Love Of Discovery Science Education The Second Career Of Robert Karplus:

A Love of Discovery Robert G. Fuller, 2013-04-17 Robert Karplus a professor of physics at the University of California Berkeley USA became a leader in the movement to reform elementary school science in the 1960s This book selects the enduring aspects of his work and presents them for the scientists and science educators of today In an era when science education for ALL students has become the clarion call the insights and works of Robert Karplus are as relevant now as they were in the 1960s 70s and 80s This book tries to capture the essence of his life and work and presents selections of his published articles in a helpful context College Teaching and the Development of Reasoning Robert G. Fuller, Thomas C. Campbell, Dewey I. Dykstra, Scott M. Stevens, 2009-10-01 This book is intended to offer college faculty members the insights of the development of reasoning movement that enlighten physics educators in the late 1970s and led to a variety of college programs directed at improving the reasoning patterns used by college students While the original materials were directed at physics concepts they quickly expanded to include other sciences and the humanities and social sciences On going developments in the field will be included The editors have introduced new topics including discussions of Vygotsky's ideas in relation to those of Piaget of science education research progress since 1978 of constructivist learning theory applied to educational computer games and of applications from anthropology to zoology These materials are especially relevant for consideration by current university faculty in all subjects Going Back for Our Future Jon Pedersen, Kevin D. Finson, Barbara S. Spector, Paul Jablon, 2013-04-01 This book is the first volume of an attempt to capture and record some of the answers to these questions either from the pioneers themselves or from those persons who worked most closely with them We know there are many pioneers and early trailblazers who are not included in this volume but there are other volumes to follow As we have posed questions rummaged through files and oft neglected books and probed the memories of many individuals we have come to realize our list of true pioneers is ever growing There are names on the list that most of us readily recognize and there are names of whom few of us have heard yet who were significant in their roles as mentors or idea development and teaching We quickly discovered that the family tree showing connections between these people is not a neat clean simple branching tree but is more like spaghetti The connections are many are intertwined and all have their significance The stories in this volume demonstrate how vital this network was in supporting the individual pioneers during their journey in difficult times and continues to be for those of us today in our own enterprise Inside Science Education Reform J. Myron Atkin, Paul Black, 2003-01-01 Two international leaders offer important insights into the ways in which the discipline of science education has developed and how school curriculum has been shaped by both scientific discovery and social change J Myron Atkin U S and Paul Black U K share their vast and varied experiences in this historical account that chronicles the many developments in the field from the end of World War II to the present The chapters in this volume cover the aims and politics of science education curriculum development subject matter boundaries pedagogy and learning

assessment and evaluation educational research and practice and the teaching profession Each theme is introduced in its historical and philosophical context with current issues emphasized The authors then analyze these themes by drawing on relevant episodes from their transatlantic careers These episodes act as a springboard for developing insights into each theme including comparisons between educational practices in the United States and the United Kingdom Featuring compelling examples and a cohesive presentation this groundbreaking volume is essential reading for anyone making decisions about the future of science education

Education from a Whiteheadian Point of View Vesselin Petrov, 2019-03-28 The basic aims of contemporary thinking in education are to cultivate a proper comprehension of the meaning and purpose of education and the role of the teacher and to develop adequate theoretical and methodological frameworks that combine some of the positive sides of the leading theories while avoiding their disadvantages Toward these ends one excellent candidate for consideration is Alfred North Whitehead's 1861-1947 process relational philosophy of education as set forth in *The Aims of Education* 1929 and elsewhere The contributors to this volume analyze Whitehead's philosophy of education in a detailed and critical fashion including inquiring into the development of cycle based approaches to education like Whitehead's in intellectual history as well as its potential objective bases They also demonstrate how this relates to and can be integrated with other leading theories of education and contemporary pedagogical thinking and identify avenues for its positive practical application in schooling across the globe as well as in scientific research The book further critically evaluates current educational practices and the organization of educational institutions in this light and the effectiveness of teaching strategies that are founded upon some of its principles while also exploring the ramifications of its selection and application in education for society in general as well as for our common civilizational aspirations including humanity's addressing of global problems such as the ecological crisis In addition the volume also serves to lay some of the groundwork for its potential further development

Equal Rites, Unequal Outcomes Lilli S. Hornig, 2012-12-06 Thirteen years ago in June 1988 the Radcliffe Class of 1953 celebrated its 35th Reunion Amidst the festivities we who participated repeatedly asked ourselves the same two questions Is Harvard as sexist as it was when we were undergraduates If not what is the status of women at Harvard today To find the answers we formed an ad hoc committee and charged the members to report back to the class in five years The committee

interviewed selected senior and junior Harvard faculty Harvard and Radcliffe administrators students and alumni ae We identified and studied Harvard and Radcliffe reports on their institutions and on their student organizations We contributed to and participated in a 1990 Radcliffe Focus Group A Survey of Alumnae and Undergraduate Perceptions We found that the University was not as sexist in 1988 as it had been in 1953 Yet the status of women though improved remained quite unequal to that of men Radcliffe College was organizationally separate from Harvard University until 1977 when a non merger merger was implemented However Radcliffe had no faculty of its own and employed Harvard faculty to teach its students in strictly separate classes until World War II The merger effort was completed in 1999 with the complete integration of the two institutions and the formation of the Radcliffe Institute for Advanced Study a tub on its own bottom like other Harvard graduate and professional schools In 1993 the Class of 53 voted unanimously to form the Committee for the
