Zolkos,2020-09-21 Analyses the social imaginary of undoing repair and return underpinning the international norm of restitution making Approaches restitution not just as a legal norm of property return but as a social imaginary and a cultural psychoanalytic scene of undoing repair and return Brings together philosophic political socio legal and cultural psychoanalytic approaches to the study of restitution Outlines a heterogeneous and multifaceted idea of restitution emergent in modernity and looks at the peripheries of the modern restitutive tradition in the search for alternatives and counter traditions This book takes a unique approach grounded in political and cultural discourse to develop a political theory of restitution Challenging assumptions about restitution in the Western legal and political tradition where it has become nearly synonymous with reacquisition and where legal studies focus on material objects and claims to their ownership Zolkos argues that the development of restitutive norms has been auxiliary to the emergence of modern state sovereignty and excavates the restitutive tradition s mythical religious substrate Bringing together texts from within and outwith the Western canon of political theory and philosophy including the writings of Grotius Durkheim Freud and Klein as well as Mary Shelley s Frankenstein the book undertakes a dual task reading literary texts as a political theorising of restitution and reading political or sociological texts as literary narratives with distinctive restitutive tropes of repair undoing and return

### **Novel Education** Deborah P. Britzman,2006 What is a novel education like The surprising reply supposes that fiction affects the crisis of understanding work within the human professions of teaching and psychoanalysis

The studies of learning and not learning presented begin with the delicate surprise made from representing affective experiences and conflicts within self other relations Freud s question of presenting psychoanalysis to others and the accidental pedagogy made continues to animate our debates on the uses of affected learning Novel Education analyzes the perils and pleasures of inviting narrating and interpreting emotional experience in learning and not learning Drawing upon contemporary psychoanalytic debates on the relation between understanding and therapeutic action these studies open discussion on the unusual world of psychoanalytic methods and link free association and the transference to the aesthetic conflicts made from thinking about sexuality and the difficulties of inhibition in learning listening and the teacher s memory of remembering learning to teach

Novel Education highlights a discussion of the teacher's depression and the difficulty of formulating subjective knowledge from practices, philosophies and theories in the human professions. It raises the question of how fields of thought and practice affect themselves. How may we describe the human idiom made in pedagogical and psychoanalytic relationships? And why join learning to not learning? This thought-provoking book is essential reading on a broad range of fields for undergraduate and graduate students as well as faculty members.

**Approaching Psychoanalysis** David Livingstone Smith, 2018-05-30 This book provides the scope and complexity of Freud's contributions and emphasizes the wide proliferation of the Lacanian approach. Illustrated by vivid narratives detailing the strains and possibilities of the therapeutic encounter, this book is a record of clinical work and thinking over 50 years of psychoanalytic practice. **The Internal World and Attachment** Geoff Goodman, 2013-06-17 How asks Geoff Goodman in *The Internal World and Attachment* can we progress further in integrating the fruits of attachment research with the accumulated clinical wisdom of psychoanalytic theorizing about the internal world of object representations The key he answers is to look more closely at the basic assumptions of each body of theory especially those assumptions whether embedded or explicit that bear on the formation of psychic structure Drawing on Kernberg's insights into the affective and instinctual substrata of psychic organizations Goodman proposes that insecure attachment categories can be correlated with particular constellations of self and object representations Such convergences provide a springboard to further theoretical explanations most especially to the relations between attachment and adult sexual behavior Indeed one outstanding feature of Goodman's proposals is the light they cast on various forms and meanings of sexual psychopathology as he delineates how both promiscuity and retreats from sexual intimacy can be differentially interpreted depending on the patient's pattern of attachment Destined to provoke lively debate *The Internal World and Attachment* is a powerfully informative attempt to go beyond the researcher's view of attachment as a motivational system For Goodman attachment is informed by an internal logic that reflects fantasies and defense and an appreciation of the interaction of attachment pattern with various constellations of self and object representations can deepen our understanding of the internal world in clinically consequential ways Keeping his eye resolutely on the clinical texture of attachment observations and the clinical phenomenology expressive of internal object relations Goodman provides the reader with an experience near basis for viewing two influential bodies of knowledge as complementary avenues for apprehending the internal meaning of externally observable behavior
