## **Major Political Events In South Africa 1948 199:**

**Afrikaner Politics in South Africa, 1934-1948** Newell M. Stultz, 2023-11-15 This book examines the political landscape of South Africa from 1934 to 1948 focusing on the ideological conflict between Afrikaner nationalism and policies aimed at conciliation between Afrikaners and English speaking South Africans The Union of South Africa founded in 1910 unified the country under a government heavily influenced by British principles but also included leaders from the former Boer republics Early South African politics became a struggle between two major political ideologies one that promoted Afrikaner nationalism advocating for Afrikaner cultural and political interests and another that supported conciliation a philosophy attempting to bridge ethnic divides and foster unity among white South Africans The book highlights that conciliation parties faced significant challenges in gaining long term Afrikaner support as they needed to balance competing interests between English speaking South Africans and Afrikaners who felt a strong sense of ethnic identity Afrikaner nationalist parties however did not need this balance and could draw on the deep seated solidarity within their community The critical turning point in this era according to the author was Prime Minister Jan Smuts decision in 1939 to align South Africa with Britain in declaring war on Germany This move alienated a large portion of the Afrikaner electorate who saw it as a violation of the South Africa first principle and contributed significantly to the United Party s waning support This estrangement between Afrikaners and conciliation parties the author argues set the stage for the rise of the National Party and their victory in 1948 which marked the start of apartheid While many observers attributed the Nationalist victory to the appeal of apartheid policies this study suggests that the National Party s success stemmed more fundamentally from the longstanding disillusionment with conciliation policies and the failure of conciliation leaders to create integrative solutions that resonated with both Afrikaners and English speaking South Africans This historical analysis sheds light on how ethnic divisions and unresolved political conflicts laid the groundwork for South Africa s mid 20th century shift toward Afrikaner dominated governance This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1974

The goal of this book is to recapture the diminished roles of affect psychological needs and the psychodynamic mechanisms that are crucial for understanding political behavior by explaining and extending the contributions of Harold D Lasswell the dominant figure in political psychology in the mid twentieth century Although Lasswell was best known for applying psychodynamic theories to politics this book also demonstrates how his framework accommodated for cognitive processes and social interactions ranging from communications to policy making The authors use Lasswell s contributions and the debates over his ideas as a springboard for examining current policy political and leadership issues Revitalizing Political Psychology presents and extends four aspects of Lasswell s contributions to the field the psychodynamic mechanisms drawn from psychoanalytic theory the use of symbol associations to understand political propaganda the analysis of democratic character for both the public and the elites and the structure of belief systems In so doing the authors link personality and political communication theory to democratic practice The authors also critique leadership studies using Lasswell s concerns over the risks to democratic accountability and the current preoccupation with strengthening the roles of charismatic and transformational leaders Intended for researchers practitioners and students in the areas of political and historical psychology political strategy and political communication the book s emphasis on psychodynamics also appeals to psychoanalysts and the material on leadership appeals to professionals in management and industrial organizational psychology

**British Sporting Relations with Apartheid South Africa** Matthew P. Llewellyn, Toby C. Rider, 2024-11-25

The transnational anti apartheid sport boycott of South Africa represented the most prominent extended and controversial anti racism campaign in the history of sport Spearheaded by prominent British religious and anti colonial figures and exiled South Africans emboldened by communist and Global South support and legitimised by supranational political bodies such as the United Nations the Organisation of African Unity and the Commonwealth the sport boycott helped propel anti apartheid out of relative obscurity and struck at the very heart of a cultural practice that served an explicitly ideological function in Afrikaner society Britain held a dichotomous even paradoxical role as both prosecutor and defender of white South Africa This book utilises sport as a critical lens for understanding the dynamics and dichotomies of British attitudes towards the apartheid regime Debates over whether to continue or to cut sporting links with apartheid South Africa proved bitterly divisive The considerable weight the subject carried and the degree to which it saturated British political and social discourse for four decades speaks to its impact and importance British Sporting Relations with Apartheid South Africa represents the first archival based historical examination

of Britain's sporting relations with South Africa throughout the apartheid era 1948-1994. Situating the analysis within the shifting multiracial and multicultural landscapes of postcolonial Britain and within global political, cultural, sporting and ideological debates, the authors trace the origins and evolution of the transnational sport boycott and examine what inspired Britons to energise anti-apartheid sport campaigns and in contrast what drove many others to vehemently oppose them at every turn. *English-speaking South Africa Today* 1820 Settlers National Monument Foundation, 1976

**Bibliographic Guide to Black Studies** Schomburg Center for Research in Black Culture, 1997 **The Changing Past** Ken Smith, Kenneth Wyndham Smith, 1989 E. H. Carr said: 'Before you study the history, study the historian.' Written history often tells us more about the historian's own times than it does of the times about which he is writing. The historians and the way in which each generation has rewritten history in the light of its own preoccupations is the subject of *The Changing Past*. This is the first book-length survey in English that covers all the main trends in South African historiography. Starting with the first documents and histories, it goes on to trace the 19th-century British and settler schools, Afrikaans historiography from its pre-academic 19th-century phase to the present and the liberal historians who struck out in a new direction from the 1920s. The book highlights the break with the past that historians of the new radical school have made in the last 15 years and surveys the position of historical writing to the present. The canvas is delineated in bold strokes that sketch in the main outlines rather than seek an exhaustive treatment of all existing literature. This together with a conscious effort to minimize theoretical discussion makes it a highly readable text. *The American Political Science Review*, 1957-03

**The Oxford Handbook of Names and Naming** Carole Hough, 2016-04-28 In this handbook, scholars from around the world offer an up-to-date account of the state of the art in different areas of onomastics in a format that is both useful to specialists in related fields and accessible to the general reader. Since Ancient Greece, names have been regarded as central to the study of language and this has continued to be a major theme of both philosophical and linguistic enquiry throughout the history of Western thought. The investigation of name origins is more recent, as is the study of names in literature. Relatively new is the study of names in society, which draws on techniques from sociolinguistics and has gradually been gathering momentum over the last few decades. The structure of this volume reflects the emergence of the main branches of name studies in roughly chronological order. The first Part focuses on name theory and outlines key issues about the role of names in language, focusing on grammar, meaning and discourse. Parts II and III deal with the study of place names and personal names respectively, while Part IV outlines contrasting approaches to the study of names in literature with case studies from different languages and time periods. Part V explores the field of socio-onomastics with chapters relating to the names of people, places and commercial products. Part VI then examines the interdisciplinary nature of name studies before the concluding Part presents a selection of animate and inanimate referents ranging from aircraft to animals and explains the naming strategies adopted for them. **Water Policy Entrepreneurs** Sander Meijerink, 2009 Unsurpassed in the scope of its coverage, this
