Sherlock, Tom Sherlock, 2013 In the early days on the Colorado frontier women took care of family and neighbors because accepting that we re all in this together was the only realistic survival strategy on the high plains along the Front Range in the mountain towns and on the Western Slope As dangerous occupations became fundamental to Colorado s economy if they were injured or got sick there was no one to care for the young men who worked as miners steel workers cowboys and railroad construction workers in remote parts of Colorado So physicians surgeons nurses Catholic Sisters Reform and Orthodox Jews Protestants and other humanitarians established hospitals and when Colorado became a mecca for people with tuberculosis sanatoriums Those pioneers and the communities they served created our community based humanitarian healthcare tradition These stories about our Wild West heritage honor the legacy of our 19th century healthcare pioneers and will inspire and entertain 21st century readers Because we can be inspired only if we understand the facts and because facts are more likely to be understood when presented in context this chronology includes national and international developments that establish an indispensable frame of reference for understanding how our pioneers created the local community based healthcare system that we ve inherited

A Cultural History of the Violin in Nineteenth-Century London Tom Wilder, 2025-03-18 Examines the violin s evolution as not just instrument but valued objet d art through the eyes of musicians collectors makers dealers connoisseurs journalists auctioneers and traders The nineteenth century saw developments in the composition performance and reception of classical music that led to an unprecedented shift in how the violin was appreciated from humble craft object to one of art A utilitarian tool defined in 1800 by its tonal properties became by century s end an expensive objet d art classified almost exclusively in terms of physical visible properties In London s vibrant musical life Cremonese violins acquired special significance and in turn helped shape the beliefs knowledge and behaviour of the disparate actors connected to the instrument musicians collectors makers dealers connoisseurs journalists auctioneers and traders By 1880 London had supplanted Paris as the centre of the international violin trade One firm in particular W E Hill Sons emerged as a major presence in both the local musical community and the global violin market The Hills were makers restorers dealers and

connoisseurs They were also writers collectors and melomaniacs deeply implicated in London's instrument auction and exhibition scene The mutually reinforcing nature of these activities which they consciously turned to account for commercial reasons bear witness to events and developments earlier in the century Their story illuminates this first study of the violin's nineteenth century journey from simple musical instrument to mystified work of art

Re-Imagining Democracy in the Mediterranean, 1780-1860 Joanna Innes, Mark Philp, 2018-10-25 Mediterranean states are often thought to have democratised only in the post war era as authoritarian regimes were successively overthrown On its eastern and southern shores the process is still contested Re imagining Democracy looks back to an earlier era the late eighteenth and early nineteenth centuries and argues it was this era when some modern version of democracy in the region first began By the 1860s representative regimes had been established throughout southern Europe and representation was also the subject of experiment and debate in Ottoman territories Talk of democracy its merits and limitations accompanied much of this experimentation though there was no agreement as to whether or how it could be given stable political form Re imagining Democracy assembles experts in the history of the Mediterranean who have been exploring these themes collaboratively to compare and contrast experiences in this region so that they can be set alongside better known debates and experiments in North Atlantic states States in the region all experienced some form of subordination to northern great powers In this context their inhabitants had to grapple with broader changes in ideas about state and society while struggling to achieve and maintain meaningful self rule at the level of the polity and self respect at the level of culture Innes and Philip highlight new research and ideas about a region whose experiences during the age of revolutions are at best patchily known and understood as well as to expand understanding of the complex and variegated history of democracy as an idea and set of practices

The History and Poetics of Scientific Biography Thomas Söderqvist, 2016-03-03 Biographies of scientists carry an increasingly prominent role in today's publishing climate Traditional historical and sociological accounts of science are complemented by narratives that emphasize the importance of the scientific subject in the production of science Not least is the realization that the role of science in culture is much more accessible when presented through the lives of its practitioners Taken as a genre such biographies play an important role in the public understanding of science In recent years there has been an increasing number of monographs and collections about biography in general and literary biography in particular However biographies of scientists engineers and medical doctors have rarely been the topic of scholarly inquiry As such this volume of essays will be welcomed by those interested in the genre of science biography and who wish to re-examine its history foundational problems and theoretical implications Borrowing approaches and methods from cultural studies and the history philosophy and sociology of science the contributions cover a broad range of subjects periods and locations By presenting such a rich diversity of essays the volume is able to chart the reoccurring conceptual problems and devices that have influenced scientific biographies from classical antiquity to the present day In so doing it provides a compelling overview of the history of the genre suggesting that the

different valuations given scientific biography over time have been largely fuelled by vested professional interests

Women and museums 1850-1914 Kate Hill, 2016-07-01 This book recovers the significant contribution made by women to museums not just in obvious roles such as workers but also as donors visitors volunteers and patrons It suggests that women persistently acted to domesticate the museum by importing domestic objects and domestic regimes of value as well as by making museums more welcoming to children and even by stressing the importance of housekeeping at the museum At the same time women sought masculine careers in science and curatorship but found such aspirations hard to achieve their contribution tended to be kept within clear feminised areas The book will be of interest to those working on gender culture or museums in the period It sheds new light on women s material culture and material strategies education and professional careers and leisure practices It will form an important historical context for those working in contemporary museum studies

Scientists of Faith Dan Graves, The personal stories of forty eight historic scientists and an overview of their contributions to their field and faith **The Culture of History** Billie Melman, 2006-06-22 In this original and widely researched book Billie Melman explores the culture of history during the age of modernity Her book is about the production of English pasts the multiplicity of their representations and the myriad ways in which the English looked at history sometimes in the most literal sense of looking and made use of it in a social and material urban world and in their imagination Covering the period between the Napoleonic Wars and the Coronation of 1953 Melman recoups the work of antiquarians historians novelists and publishers wax modellers cartoonists and illustrators painters playwrights and actors reformers and educationalists film stars and their fans musicians and composers opera fans and radio listeners Avoiding a separation between high and low culture Melman analyses nineteenth century plebeian culture and twentieth century mass culture and their venues like Madame Tussaud s Chamber of Horrors panoramas national monuments like the Tower of London and films as well as studying forms of minority art notably opera She demonstrates how history was produced and how it circulated from texts visual images and sounds to people and places and back to a variety of texts and images While paying attention to individuals making do with culture Melman considers constrictions of class gender the state and the market place on the consumption of history Focusing on two privileged pasts the Tudor monarchy and the French Revolution the latter seen as an English event and as the framework for narrating and comprehending history Melman shows that during the nineteenth century the most popular longest enduring and most highly commercialized images of the past represented it not as cosy and secure but rather as dangerous disorderly and violent The past was also imagined as an urban place rather than as rural In Melman s account City not green Country is the centre of a popular version of the past whose central Images are the dungeon the gallows and the guillotine Reference Sources in History Ronald H.
