The impact and effectiveness of ministerial reshuffles Great Britain: Parliament: House of Commons: Political and Constitutional Reform Committee, 2013-06-14 Reshuffles are damaging to the effectiveness of individual Ministers and of Government as a whole They also hinder Parliament's ability to hold Government to account Every time there is a reshuffle it is preceded by months of speculation about who will move where which in itself causes a kind of paralysis within Government The Committee calls for Secretaries of State to be left in post for the length of a Parliament Taken together with the advent of fixed term Parliaments this should enable them to make a real difference Some reshuffling of ministers is inevitable because of resignations and illness but reshuffles have become a habit in the UK The majority of the Committee concluded that there should be a specific Minister in the Cabinet Office who is responsible for ministerial development He or she should oversee ministerial training and appraisal There should also be compulsory training for all new Ministers continuous professional development for experienced Ministers and basic ministerial training for shadow Ministers in the 12 months before the expected date of a general election Outgoing Ministers should handover directly to their successors rather than relying exclusively on the civil service to conduct handovers

Destroying Sanctuary Sandra L. Bloom, Brian Farragher, 2010-10-28 For the last thirty years the nation's mental health and social service systems have been under relentless assault with dramatically rising costs and the fragmentation of service delivery rendering them incapable of ensuring the safety security and recovery of their clients The resulting organizational trauma both mirrors and magnifies the trauma related problems their clients seek relief from Just as the lives of people exposed to chronic trauma and abuse become organized around the traumatic experience so too have our social service systems become organized around the recurrent stress of trying to do more under greater pressure they become crisis oriented authoritarian disempowered and demoralized often living in the present moment haunted by the past and unable to plan for the future Complex interactions among traumatized clients stressed staff pressured organizations and a social and economic climate that is often hostile to recovery efforts recreate the very experiences that have proven so toxic to clients in the first place Healing is possible for these clients if they enter helping protective environments yet toxic stress has destroyed the sanctuary that our systems are designed to provide This thoughtful impassioned critique of business as usual begins to outline a vision for transforming our mental health and social service systems Linking trauma theory to organizational function Destroying Sanctuary provides a framework for creating truly trauma informed services The organizational change method that has become known as the Sanctuary Model lays the groundwork for establishing safe havens for individual and organizational recovery The goals are practical improve clinical outcomes increase staff satisfaction and health increase leadership competence and develop a technology for creating and sustaining healthier systems Only in this way can our mental health

and social service systems become empowered to make a more effective contribution to the overall health of the nation Destroying Sanctuary is a stirring call for reform and recovery required reading for anyone concerned with removing the formidable barriers to mental health and social services from clinicians and administrators to consumer advocates
