Love Anthony Walsh, 2017-07-05 Love is a little word with a universe of meanings and has engaged people's interest throughout human history The need to give and receive love lies deep within human nature Philosophers poets theologians sociologists and scientists have all attempted to explain its exact origin but is it an evolutionary adaptation or a social construct Walsh discusses that the nature of and need for love has biological origins He draws upon Darwin's sexual selection theory to define the perceptions of love by infants through the process of experience dependent brain wiring He observes that mother love makes a child capable of loving and that father love makes a child feel worthy of love He appraises the origin and purpose of romantic love in his discussions on sexual reproduction by looking at chemical and neurological responses to love and the influence of love on one's physical and mental health With frequent quotes from literary masters like Shakespeare to orient one's scientific and humanistic understanding of love Walsh goes on to explore various styles of romantic love including monogamy promiscuity bartering love and betrayed love the effects of a skewed sex ratio on dating and mating practices and the age old quest for a perfect society populated by perfect people obeying the biblical command to love one another

Shyness & Love Brian G. Gilmartin, 2012-11-29 Shyness Love covers the only major study conducted to date on social anxiety disorder as it is manifested in informal unstructured male female dating and courtship situations It focuses on the causes both biomedical as well as situational of love shyness and the consequences for those afflicted with it Gilmartin also discusses promising treatment modalities and what schools and communities can do to prevent severe love shyness from developing in the first place Shyness Love examines the early family life as well as the peer group interactions of love shy men The book provides many statistical comparisons between the sampled love shys and a comparison group of non love shy males of normal but not superior social self confidence levels These statistical comparisons allow for some informed speculations regarding the numerous interacting causes that underlie social phobia in informal unstructured heterosexual social situations These statistical comparisons also provide the reader with some powerful suggestions regarding ways the American social structure e.g. schools family life and communities might be rearranged so that severe and intractable forms of love shyness would never have an opportunity to develop in growing boys and teenagers in the first place Since the publication of the first edition of this book it has been determined that as many as forty percent of men afflicted with love shyness are simultaneously comorbid for Asperger's Syndrome also known as high functioning autism As many as half of all love shy males are comorbid for the male lesbian syndrome sometimes also referred to as the passive non competitive male syndrome This second edition contains a new foreword that presents the latest findings in love shyness research It is more concise than the original Shyness Love yet retains the most significant chapters

Science, Scripture, and Same-Sex Love Michael B. Regele, 2014-10-31 Some church leaders assert that same sex

practices are incompatible with Christian teaching The issues threaten to divide our churches and our nation Michael B Regele explores current scientific findings in biological brain research psychology and sociology which he compares with scriptural teaching from the Bible to show that a faithful reading of the Scriptures is consistent with Christian teaching that affirms same sex love leading to same sex marriage and full participation of LGBT people in church leadership Regele offers compelling research and well supported answers to common place questions such as Is sexual orientation a choice that individuals make Is same sex attraction sinful in itself Is it true that lesbian gay bi sexual and transgender LGBT people are more promiscuous than heterosexual people Is it true that same sex relationships do not last as long as hetero sex relationships Is abstinence for life the only choice for a Christian LGBT person Or can they enter into intimate and sexual relationships and still be active participants in a Christian community Is same gender marriage acceptable from a Christian standpoint

Love, Money, and Parenting Matthias Doepke,Fabrizio Zilibotti,2020-11-03 Doepke and Zilibotti investigate how economic forces shape how parents raise their children They show that in countries with increasing economic inequality such as the United States parents push harder to ensure their children have a path to security and success Economics has transformed the hands off parenting of the 1960s and 70s into a frantic overscheduled activity Growing inequality has also resulted in an increasing parenting gap between richer and poorer families raising the disturbing prospect of diminished social mobility and fewer opportunities for children from disadvantaged backgrounds The authors discuss how investments in early childhood development and the design of education systems factor into the parenting equation and how economics can help shape policies that will contribute to the ideal of equal opportunity for all From publisher description
