mainly considered the problem of scheduling ads competing to be placed on a web page Here the ads were specified by geometry and display frequency and both of these factors were considered in developing a solution to the advertisement scheduling problem These models were similar in nature to the problem of scheduling ads on newspaper or television but the pricing structure in these models were different from those in newspaper or television ads As the web advertising evolved the initial models were augmented by considering how the schedule of ads is changed based on individual user click behavior Thus these models considered personalization in web advertising The book also presents methods to help solve these models More recently there has been tremendous growth in mobile advertising This book also provides the details of business model in mobile advertising and presents solutions for the optimization problem involved in mobile advertising Additionally this book looks to key future trends in web and mobile advertising such as Fading Ads and the associated challenges that come with it For instance the future trends in pricing models are more towards action based pricing rather than impression based pricing

**Communication and Peace** Julia Hoffmann, Virgil Hawkins, 2015-02-11 This book analyses the use of communication in resolving conflicts with a focus on de escalation and processes of peacebuilding and peace formation From the employment of hate radio in the Rwanda genocide to the current conflict between Russia and

the Ukraine following events in the Crimea communication and the media are widely recognized as powerful tools in conflicts and war Although there has been significant academic attention on the relationship between the media conflict and war academic efforts to understand this relationship have tended to focus primarily on the links between communication and conflict rather than on communication and peace In order to make sense of peace it is essential to look at communication in its many facets mediated or not This is true within many of the diverse strands that make up the field of communication and peace but it is also true in the sense that a holistic and interdisciplinary approach is missing from the literature This book addresses this widely acknowledged lacuna by providing an interdisciplinary perspective on the field bringing together relevant but so far largely isolated streams of research In doing so it aims to provide a platform for further reflection of the meaning of and requirements for peace in our contemporary world with a focus on de escalation conflict transformation reconciliation and processes of peacebuilding as opposed to conflict escalation or crisis intervention This volume will be of much interest to students of peace and conflict studies peacebuilding media and communication studies security studies and IR in general
