

The background of the cover is a soft-focus image of a book with a light-colored, floral-patterned cover. A vibrant red ribbon is draped diagonally across the book. The author's name is printed in white, serif, all-caps font on the upper portion of the red ribbon. The title is printed in a dark, serif, all-caps font on a horizontal yellow banner that crosses the middle of the book. At the bottom of the cover, the subtitle is written in a white, serif, all-caps font.

**Ecological Feelings** Joshua Trey Barnett,2025-03-01 These days earthly coexistence often feels bad As environmental crises amass they cast a shadow over an imagined future and the promises of better or at least predictable days to come In times of climate chaos mass extinction and rampant environmental injustice it is easy to despair But here and there a glimmer of joy or optimism shines forth and reminds us that it is possible even necessary to love and to hope amid the ruins The contributors to this volume grapple with a plurality of interrelated ecological feelings care concern contempt empathy fear grief hope joy numbness optimism possessiveness regret and saudades Informed by a rhetorical perspective the essays collected here reveal what sets our ecological feelings into motion Crucially they also uncover some of the rhetorical

practices through which we might collectively feel our way into a more harmonious earthly coexistence      **Chinese Urban Shi-nema** David H. **Spontaneous Healing of Belief** Gregg Braden, 2009-04-01 What would it mean to discover that everything from the DNA of life to the future of our world is based upon a simple Reality Code one that we can change and upgrade by choice New revelations in physics and biology suggest that we're about to find out A growing body of scientific evidence suggests that our universe works like a Consciousness Computer Rather than the number codes of typical software our Consciousness Computer uses a language that we all have yet are only beginning to understand Life's reality code is based in the language of human emotion and focused belief Knowing that belief is our reality maker the way we think of ourselves and our world is now more important than ever For us to change the beliefs that have led to war disease and the failed careers and relationships of our past we need a reason to see things differently Our ancestors used miracles to change what they believed Today we use science The Spontaneous Healing of Belief offers us both the miracles that open the door to a powerful new way of seeing the world and the science that tells us why the miracles are possible revealing why we are not limited by the laws of physics and biology as we know them today Once we become aware of the paradigm shattering discoveries and true life miracles we must think of ourselves differently And that difference is where the spontaneous healing of belief begins

*Frontiers in Computational Fluid-Structure Interaction and Flow Simulation* Tayfun E. Tezduyar, 2023-11-01

Computational fluid structure interaction FSI and flow simulation are challenging research areas that bring solution and analysis to many classes of problems in science engineering and technology Young investigators under the age of 40 are conducting much of the frontier research in these areas some of which is highlighted in this volume The first author of each chapter took the lead role in carrying out the research presented Some of the topics explored include Direct flow simulation of objects represented by point clouds Computational investigation of leaflet flutter in thinner biological heart valve tissues High fidelity simulation of hydrokinetic energy applications High resolution isogeometric analysis of car and tire aerodynamics Computational analysis of air blast structure interaction Heart valve computational flow analysis with boundary layer and leaflet contact representation Computational thermal multi phase flow for metal additive manufacturing

This volume will be a valuable resource for early career researchers and students not only those interested in computational FSI and flow simulation but also other fields of engineering and science including fluid mechanics solid mechanics and computational mathematics as it will provide them with inspiration and guidance for conducting their own successful research It will also be of interest to senior researchers looking to learn more about successful research led by those under 40 and possibly offer collaboration to these researchers
