a comprehensive framework for understanding arts in terms of the human capacity of make-believe that shows how different arts—visual, photographic, musical, literary, or poetic—can be explained in terms of complex structures of pretense, perception, imagining, empathy, and emotion. His groundbreaking work has been taken beyond aesthetics to address foundational issues concerning linguistic and scientific representations, for example, about the nature of scientific modelling or to explain how much of what we say is quite different from the literal meanings of our words. Contributions from a diverse group of philosophers probe Walton's detailed proposals and the themes for research they open. The essays provide an overview of important debates that have Walton's work at their core. This book will be of interest to scholars and graduate students working on aesthetics across the humanities as well as those interested in the topic of representation and its intersection with perception, language, science, and metaphysics     Aesthetics David Goldblatt, Lee B. Brown, 2016-09-16 As with previous editions, the new *Aesthetics: A Reader in Philosophy of the Arts* uses classic and contemporary readings of leading philosophers of the arts. This Third Edition includes more than a dozen new essays, either written or adapted especially for this volume. Containing more than 90 essays in total, the new edition offers generous choices for class readings, thus minimizing supplementary material needed for required assignments and independent research. In keeping with earlier editions, the Third Edition is a large collection of essays, most comparatively brief and organized first by groupings of art forms and then by general essays about the arts. It attempts to keep pace with theorizing about those art forms not traditionally covered in most books on aesthetics, like the jazz, rock, comics, video games, and even the aesthetics of junkyards. There is then an emphasis on the popular and mass arts and everyday aesthetics, as well as on time-honored problems in philosophy of the arts. This edition, which contains contributions by both analytic and continental philosophers, expands upon offerings in non-Western art and aesthetics. Finally, although intended to keep pace with topics and issues currently debated, instructors and students will find in a special section key classic texts     **Image and Mind** Gregory Currie, 1995-09-29 This book develops a theory of the nature of the cinematic medium, of the psychology of film viewing, and of film narrative.

**Philosophy and Film** Cynthia A. Freeland, Thomas E. Wartenberg, 2016-01-08 *Philosophy and Film* moves from broad theoretical reflections on film as a medium to concrete examinations of individual films     **Fiction and Imagination in Early Cinema** Mario Sluga, 2019-11-28 Shortlisted for the BAFTSS Best Monograph Award 2021 When watching the latest instalment of *Batman*, it is perfectly normal to say that we see Batman fighting Bane, or that we see Bruce Wayne making love to Miranda Tate. We would not say that we see Christian Bale dressed up as Batman going through the motions of punching Tom Hardy dressed up as Bane. Nor do we say that we see Christian Bale pretending to be Bruce Wayne making love with

Marion Cotillard who is playacting the role Miranda Tate But if we look at the history of cinema and consider contemporary reviews from the early days of the medium we see that people thought precisely in this way about early film They spoke of film as no more than documentary recordings of actors performing on set In an innovative combination of philosophical aesthetics and new cinema history Mario Slugan investigates how our default imaginative engagement with film changed over the first two decades of cinema It addresses not only the importance of imagination for the understanding of early cinema but also contributes to our understanding of what it means for a representational medium to produce fictions Specifically Slugan argues that cinema provides a better model for understanding fiction than literature *Arguing About Art* Alex Neill, Aaron Ridley, 2013-02-01 Offering a unique debate format the third edition of the bestselling *Arguing About Art* is ideal for newcomers to aesthetics or philosophy of art This lively collection presents an extensive range of short clear introductions to each of the discussions which include sentimentality appreciation interpretation understanding objectivity nature food horror With revised introductions updated suggestions for further reading and new sections on pornography and societies without art *Arguing About Art* provides a stimulating and accessible anthology suitable for those coming to aesthetics for the first time The book will also appeal to students of art history literature and cultural studies **Handbook of Visual Communication** Kenneth L. Smith, Sandra Moriarty, Keith Kenney, Gretchen Barbatsis, 2004-12-13 This Handbook of Visual Communication explores the key theoretical areas in visual communication and presents the research methods utilized in exploring how people see and how visual communication occurs With chapters contributed by many of the best known and respected scholars in visual communication this volume brings together significant and influential work in the visual communication discipline The theory chapters included here define the twelve major theories in visual communication scholarship aesthetics perception representation visual rhetoric cognition semiotics reception theory narrative media aesthetics ethics visual literacy and cultural studies Each of these theory chapters is followed by exemplar studies in the area demonstrating the various methods used in visual communication research as well as the research approaches applicable for specific media types The Handbook serves as an invaluable reference for visual communication theory as well as a useful resource book of research methods in the discipline It defines the current state of theory and research in visual communication and serves as a foundation for future scholarship and study As such it is required reading for scholars researchers and advanced students in visual communication and it will be influential in other disciplines in which the visual component is key including advertising persuasion and media studies The volume will also be useful to practitioners seeking to understand the visual aspects of their media and the visual processes used by their audiences
