**Cyberculture, Cyborgs and Science Fiction** William S. Haney II, 2006-01-01 Addressing a key issue related to human nature this book argues that the first person experience of pure consciousness may soon be under threat from posthuman biotechnology In exploiting the mind's capacity for instrumental behavior posthumanists seek to extend human experience by physically projecting the mind outward through the continuity of thought and the material world as through telepresence and other forms of prosthetic enhancements Posthumanism envisions a biology machine symbiosis that will promote this extension arguably at the expense of the natural tendency of the mind to move toward pure consciousness As each chapter of this book contends by forcibly overextending and thus jeopardizing the neurophysiology of consciousness the posthuman condition could in the long term undermine human nature defined as the effortless capacity for transcending the mind's conceptual content Presented here for the first time the essential argument of this book is more than a warning it gives a direction far better to practice patience and develop pure consciousness and evolve into a higher human being than to fall prey to the Faustian temptations of biotechnological power As argued throughout the book each person must choose for him or herself between the technological extension of physical experience through mind body and world on the one hand and the natural powers of human consciousness on the other as a means to realize their ultimate vision

**A Journey in the Heart** Christine Apter, PhD, ERYT 500, 2017-11-06 A Journey in the Heart By Christine Apter PhD ERYT 500 This book is meant to be an organized curriculum that takes a student beyond the foundational philosophy anatomy technical aspects and teaching methodology developed from many advanced yoga teacher training workshops The basics of yoga teaching with the standards of Yoga Alliance are not covered in this text It is designed as a manual intended to meet the criteria for 300 hours of knowledge and practice above and beyond what is taught in basic yoga teacher training A deep desire and enthusiasm for the teaching is

perhaps a more important criterion for the aspiration to dive deeper To be proficient in teaching and practicing it takes thousands of hours and perhaps decades of committed work The art and science of yoga teaching and practice come together with the flexible format surrounding factual structure presented in this book Rather than an authoritative tool this manual is fashioned to be a framework for the creative work it takes to teach yoga and practice deeper The reader is encouraged to build upon the information and inspiration and to be creative and innovative with the material

*Toward a Spiritual Research Paradigm* Jing Lin, Rebecca L. Oxford, Tom E. Culham, 2016-07-01 Spirituality and spiritual experiences have been the bedrock of every civilization and together form one of the highest mechanisms for making sense of the world for billions of people Current research paradigms due to their limitation to empirical sensory psychologically or culturally constructed realities fail to provide a framework for exploring this essential area of human experience The development of a spiritual research paradigm will provide researchers from the social sciences and education the tools and abilities to systematically explore fundamental questions regarding human spiritual experiences and spiritual growth A spiritual research paradigm requires an ontology that considers all reality to be multidimensional interconnected and interdependent It requires an epistemology that integrates knowing from outer sources as well as inner contemplation acknowledging our integration of soul and spirit with the body and mind Three additional aspects are useful to a spiritual research paradigm axiology methodology and teleology An axiology concerns what is valued good and ethical A methodology is the appropriate approach to systematic inquiry A fifth and less frequently mentioned aspect is teleology an explanation of the goal or end telos to which new knowledge is applied such as gaining wisdom and truth touching the divine increasing inner peace exploring hidden dimensions or improving society This book takes the first step to develop such a research paradigm We draw from world spiritual traditions as well as scholarship that has arisen from contemplative practices We also attempt to build a bridge between science and spirituality Spiritual research is not necessarily opposed to scientific research in fact each can shed light on the other
