Looking At Welsh History From The Earliest Times To The Middle Ages One:

A History of Wales from the Earliest Times to the Edwardian Conquest Sir John Edward Lloyd, 1912 **A Companion to the Early Middle Ages** Pauline Stafford, 2012-12-26 Drawing on 28 original essays *A Companion to the Early Middle Ages* takes an inclusive approach to the history of Britain and Ireland from c 500 to c 1100 to overcome artificial distinctions of modern national boundaries A collaborative history from leading scholars covering the key debates and issues Surveys the building blocks of political society and considers whether there were fundamental differences across Britain and Ireland Considers potential factors for change including the economy Christianisation and the Vikings **"The" History of Wales, from the Earliest Times, to Its Final Incorporation with Kingdom of England** B. B. Woodward, 1852 **The history of Wales, from the earliest times, to its final incorporation with the kingdom of England, etc. [Illustrated.]** Bernard Bolingbroke Woodward, 1853 **"The" History of Wales, from the Earliest Times, to Its Final Incorporation with Kingdom of England** Bernard Bolingbroke Woodward, 1852 **The Antiquary** Edward Walford, John Charles Cox, George Latimer Apperson, 1895 **Writing a Small Nation's Past** Neil Evans, 2016-02-17 This is the first volume to examine how the history of Wales was written in a period that saw the emergence of professional historiography largely focused on the nation across Europe and in the United States It thus sets Wales in the context of recent work on national history writing in the nineteenth and twentieth centuries and more particularly offers a Welsh perspective on the ways in which history was written in small mainly stateless nations The comparative dimension is fundamental to the volume's aim highlighting what was distinctive about Welsh historical writing and showing how the Welsh experience mirrors and illuminates broader historiographical developments The book begins with an introduction that uses the concept of historical culture as a way of exploring the different strands of historiography covered in the collection providing orientation to the chapters that follow These are divided into four sections Contexts and Backgrounds Amateurs and Popularizers Creating Academic Disciplines and Comparative Perspectives All these themes are then drawn together in the conclusion to examine how far Welsh historians exemplify widespread trends in the writing of national history and thereby point up common themes that emerge from the volume and clarify its broader significance for students of historiography *A Companion to Geoffrey of Monmouth*, 2020-08-10 *A Companion to Geoffrey of Monmouth* brings together scholars from a range of disciplines to provide an updated scholarly introduction to all aspects of his work Arguably the most influential secular writer of medieval Britain Geoffrey d 1154 popularized Arthurian literature and left an indelible mark on European romance history and genealogy Despite this outsized influence Geoffrey's own life background and motivations are little understood The volume situates his life and works within their immediate historical context and frames them within current critical discussion across the humanities By necessity this volume concentrates primarily on Geoffrey's own life and times with the reception of his works covered by a series of short encyclopaedic overviews organized by

Rural Space in the Middle Ages and Early Modern Age Albrecht Classen, 2012-05-29 Older research on the premodern world limited its focus on the Church the court and more recently on urban space The present volume invites readers to consider the meaning of rural space both in light of ecocritical readings and social historical approaches While previous scholars examined the figure of the peasant in the premodern world the current volume combines a large number of specialized studies that investigate how the natural environment and the appearance of members of the rural population interacted with the world of the court and of the city The experience in rural space was important already for writers and artists in the premodern era as the large variety of scholarly approaches indicates The present volume signals how much the surprisingly close interaction between members of the aristocratic and of the peasant class determined many literary and art historical works In a surprisingly large number of cases we can even discover elements of utopia hidden in rural space We also observe how much the rural world was a significant element already in early medieval mentality Moreover as many authors point out the impact of natural forces on premodern society was tremendous if not catastrophic

Wales and the Crusades Kathryn Hurlock, 2011-10-15 This original study focussing on the impact of the crusading movement in medieval Wales considers both the enthusiasm of the Welsh and those living in Wales and its borders for the crusades as well as the domestic impact of the movement on warfare literature politics and patronage The location of Wales on the periphery of mainstream Europe and its perceived status as religiously and culturally underdeveloped did not make it the most obvious candidate for crusading involvement but this study demonstrates that both native and settler took part in the crusades supported the military orders and wrote about events in the Holy Land Efforts were made to recruit the Welsh in 1188 suggesting contemporary appreciation for Welsh fighting skills even though crusaders from Wales have been overlooked in modern studies By looking at patterns of participation this study shows how domestic warfare influenced the desire and willingness to join the crusade and the effect of such absences on the properties of those who did go The difference between north and south Wales Marcher lord and native prince Flemish noble and minor landholder are considered to show how crusading affected a broad spread of society Finally the political role of crusading participation as a way to remove potential troublemakers and cement English control over Wales is considered as the close of the peak years of crusading coincided with the final conquest of Wales in 1282
