We admire the beautiful bright stars in the dark night up in the sky while we are doing so many wishes also we are putting so many connections of our activities with stars and moon so to write about stars is interesting With so many interesting information by Astrology awakened my curiosity I decided to write this fiction book in honor of the beautiful and different big groups of stars that are in the constellation Stars are shining by thermonuclear fusion of hydrogen into helium This fusion in its core is releasing energy that traverses in interior of the star and that radiates into outer space This lay of hydrogen into helium gives some stars different beautiful colors like red nebula blue stars or purple stars too Their shining is bright

Because the stars have so much mysteries and different stories connected with religious and galactic navigation since in older time and people all around the planet connect the stars and the moon to so many activities and their wishes too it inspired me to write about stars
