**Desert road archaeology in ancient Egypt and beyond** Heiko Riemer, 2013-01-01 Lost Highways, Embodied Travels: The Road Movie in American Experimental Film and Video Kornelia Boczkowska, 2023-02-06 Often identified as one of the most genuine and enduring American film genres the road movie has never been explored in the context of experimental filmmaking To fill this gap Lost Highways Embodied Travels provides the first book length study of over eighty unique and often obscure films and videos and situates them within the corporeal turn in American avant garde cinema so far mostly associated with body genres and sexually explicit films Drawing on unpublished archival materials the book offers a fresh take on both past and current practices of the experimental film community for scholars students makers and film buffs

*Somatic Cell Nuclear Transfer* Peter Sutovsky, 2007-12-22 When I was first approached to edit the present volume I was somewhat reluctant to undertake this humbling task because most of my own scientific expertise is derived from studies of mammalian fertilization rather than somatic cell nuclear transfer SCNT However in the last ten years I was very fortunate to train and collaborate and communicate with a number of distinguished donors many of whom kindly agreed to contribute to the present volume This experience made me appreciate that the understanding of cellular and molecular events during and after SCNT is deeply rooted in our knowledge of fertilization of mammalian ovum by the spermatozoon to which I prefer to refer to as natural fertilization not to say that SCNT should be regarded as unnatural fertilization Unique cellular events arising from SCNT have no parallel in natural fertilization and early pre implantation development The list includes the requirement of donor cell nuclear remodeling disposal of donor cell organelles the possibility of heteroplasmy i.e. presence of mixed mitochondrial genomes and altered mode of oocyte activation Thanks to seminal contributions of my distinguished colleagues the present volume reviews the progress of SCNT technology in major mammalian species including mouse pig and cattle while at the same time parallels can be drawn and distinctions made between the cellular and molecular basis of nuclear transfer and fertilization
