*From Virtue to Vice* Richard A. O'Connor, Penny Van Esterik, 2015-03-01 The recovered possess the key to overcoming anorexia Although individual sufferers do not know how the affliction takes hold piecing their stories together reveals two accidental afflictions One is that activity disorders dieting exercising healthy eating start as virtuous practices but become addictive obsessions The other affliction is a developmental disorder which also starts with the virtuous those eager for challenge and change But these overachievers who seek self improvement get a distorted life instead Knowing anorexia from inside the recovered offer two watchwords on helping those who suffer One is negotiate to encourage compromise which can aid recovery where coercion fails The other is balance for the ill to pursue mind with body activities to defuse mind over body battles **Telling Rhythm** Amittai F. Aviram, 1994 Provides a postmodern theory of poetry that sees rhythm as its essential quality **Intermediate Light** Robert Alexander Houstoun, 1925 Aristotle's Gynecology Mariska Leunissen, 2025 In Aristotle's Gynecology Mariska Leunissen examines Aristotle's methods for the establishment of gynecological facts within his natural science arguing that many of the gynecological phenomena at stake such as menstruation and the nature of menstrual blood the role of female pleasure during sex and women's experiences of erotic dreams and their knowledge of conception and their experiences of false pregnancy and childbirth were mostly for socio cultural reasons not at all or not immediately accessible for a male natural scientific observer such as Aristotle Given this lack of immediate empirical evidence Aristotle employed alternative methods for the establishment of facts such as relying on signs and circumstantial empirical evidence or using analogical and probabilistic reasoning and relied heavily on existing expert reports such as mainly early medical sources but also sometimes verbal reports from women themselves Moreover Aristotle used a secondary standard for testing the results of this inquiry namely one which he originally developed for investigations into physically remote meteorological and cosmological phenomena that are not apparent to observation and according to which statements of facts are credible if they are ontologically possible Leunissen thus reconstructs Aristotle's gynecology in the context of his

commitments to empiricism and his scientific methods for the fact establishing phase of natural science and elucidates the role his concepts of evidence credibility and signs play in his natural scientific research However through its focus on Aristotle s use of gendered knowledge and his reconstruction of natural phenomena believed to be characteristic of women Leunissen s book also offers a glimpse of the lived experiences and reproductive beliefs of women in Ancient Greece

**The Man Who Saved Geometry** Siobhan Roberts, 2024-10-29 An illuminating biography of one of the greatest geometers of the twentieth century. Driven by a profound love of shapes and symmetries, Donald Coxeter (1907–2003) preserved the tradition of classical geometry when it was under attack by influential mathematicians who promoted a more algebraic and austere approach. His essential contributions include the famed Coxeter groups and Coxeter diagrams, tools developed through his deep understanding of mathematical symmetry. *The Man Who Saved Geometry* tells the story of Coxeter's life and work, placing him alongside history's greatest geometers from Pythagoras and Plato to Archimedes and Euclid, and it reveals how Coxeter's boundless creativity reflects the adventurous, ever-evolving nature of geometry itself. With an incisive, touching foreword by Douglas R. Hofstadter, *The Man Who Saved Geometry* is an unforgettable portrait of a visionary mathematician.

**A Community of One** Martin A. Danahay, 1993-08-24 Complementing recent feminist studies of female self-representation, this book examines the dynamics of masculine self-representation in nineteenth-century British literature. Arguing that the category autobiography was a product of nineteenth-century individualism, the author analyzes the dependence of the nineteenth-century masculine subject on autonomy or self-naming as the prerequisite for the composition of a life history. The masculine autobiographer achieves this autonomy by using a feminized other as a metaphorical mirror for the self. The feminized other in these texts represents the social cost of masculine autobiography. Authors from Wordsworth to Arnold, including Samuel Taylor Coleridge, Thomas De Quincey, John Ruskin, Alfred Tennyson, Robert Louis Stevenson, John Stuart Mill, and Edmund Gosse, use female lovers and family members as symbols for the community with which they feel they have lost contact. In the theoretical introduction, the author argues that these texts actually privilege the

autonomous self over the images of community they ostensibly value creating in the process a self enclosed and self referential community of one      Push Me, Pull You ,2011-05-10 Late Medieval and Renaissance art was surprisingly pushy its architecture demanded that people move through it in prescribed patterns its sculptures played elaborate games alternating between concealment and revelation while its paintings charged viewers with imaginatively moving through them Viewers wanted to interact with artwork in emotional and or performative ways This inventive and personal interface between viewers and artists sometimes conflicted with the Church s prescribed devotional models and in some cases it complemented them Artists and patrons responded to the desire for both spontaneous and sanctioned interactions by creating original ways to amplify devotional experiences The authors included here study the provocation and the reactions associated with medieval and Renaissance art and architecture These essays trace the impetus towards interactivity from the points of view of their creators and those who used them Contributors include Mickey Abel Alfred Acres Kathleen Ashley Viola Belghaus Sarah Blick Erika Boeckeler Robert L A Clark Lloyd DeWitt Michelle Erhardt Megan H Foster Campbell Juan Luis Gonz lez Garc a Laura D Gelfand Elina Gertsman Walter S Gibson Margaret Goehring Lex Hermans Fredrika Jacobs Annette LeZotte Jane C Long Henry Luttikhuizen Elizabeth Monroe Scott B Montgomery Amy M Morris Vibeke Olson Katherine Poole Alexa Sand Donna L Sadler Pamela Sheingorn Suzanne Karr Schmidt Anne Rudloff Stanton Janet Snyder Rita Tekippe Mark Trowbridge Mark S Tucker Kristen Van Ausdall Susan Ward      *Supporting Children with EAL in the Early Years* Judith Harries,2020-12-16 This book aims to equip early years practitioners with the resources and skills required to create a stimulating learning environment and to fully include EAL children into their settings It provides practical ways to show children and their families that their language and culture are valued and respected so that they can feel secure and accepted There are 49 activities included that focus on different areas of the Expressive Arts and Design goal and help practitioners to develop children s language and communication skills as they play      **The Full-Length Mirror** Wu Hung,2022-11-28 Beautifully illustrated a stirring and wide ranging reflection on art technology culture and the full length mirror This book tells two stories about the full length mirror One story through time and space crisscrosses the globe to introduce a broad range of historical actors kings and slaves artists and writers merchants and craftsmen courtesans and commoners The other story explores the connections among objects painting and photography the full length mirror providing a new perspective on historical artifacts and their images in art and visual culture The Full Length Mirror represents a new kind of global art history in which global is understood in terms of both geography and visual medium a history encompassing Europe Asia and North America and spanning over two millennia from the fourth century BCE to the early twentieth century      **The Universe in the Rearview Mirror** Dave Goldberg,2014-06-24 A great read Goldberg is an excellent guide Mario Livio bestselling author of The Golden Ratio Physicist Dave Goldberg speeds across space time and everything in between showing that our elegant universe from the Higgs boson to antimatter to the most massive group of
