Competitive Sports as a Factor in Longevity David Joseph Ansfield,1929 **A Study of the Longevity and Morbidity of Football and Basketball Athletes at Michigan State University** Andrew Joseph Hudec,1956 **The Relation of Athletics to Longevity ...** Earl Robert Jackson,1937 **Human Body Size and the Laws of Scaling** Thomas T. Samaras,2007

Several books have been published on scaling in biology and its ramifications in the animal kingdom. However none has specifically examined the multifaceted effects of how changes in human height create disproportionately larger changes in weight surface area strength and other physiological parameters. Yet the impact of these non linear effects on individual humans as well as our world's environment is enormous. Since increasing human body size has widespread ramifications this book presents findings on the human species and its ecological niche its community and how the species interacts with its environment. Thus a few chapters provide an ecological overview of how increasing human body size relates to human evolution fitness health survival and the environment. This book provides a unique purview of the laws of scaling on human performance health longevity and the environment. Numerous examples from various research disciplines are used to illustrate the impact of increasing body size on many aspects of human enterprises including work output athletics and intellectual performance.

SUICIDE IN PROFESSIONAL AND AMATEUR ATHLETES David Lester,John F. Gunn,2013-05-01 This book looks at the problem of why so many professional and amateur athletes kill themselves. Professional athletes lead what seem to us to be glamorous lives and make large and sometimes huge salaries. In schools the athletes are often the formal and informal leaders given recognition and honors. News of their suicides shocks us because to the rest of us these are the successful members of our society often looked up to as heroes and role models. The book therefore explores the incidence of suicide in athletes and reviews the risk factors that increase the likelihood of suicide in athletes. Research on these risk factors such as the role of steroids and concussions is reviewed and case studies are provided to illustrate these risk factors. Some of the topics include suicide in baseball and cricket how steroids is often linked to suicide as well as concussion and traumatic brain injury how social relationships of athletes including suicide among lesbian gay and bisexual athletes and sexual abuse can lead to suicide suicide as a result of bullying among high school and college athletes and suicide contagion how spectators involvement in sports can be related to suicide and the effect of retirement on athletes psychiatric problems among athletes and how substance abuse among athletes can cause suicide along with many other topics. The book concludes with ways in which suicide might be prevented in athletes. It will be of great interest to crisis workers and those who work in crisis centers as well as suicidologists mental health workers and others interested in the topic.
