**Spaceship Earth in the Environmental Age, 1960-1990** Sabine Höhler, 2015-10-06 The idea of the earth as a vessel in space came of age in an era shaped by space travel and the Cold War Höhler's study brings together technology science and ecology to explore the way this latter day ark was invoked by politicians environmentalists cultural historians writers of science fiction and many others across three decades *Just the Funny Parts* Nell Scovell, 2018-03-20 *Just the Funny Parts* is a juicy and scathingly funny insider look at how pop culture gets made For more than thirty years writer producer and director Nell Scovell worked behind the scenes of iconic TV shows including *The Simpsons* *Late Night with David Letterman* *Murphy Brown* *NCIS* *The Muppets* and *Sabrina the Teenage Witch* which she created and executive produced In 2009 Scovell gave up her behind the scenes status when the David Letterman sex scandal broke Only the second woman ever to write for his show Scovell used the moment to publicly call out the lack of gender diversity in late night TV writers rooms One of the boys came out hard for all of the girls Her criticisms fueled a cultural debate Two years later Scovell was collaborating with Sheryl Sandberg on speeches and later on *Lean In* which resulted in a worldwide movement Now Scovell is opening up with this fun honest and often shocking account Scovell knows what it's like to put words in the mouths of President Barack Obama Mark Harmon Candice Bergen Bob Newhart Conan O'Brien Alyssa Milano and Kermit the Frog among many others Through her eyes you'll sit in the Simpson writers room stand on the Oscar red carpet pin a tail on Miss Piggy bond with *Star Trek's* Leonard Nimoy and experience a Stephen King like encounter with Stephen King *Just the Funny Parts* is a fast paced account of a nerdy girl from New England who fought her way to the top of the highly competitive male dominated entertainment field The book delivers invaluable insights into the creative process and tricks for navigating a difficult workplace It's part memoir part how to and part survival story Or as Scovell puts it It's like *Unbroken* but funnier and with slightly less torture *Strange Foods* Jerry Hopkins, 1999-11-15 This gastrological romp shares tales of gustatory tidbits from six continents Weaving history and autobiography author Jerry Hopkins regales with an array of startling facts about the world's eating habits *Strange Foods* begins with rat tales from the Roman Empire and imperial China and continues on to stories from locales where rat remains a mouth watering hors d'oeuvre or hearty entrée today There are at least 40 serving suggestions for crocodile alone And there are more than 250 photographs from acclaimed photographer Michael Freeman whose aim is true and who eats what he shoots This is gonzo food writing that's sure to change your mind if not your palate [Meat Planet](#) Benjamin Aldes Wurgaft, 2019-09-03 In 2013 a Dutch scientist unveiled the world's first

laboratory created hamburger Since then the idea of producing meat not from live animals but from carefully cultured tissues has spread like wildfire through the media Meanwhile cultured meat researchers race against population growth and climate change in an effort to make sustainable protein Meat Planet explores the quest to generate meat in the lab a substance sometimes called cultured meat and asks what it means to imagine that this is the future of food Neither an advocate nor a critic of cultured meat Benjamin Aldes Wurgaft spent five years researching the phenomenon In Meat Planet he reveals how debates about lab grown meat reach beyond debates about food examining the links between appetite growth and capitalism Could satiating the growing appetite for meat actually lead to our undoing Are we simply using one technology to undo the damage caused by another Like all problems in our food system the meat problem is not merely a problem of production It is intrinsically social and political and it demands that we examine questions of justice and desirable modes of living in a shared and finite world Benjamin Wurgaft tells a story that could utterly transform the way we think of animals the way we relate to farmland the way we use water and the way we think about population and our fragile ecosystem s capacity to sustain life He argues that even if cultured meat does not succeed it functions much like science fiction as a crucial mirror that we can hold up to our contemporary fleshy dysfunctions
