Interpreting the Environment at Museums and Historic Sites Debra A. Reid, David D. Vail, 2019-09-19 Interpreting the Environment at Museums and Historic Sites is for anyone who wants to better understand the environment that surrounds us and sustains us who wants to become a better steward of that environment and who wants to share lessons learned with others The process starts by focusing attention on the environment the physical space that constitutes the largest three dimensional object in museum collections It involves conceptualizing spaces and places of human influence spaces that contain layer upon layer documenting human struggles to survive and thrive This evidence exists in natural environments as well as city centers The process continues by adopting an environment centric view of the spaces destined to be interpreted This mind set forms the basis for devising research plans that document how humans have changed destroyed conserved and sustained spaces over time and the ways that the environment reacts Interpretation built on this evidence then becomes the basis for minds on engagement with the places that humans inhabit and the spaces that they have changed and continue to manipulate Interpreting the Environment at Museums and Historic Sites provides a tool kit designed to help you research environmental history document evidence of human influence on land and the environment over time and tailor that knowledge to new public engagement It proposes a multi disciplinary approach that requires expertise in the humanities as well as the sciences and social sciences to best understand space and place over

time It incorporates case studies of the theory and method of environmental history to explore how human goals take lasting shape in the environment creating working environments getting water generating and harnessing power growing food traveling and trading building things and preserving natural landscapes Features include the Interpreting the Environment Tool Kit to help you launch the good work of interpreting the environment Raw Materials the evidence landscape ecosystems artifacts and the built environmentPreparation methods thinking like a naturalist scientist thinking like a historian combining approachesPlanning envisioning the goal proactive message stewardship sustainabilityPartnerships sharing work strength in numbers allying across disciplinary divides united in efforts to inform the public about their individual and collective effects on the landscape and the environmentPotential educating the public about people and places is part of a world wide goal with the cumulative effect of saving the planet one story at a time A Timeline and Bibliographic essay round out the book s resources

Walker,2017-12-01 An accessible and impartial survey of the positions of the Republican and Democratic parties on the most pressing environmental issues of our time from climate change and wilderness preservation to air and water pollution Today s Environmental Issues Democrats and Republicans presents a unique perspective on party politics one that impartially identifies similarities and differences regarding an array of topics ranging from fracking sustainability and pesticides to logging and noise pollution Essays provide both historical information and up to date coverage of partisan opinions on today s environmental concerns Written for upper level high school students undergraduates and general audiences interested in environmental issues and partisan viewpoints this book enables readers to better understand the origins details differences and commonalities of partisan opinions surrounding today s environmental concerns Each environmental issue is unique with its own set of concerns and impacts particularly when viewed from a party perspective By examining a breadth of issues from the party viewpoint readers can understand how the parties could work together or in opposition depending on the environmental issue and that the parties may not always be polar opposites on every issue a characterization that is often portrayed in the media Each essay includes a sidebar that presents a quick look at the party line individuals who have shaped opinion or policy or key court decisions **Major Problems in American Women's History** Mary Beth Norton,Ruth M. Alexander,2007 Designed to encourage critical thinking about history theMajor Problemsseries introduces students to both primary sources and analytical essays on important topics in U S history Major Problems in American Women s Historyis the leading reader for courses on the history of American women covering the subject s entire chronological span While attentive to the roles of women and the details of women s lives the authors are especially concerned with issues of historical interpretation and historiography The Fourth Edition features greater coverage of the experiences of women in the Midwest and the West immigrant women and more voices of women of color Key pedagogical elements of theMajor Problemsformat have been retained 14 to 15 chapters per volume chapter introductions headnotes and suggested readings New In Chapter 1 an exclusive essay by Kate Haulman examines the evolution of the field of women s history and the state of women s history today New Chapter 2 now focuses on Native American women while a new Chapter 3 covers witches and their accusers in New England and the Salem witch trials New Chapter 6 draws on recent scholarship on the roles of ordinary and elite women in the numerous reform movements of

the Early Republic Revised Chapter 7 rethinks and refocuses the text's coverage of women's roles in slavery and the Civil War and more directly addresses the lives of African American women during and after slavery New Post 1960 coverage in Chapters 15-16 has been thoroughly revised to highlight the women's movement women's health recent immigration and economic changes affecting women After the Death of Nature Kenneth Worthy, Elizabeth Allison, Whitney Bauman, 2018-11-09 Carolyn Merchant's foundational 1980 book *The Death of Nature: Women, Ecology, and the Scientific Revolution* established her as a pioneering researcher of human-nature relations Her subsequent groundbreaking writing in a dozen books and over one hundred peer-reviewed articles have only fortified her position as one of the most influential scholars of the environment This book examines and builds upon her decades-long legacy of innovative environmental thought and her critical responses to modern mechanistic and patriarchal conceptions of nature and women as well as her systematic taxonomies of environmental thought and action Seventeen scholars and activists assess, praise, criticize, and extend Merchant's work to arrive at a better and more complete understanding of the human place in nature today and the potential for healthier and more just relations with nature and among people in the future Their contributions offer personal observations of Merchant's influence on the teaching, research, and careers of other environmentalists **The Environment and World History** Edmund Burke III, Kenneth Pomeroy, 2009-04-08 Since around 1500 C.E. humans have shaped the global environment in ways that were previously unimaginable Bringing together leading environmental historians and world historians this book offers an overview of global environmental history throughout this remarkable 500-year period In eleven essays the contributors examine the connections between environmental change and other major topics of early modern and modern world history: population growth, commercialization, imperialism, industrialization, the fossil fuel revolution, and more Rather than attributing environmental change largely to European science, technology, and capitalism, the essays illuminate a series of culturally distinctive yet often parallel developments arising in many parts of the world, leading to intensified exploitation of land and water The wide range of regional studies, including some in Russia, China, the Middle East, India, Southeast Asia, Latin America, Southern Africa, and Western Europe, together with the book's broader thematic essays, makes *The Environment and World History* ideal for courses that seek to incorporate the environment and environmental change more fully into a truly integrative understanding of world history CONTRIBUTORS Michael Adas, William Beinart, Edmund Burke III, Mark Cioc, Kenneth Pomeroy, Mahesh Rangarajan, John F. Richards, Lise Sedrez, Douglas R. Weiner General Technical Report RMRS, 1998 Leaders from the 1960s David De Leon, 1994-06-22 The throngs at Woodstock, Jane Fonda in Hanoi, I Have a Dream, burning draft cards, fire in the streets—these images of the 1960s are still very much alive today What happened to the people and principles that dominated that decade Which leaders from those turbulent years had the most lasting effect on our lives today How well have the principles for which those leaders fought so strongly withstood the test of time This thought-provoking biographical dictionary allows the reader to study the leaders, both conservative and

liberal their ideals and their enduring influence With major sections on racial democracy peace and freedom sexuality and gender the environment radical culture and visions of alternative societies Leaders from the 1960s includes entries on a wide selection of nationally prominent activists of the 1960s In addition to those who dominated only the sixties the volume includes earlier activists who came into prominence in the 1960s and activists of the era who came into prominence since the 1960s Each entry provides a biographical sketch but the focus of the entries is on the person s basic concepts or the essence of his or her work and the public response it generated Included are extensive bibliographies on the individuals and the period

Encyclopedia of Historians and Historical Writing Kelly Boyd,2019-10-09 The Encyclopedia of Historians and Historical Writing contains over 800 entries ranging from Lord Acton and Anna Comnena to Howard Zinn and from Herodotus to Simon Schama Over 300 contributors from around the world have composed critical assessments of historians from the beginning of historical writing to the present day including individuals from related disciplines like J rgen Habermas and Clifford Geertz whose theoretical contributions have informed historical debate Additionally the Encyclopedia includes some 200 essays treating the development of national regional and topical historiographies from the Ancient Near East to the history of sexuality In addition to the Western tradition it includes substantial assessments of African Asian and Latin American historians and debates on gender and subaltern studies

Environmental Issues in American History Chris J. Magoc,2006-04-30 Uses textual analysis primary source documents and an issues centered approach to introduce American environmental history

Creation, God, and Humanity Catherine Wright,2017 Examines the history and development of ecological theological anthropology and how it engages human suffering so that people of faith can better understand the suffering inherent to earth s creative processes and that inflicted by human sin

Game in the Garden George Colpitts,2010-10-01 Frontier and pioneer societies provide numerous unexplored avenues of social history Game in the Garden identifies the imaginative use of wild animals in early western society In what is now western Canada humans have long used wildlife in order to survive their surroundings better understand their natural world and form aspects of their identity The shared use of wild animals has helped to determine social relations between Native peoples and newcomers In later settlement periods controversy about subsistence hunting and campaigns of local conservation associations drew lines between groups in communities particularly Native peoples immigrants farmers and urban dwellers In addition to examining grassroots conservation activities Colpitts identifies early slaughter rituals iconographic traditions and subsistence strategies that endured well into the interwar years in the twentieth century Drawing primarily on local and provincial archival sources he analyzes popular meanings and booster messages discernible in taxidermy work city nature museums and promotional photography Environmental historians Native studies specialists history students conservationists nature enthusiasts and general readers alike will find fascinating how western attitudes to wild animals changed according to subsistence and economic needs and how wildlife helped to determine the social relations among people in western Canada

Natural

Disasters, Cultural Responses Christof Mauch, Christian Pfister, 2009-03-16 Catastrophes it seems are becoming more frequent in the twenty first century According to UN statistics every year approximately two hundred million people are directly affected by natural disasters seven times the number of people who are affected by war Discussions about global warming and fatal disasters such as Katrina and the Tsunami of 2004 have heightened our awareness of natural disasters and of their impact on both local and global communities Hollywood has also produced numerous disaster movies in recent years some of which have become blockbusters This volume demonstrates that natural catastrophes earthquakes hurricanes floods etc have exercised a vast impact on humans throughout history and in almost every part of the world It argues that human attitudes toward catastrophes have changed over time Surprisingly this has not necessarily led to a reduction of exposure or risk The organization of the book resembles a journey around the globe from Europe to North Africa the Middle East and Asia and from the Pacific through South America and Mexico to the United States While natural disasters appear everywhere on the globe different cultures societies and nations have adopted specific styles for coping with disaster Indeed how humans deal with catastrophes depends largely on social and cultural patterns values religious belief systems political institutions and economic structures The roles that catastrophes play in society and the meanings they are given vary from one region to the next they differ and this is one of the principal arguments of this book from one cultural political and geographic space to the next The essays collected here help us to understand not only how people in different times throughout history have learned to cope with disaster but also how humans in different parts of the world have developed specific cultural social and technological strategies for doing so

Major Problems in American Colonial History Karen Ordahl Kupperman, 2000 Introduces students to both primary sources and analytical essays on topics in US history

Environmentalism David Peterson Del Mar, 2014-06-06 Why are our environmental problems still growing despite a huge increase in global conservation efforts Peterson del Mar untangles this paradox by showing how prosperity is essential to environmentalism Industrialization drove people to look for meaning in nature even as they consumed its products more relentlessly Hence England led the way in both manufacturing and preserving its countryside and the United States created a matchless set of national parks as it became the world's pre eminent economic and military power Environmental movements have produced some impressive results including cleaner air and the preservation of selected species and places But agendas that challenged western prosperity and comfort seldom made much progress and many radical environmentalists have been unabashed utopianists Environmentalism considers a wide range of conservation and preservation movements and less organized forms of nature loving from seaside vacations to ecotourism to argue that these activities have commonly distracted us from the hard work of creating a sustainable and sensible relationship with the environment
